Hiller,2009 Explosive economic growth in resource rich Alberta has led to a stunning increase in its population In contrast to Ontario and British Columbia which have grown primarily through international migration Alberta has become a magnet for internal migrants contributing to population redistribution within Canada with significant national social and economic consequences Combining statistical analysis and ethnographic study Harry Hiller uncovers two waves of in migration to Alberta His innovative approach begins with the individual migrant and analyzes the relocation experience from origin to destination Through interviews with hundreds of migrants Hiller shows that migration is complex and dynamic shaped not just by what Alberta offers but also prompted by a process that begins in the region of origin that makes migration possible and helps determine whether migrants stay or return home By combining a social psychological approach with structural factors such as Alberta s transition from a regional hinterland province to its emerging role the global system discussions of gender The internet and folk culture *Second Promised Land* provides a multi dimensional and deeply human account of a contemporary Canadian phenomenon

Host Cities and the Olympics Harry H. Hiller, 2014 Rather than interpreting the Olympics as primarily a sporting event of international or national significance this book understands the Games as a civic project for the host city that serves as a catalyst for a variety of urban interests over a period of many years from the bidding phase through the event itself Traditional Olympic studies have tended to examine the Games from an outsider's perspective or as something experienced through the print media or television In contrast the focus presented here is on the dynamics within the host city understood as a community of interacting individuals who encounter the Games in a variety of ways through support opposition or even indifference but who have a profound influence on the outcome of the Games as actors and players in the Olympics as a drama Adopting a symbolic interactionist approach the book offers a new interpretive model through which to understand the Olympic Games by exploring the relationship between the Games and residents of the host city Key analytical concepts such as framing dramaturgy the public realm and the symbolic field are introduced and illustrated through empirical research from the Vancouver 2010 Winter Games and it is shown how the social media and shifts in public opinion reflected interaction effects within the city By filling a clear lacuna in the Olympic Studies canon this book is important reading for anybody with an interest in the sociology of sport urban studies event studies or urban sociology

Changing Neighbourhoods Jill Grant, Alan Walks, Howard Ramos, 2020-03-15 Canadians have a right to live in cities that meet their basic needs in a dignified way but in recent decades increased inequality and polarization have been reshaping the social landscape of Canada's urban areas. This book examines the dimensions and impacts of increased economic inequality and urban socio-spatial polarization since the 1980s. Based on the work of the Neighbourhood Change Research Partnership, an innovative national comparative study of seven major cities, the authors reveal the dynamics of neighbourhood change across the Canadian urban system. While the heart of the book lies in the project's findings from each city, other chapters provide important context. Taken together, they offer important understandings of the depth and the breadth of the problem at hand and signal the urgency for concerted policy responses in the decades to come.

Leveraging Mega-Event Legacies Jonathan Grix, 2018-10-11 This is a multi-disciplinary contribution to the burgeoning literature on and around mega-events in general and sports mega-events in particular. The volume is not specifically about mega-events or their management but rather how such events act as a lens through which a number of important and critical questions about the decisions to host the host nation, its society, and the politics of culture, sport, and leisure more broadly can be dealt with. In doing so, this book seeks to build on and out from initial work on sports mega-events by acknowledging the major shift towards emerging states awarded such events since 2006 and incorporating the latest advances in research that have taken place in recent years. For example, debates about what constitutes a mega-event, what is meant by a legacy, what is soft power, and so on are dealt with from a team of leading academics from a variety of academic disciplines. This book was previously published as a special issue of *Leisure Studies*.

Urban Sociology William G. Flanagan, 2010-01-16 The fifth edition of this text presents a balanced review of the ecological arguments that the urban arena produces unique experiential and urban-based cultural effects while exploring the broader political and economic contexts that produce and modify the urban environment. In addition to examining the urban dimensions of such topics as community formation and continuity, minority and majority dynamics, ethnic experience, poverty, power, and crime, it provides an analysis of the spatial distribution of population and resources with regard to the metropolitanization of the urban form and the interaction between urban concentration and development and underdevelopment. From a first chapter that begins with a discussion of some of the more micrological features of the urban experience, the text focuses on the significance of the more macrological cultural, social, organizational, and political dimensions of urban change in an historical span that includes the first cities and concludes with an exploration of the implications of cyberspace, transnationalism, and global terrorism for the future of urban sociology. While the work focuses primarily on the North American case, its analytical and integrated discussion makes it applicable to urban societies in general.

Urban Neighborhoods in a New Era Clarence N. Stone, Robert P. Stoker, 2015-09-18 For decades North American cities racked by deindustrialization and population loss have followed one primary path in their attempts at revitalization a focus on economic growth in downtown and business areas Neighborhoods meanwhile have often been left severely underserved There are however signs of change This collection of studies by a distinguished group of political scientists and urban planning scholars offers a rich analysis of the scope potential and ramifications of a shift still in progress Focusing on neighborhoods in six cities Baltimore Chicago Denver Los Angeles Phoenix and Toronto the authors show how key players including politicians and philanthropic organizations are beginning to see economic growth and neighborhood improvement as complementary goals The heads of universities and hospitals in central locations also find themselves facing newly defined realities adding to the fluidity of a new political landscape even as structural inequalities exert a continuing influence While not denying the hurdles that community revitalization still faces the contributors ultimately put forth a strong case that a more hospitable local milieu can be created for making neighborhood policy In examining the course of experiences from an earlier period of redevelopment to the present postindustrial city this book opens a window on a complex process of political change and possibility for reform

Making Knowledge Count Peter Harries-Jones, 1991 Largely due to the impact of human rights legislation especially in Canada the radical dissent of the 1960s has been replaced by the more co operative framework of social advocacy Political activity is no longer necessarily radical or rooted in social class but instead expresses broad themes of cultural aspiration Consequently social activists and social scientists need a new understanding of the role of dissent in society Peter Harries Jones and the contributing authors provide that understanding in Making Knowledge Count
