How Do I Tax Thee? Kristin Tate,2018-03-20 We all know the government taxes our income Federal state and local taxes are withheld by employers as are Social Security payments But what about the many other ways the government covertly drains money from our wallets Have you studied your cell phone bill Customers in New York State pay an average of 24 36% in combined taxes on their wireless bills They re also charged for obscure services they didn t ask for and don t understand like a universal service fund fee an FCC compliance fee a line service fee and an emergency services fee These aren t taxes strictly speaking The government imposes these administrative and regulatory costs and your wireless provider passes them along to you What about your cable bill Your power bill Your trash bill The cost of groceries a gallon of gas a cab ride a hotel stay and a movie ticket are all inflated by hidden fees How much of what you pay at the grocery store pump airport or the box office is really an indirect tax In a series of short pointed fact laden humorous chapters Kristin Tate exposes how up to half of your income is siphoned straight into federal state and city government coffers and also where these hidden taxes and fees come from Dust jacket

Taxi! Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy
2007 Noteworthy Book in Industrial Relations and Labor Economics Princeton University Industrial Relations Section Hailed in its first edition as a classic study of New York City's history and people Graham Russell Gao Hodges's *Taxi* is a remarkable evocation of the forgotten history of the taxi driver This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream From labor unrest and racial strife to ruthless competition and political machinations Hodges recounts this history through contemporary news accounts Hollywood films and the words of the cabbies themselves A new preface recalls the author's five years of hacking in New York City in the early 1970s and a new concluding chapter explores the rise of app based ridesharing services with the arrival of companies like Uber and Lyft Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy Hodges argues that the explosion of for hire vehicles in Manhattan reversed decades of environmental anti congestion efforts He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies Whether or not you've ever hailed a cab on Broadway *Taxi* provides a fascinating perspective on New York's most colorful emissaries

Spent behind the Wheel Julietta Hua, Kasturi Ray, 2021-12-21 Exploring professional passenger driving and the gig economy through feminist theories of labor Are taxi drivers in today's era of the ride hail app performing care work akin to domestic and household labor So argue the authors of *Spent behind the Wheel* Bringing together sociological and legal perspectives with feminist theoretical insights Julietta Hua and Kasturi Ray examine the case study of contemporary professional passenger driving in the United States On the one hand they show the rise of the gig economy has brought new attention to the industry of professional passenger driving On the other hand the vulnerabilities that professional drivers experience remain hidden Drawing on interviews with drivers labor organizers and members of licensing commissions as well as case law and other published resources Hua and Ray argue that working for ride hail companies like Uber and Lyft shares similarities with driving for taxi companies in the impact on driver lives Lyft and Uber sell the idea of industry disruption but in fact they entrench long standing modes of extracting the reproductive labor of their drivers for the benefit of consumer lives Reproductive labor conventionally understood as feminized labor is extracted but masked behind the masculinized racialized bodies of drivers Professional driving is thus best understood alongside domestic and other gendered service work as reproductive labors devalued and often demonetized to benefit the national economy *Spent behind the Wheel* is a must for readers interested in critical studies of technological change and the gig economy showing how drivers capacities are drained for the benefit of riders corporations and the maintenance of the racial state

Disruptive Transport William Riggs, 2018-12-07 With the rise of shared and networked vehicles autonomous vehicles and other transportation technologies technological change is outpacing urban planning and policy Whether urban planners and policy makers like it or not these transformations will in turn result in profound changes to streets land use and cities But smarter transportation may not necessarily translate into greater sustainability or equity There are clear opportunities to shape advances in transportation and to harness them to reshape cities and improve the socio economic health of cities and residents There are opportunities to reduce collisions and improve access to healthcare for those who need it most particularly high cost high need individuals at the younger and older ends of the age spectrum There is also potential to connect individuals to jobs and change the way cities organize space and optimize trips To date very little discussion has centered around the job and social implications of this technology Further policy dialogue on future transport has lagged particularly in the arenas of sustainability and social justice Little work has been done on decision making in this high uncertainty environment a deficiency that is concerning given that land use and transportation actions have long and lagging timelines This is one of the first books to explore the impact that emerging transport technology is having on cities and their residents and how policy is needed to shape the cities that we want to have in the future The book contains a selection of contributions based on the most advanced empirical research and case studies for how future transport can be harnessed to improve urban sustainability and justice

Beyond the Valley Ramesh Srinivasan, 2019-10-29 How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it s a one way top down process We re not asked for our input or our opinions only for our data The internet is brought to us by wealthy technologists in Silicon Valley and China It s time Srinivasan argues that we think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them

PV Charging and Storage for Electric Vehicles Pavol Bauer, Gautham Ram Chandra Mouli, 2021-09-02 Electric vehicles are only green as long as the source of electricity is green as well. At the same time, renewable power production suffers from diurnal and seasonal variations, creating the need for energy storage technology. Moreover, overloading and voltage problems are expected in the distributed network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles. The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy. This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles.

Between Public and Private Mobility, 2016-03 TRB Special Report 319 analyzes the ways that innovative transportation services including ridesharing, carsharing, bikesharing, and microtransit are changing mobility for millions of travelers. Such services could reduce congestion and emissions from surface transportation if regulated wisely to encourage concurrent instead of sequential ridesharing. Rapidly growing transportation network companies (TNCs) such as Uber and Lyft, however, are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety, insurance requirements, employment and labor issues, and accessibility and equity. The committee's report offers guidance to state and local officials responsible for policy setting and regulation of for-hire transportation services in each of these areas. The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume, the frequency, and the types of trips they are providing to allow for informed regulation and planning of transportation services provided by publisher.

Driverless Hod Lipson, Melba Kurman, 2016-09-30 When human drivers let intelligent software take the wheel, the beginning of a new era in personal mobility is at hand. Smart, wide-ranging, and nontechnical. Los Angeles Times. Anyone who wants to understand what's coming must read this fascinating book. Martin Ford, New York Times bestselling author of *Rise of the Robots*. In the year 2014, Google fired a shot heard all the way to Detroit: Google's newest driverless car had no steering wheel and no brakes. The message was clear: cars of the future will be born fully autonomous, with no human driver needed. In the coming decade, self-driving cars will hit the streets, rearranging established industries and reshaping cities, giving us new choices in where we live and how we work and play. In this book, Hod Lipson and Melba Kurman offer readers insight into the risks and benefits of driverless cars and a lucid and engaging explanation of the enabling technology. Recent advances in software and robotics are toppling long-standing technological barriers that for decades have confined self-driving cars to the realm of fantasy. A new kind of artificial intelligence software called deep learning gives cars rapid and accurate visual perception. Human drivers can relax and take their eyes off the road. When human drivers let intelligent software take the wheel, driverless cars will offer billions of people all over the world a safer, cleaner, and more convenient mode of transportation. Although the technology is nearly ready, car companies and policy makers may not be. The authors make a compelling case for why government, industry, and consumers need to work together to make the development of driverless cars our society's next Apollo moment.

The Big Thirst Charles Fishman, 2011-04-12 Praised as an entertaining and torrential flow of a book by Nature magazine The Big Thirst is a startling examination of the passing of the golden age of water and the shocking facts about how water scarcity will soon be a major factor in our lives The water coming out of your kitchen tap is four billion years old and might well have been sipped by a Tyrannosaurus rex Rather than only three states of water liquid ice and vapor there is a fourth molecular water fused into rock 400 miles deep in the Earth and that's where most of the planet's water is found Unlike most precious resources water cannot be used up it can always be made clean enough again to drink indeed water can be made so clean that it's toxic Water is the most vital substance in our lives but also more amazing and mysterious than we appreciate As Charles Fishman brings vibrantly to life in this surprising and mind changing narrative water runs our world in a host of awe inspiring ways yet we take it completely for granted But the era of easy water is over Bringing readers on a lively and fascinating journey from the wet moons of Saturn to the water obsessed hotels of Las Vegas where dolphins swim in the desert and from a rice farm in the parched Australian outback to a high tech IBM plant that makes an exotic breed of pure water found nowhere in nature Fishman vividly shows that we've already left behind a century long golden age when water was thoughtlessly abundant free and safe and entered a new era of high stakes water In 2008 Atlanta came within ninety days of running entirely out of clean water California is in a desperate battle to hold off a water catastrophe And in the last five years Australia nearly ran out of water and had to scramble to reinvent the country's entire water system But as dramatic as the challenges are the deeper truth Fishman reveals is that there is no good reason for us to be overtaken by a global water crisis We have more than enough water We just don't think about it or use it smartly The Big Thirst brilliantly explores our strange and complex relationship to water We delight in watching waves roll in from the ocean we take great comfort from sliding into a hot bath and we will pay a thousand times the price of tap water to drink our preferred brand of the bottled version We love water but at the moment we don't appreciate it or respect it Just as we've begun to reimagine our relationship to food a change that is driving the growth of the organic and local food movements we must also rethink how we approach and use water The good news is that we can As Fishman shows a host of advances are under way from the simplicity of harvesting rainwater to the brilliant innovations devised by companies such as IBM GE and Royal Caribbean that are making impressive breakthroughs in water productivity Knowing what to do is not the problem Ultimately the hardest part is changing our water consciousness As Charles Fishman writes Many civilizations have been crippled or destroyed by an inability to understand water or manage it We have a huge advantage over the generations of people who have come before us because we can understand water and we can use it smartly The Big Thirst will forever change the way we think about water about our essential relationship to it and about the creativity we can bring to ensuring that we'll always have plenty of it
