**Cradle to Cradle** William McDonough, Michael Braungart, 2010-03-01 A manifesto for a radically different philosophy and practice of manufacture and environmentalism Reduce reuse recycle urge environmentalists in other words do more with less in order to minimize damage But as this provocative visionary book argues this approach perpetuates a one way cradle to grave manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste much of it toxic Why not challenge the notion that human industry must inevitably damage the natural world In fact why not take nature itself as our model A tree produces thousands of blossoms in order to create another tree yet we do not consider its abundance wasteful but safe beautiful and highly effective hence waste equals food is the first principle the book sets forth Products might be designed so that after their useful life they provide nourishment for something new either as biological nutrients that safely re enter the environment or as technical nutrients that circulate within closed loop industrial cycles without being downcycled into low grade uses as most recyclables now are Elaborating their principles from experience re designing everything from carpeting to corporate campuses William McDonough and Michael Braungart make an exciting and viable case for change
