The Future of the Public's Health in the 21st Century Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Assuring the Health of the Public in the 21st Century, 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010 and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses the need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system, the roles of nongovernment actors such as academia, business, local communities, and the media, can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy makers and practitioners, business and community leaders, health advocates, educators, and journalists.

Unequal Treatment Institute of Medicine, Board on Health Sciences Policy, Committee on Understanding and Eliminating Racial and Ethnic Disparities in Health Care, 2009-02-06 Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene. *Unequal Treatment* offers recommendations for improvements in medical care, financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students, as well as advocates for people of color.

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health Only part of an individual's health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways

Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome

Integrating Social Care into the Delivery of Health Care National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Integrating Social Needs Care into the Delivery of Health Care to Improve the Nation's Health, 2020-01-30

Integrating Social Care into the Delivery of Health Care Moving Upstream to Improve the Nation's Health was released in September 2019 before the World Health Organization declared COVID 19 a global pandemic in March 2020 Improving social conditions remains critical to improving health outcomes and integrating social care into health care delivery is more relevant than ever in the context of the pandemic and increased strains placed on the U S health care system The report and its related products ultimately aim to help improve health and health equity during COVID 19 and beyond The consistent and compelling evidence on how social determinants shape health has led to a growing recognition throughout the health care sector that improving health and health equity is likely to depend at least in part on mitigating adverse social determinants This recognition has been bolstered by a shift in the health care sector towards value based payment which incentivizes improved health outcomes for persons and populations rather than service delivery alone The combined result of these changes has been a growing emphasis on health care systems addressing patients social risk factors and social needs with the aim of improving health outcomes This may involve health care systems linking individual patients with government and community social services but important questions need to be answered

about when and how health care systems should integrate social care into their practices and what kinds of infrastructure are required to facilitate such activities Integrating Social Care into the Delivery of Health Care Moving Upstream to Improve the Nation's Health examines the potential for integrating services addressing social needs and the social determinants of health into the delivery of health care to achieve better health outcomes This report assesses approaches to social care integration currently being taken by health care providers and systems and new or emerging approaches and opportunities current roles in such integration by different disciplines and organizations and new or emerging roles and types of providers and current and emerging efforts to design health care systems to improve the nation's health and reduce health inequities
