**Confidential Documents** United States. Army Air Forces,1944 *Making Jet Engines in World War II* Hermione Giffard,2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With Making Jet Engines in World War II Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war s end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard s work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product

**Munitions Industry: September 4-6, 1934. Electric Boat Co** United States. Congress. Senate. Special Committee to Investigate the Munitions Industry, 1934 [The BMW 5 Series and X5](#) Marc Cranswick, 2014-01-10 BMW is a company associated with motoring firsts The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972 As BMW's middle child the 5 series has drawn features from the company's smallest and largest models establishing a reputation for performance and practicality through multiple generations This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5 Specific mechanical electronic and cosmetic changes are described including the time of and reasons for their introduction Several aspects of BMW's corporate history and technically related models such as the 6 series are also described as are aftermarket modifications by Alpina Hartge and other specialist BMW tuners and speed shops The book includes more than 200 photographs *Automotive Industries, the Automobile*, 1922

climate change humanity faces unprecedented challenges that threaten our very existence The essential tool that will enable humanity to find the best way forward is defined in *Framers* by internationally renowned authors Kenneth Cukier Viktor Mayer Sch nberger and Francis de V ricourt To frame is to make a mental model that enables us to make sense of new situations Frames guide the decisions we make and the results we attain People have long focused on traits like memory and reasoning leaving framing all but ignored But with computers becoming better at some of those cognitive tasks framing stands out as a critical function and only humans can do it This book is the first guide to mastering this human ability Illustrating their case with compelling examples and the latest research authors Cukier Mayer Sch nberger and de V ricourt examine Why advice to think outside the box is useless How Spotify beat Apple by reframing music as an experience How the MeToo twitter hashtag reframed the perception of sexual assault The disaster of framing Covid 19 as equivalent to seasonal flu and how framing it akin to SARS delivered New Zealand from the pandemic *Framers* shows how framing is not just a way to improve how we make decisions in the era of algorithms but why it will be a matter of survival for humanity in a time of societal upheaval and machine prosperity *Air Service Information Circular* ,1921 **Powering the Luftwaffe** Jason R. Wisniewski,2013-04 Aviation technology progressed by leaps and bounds during the late 1930s and early 1940s Although much of this was due to advances in airframe design much less appreciated is the role of aero engine development This book focuses on this aspect particularly German piston aero engine design and development which has been generally under researched and under published compared to Allied piston aero engines It covers key piston aero engines such as those produced by Daimler Benz BMW and Junkers as well as less well appreciated engines such as those produced by Siemens Argus and Hirth It also covers turbojets and rockets particularly the Junkers Jumo 004 and Walter 109 509 that powered the infamous Messerschmitt Me 262 and Me 163 jet and rocket fighters Finally the book concludes with tables comparing Allied and German piston engines a glossary of key terms and a bibliography **The Report: Egypt 2016** Oxford Business Group,2016-01-13 The country s economic strengths include its large domestic market diversified economic base favourable trade relations with major partners such as the EU and geographic location As Egypt continues to rebuild its economy it faces a number of risks External challenges include regional unrest and a slowdown in exports due to muted global growth although the nation s limited exposure to Asian markets lends it some degree of protection The possibility of unrest also features in the domestic risk matrix and security remains a national concern Nevertheless Egypt s economy has continued to expand with the IMF forecasting GDP growth of roughly 4% for 2015 and 4.4% for 2016 **Motor Cycling and Motoring** ,1987
