more than 20 years readers have delighted in Charles Petzold's illuminating story of the secret inner life of computers and now he has revised it for this new age of computing. Cleverly illustrated and easy to understand, this is the book that cracks the mystery. You'll discover what flashlights, black cats, seesaws, and the ride of Paul Revere can teach you about computing and how human ingenuity and our compulsion to communicate have shaped every electronic device we use. This new expanded edition explores more deeply the bit by bit and gate by gate construction of the heart of every smart device: the central processing unit that combines the simplest of basic operations to perform the most complex of feats. Petzold's companion website, CodeHiddenLanguage.com, uses animated graphics of key circuits in the book to make computers even easier to comprehend. In addition to substantially revised and updated content, new chapters include Chapter 18: Let's Build a Clock; Chapter 21: The Arithmetic Logic Unit; Chapter 22: Registers and Buses; Chapter 23: CPU Control Signals; Chapter 24: Jumps, Loops, and Calls; Chapter 28: The World Brain. From the simple ticking of clocks to the worldwide hum of the internet, Code reveals the essence of the digital revolution.
