The CIPP Evaluation Model May 10 2022 The
authoritative presentation of a leading evaluation
approach, this book describes the CIPP (Context,
Input, Process, and Product) Model's origin,
concepts, and procedures. Unlike many models,
CIPP provides for feedback throughout a program.
Richly illustrated with evaluation cases, the book
covers methods for engaging stakeholders;
designing, budgeting, and contracting evaluations;
collecting, analyzing, and reporting information;
and conducting metaevaluations. User-friendly
features include 26 reproducible checklists and
forms and references to relevant computer
programs. Purchasers get access to a companion
website where they can download and print the

reproducible tools as well as supplementary materials, including the CIPP Evaluation Model Checklist. User-Friendly Features *Introduction boxes providing an overview of each chapter. *Within-chapter recaps of key concepts. *End-of-chapter review questions and exercises. *End-of-book glossary. *Appendix listing hundreds of CIPP evaluations across disciplines.

Evaluating and Assessing Tools in the Digital Swamp Aug 25 2023 Discover a powerful tool for navigating the ever-expanding digital swamp. The Digital Swamp Index will help educators wade through digital innovations in order to uncover tools that truly accelerate student achievement. Explore how to use the index to effectively implement technology and address the revolution occurring in education, which is generating a new nature of learning.

Who's Your Source? Dec 17 2022 While students today have access to more sources of information than ever before, they are not necessarily equipped to make informed judgments about those sources. Teaching students to evaluate sources has become even more challenging in the last year, as issues regarding fake news and “alternative facts” have become a heated matter in conversations taking place in the public sphere. The book will present students with a set of tools that they can use to evaluate any source that they encounter. In

addition to learning how to use sources in their writing, students who read *Who's Your Source?* will become more savvy consumers of the sources they encounter in their daily lives.

Evaluating for Excellence Aug 13 2022

Evaluating Educational Interventions Jan 06 2022

Introduction to design and analysis for educational intervention -- The nuts and bolts of single-case design -- The classic A-B-A-B design -- Complex single-case designs -- Visual analysis and interpretation strategies for single-case design -- Advanced empirical analyses of single-case data in practice and research -- Brief experimental analysis -- Single-case design for research purposes -- A response-to-intervention model incorporating experimental design.

Teacher Self-Evaluation Dec 05 2021 In response to the emerging need to develop teachers as professionals who evaluate their own work, this book presents the foundations of self-evaluation as well as self-evaluation models and tools that are likely to help educational practitioners to evaluate their own teaching, and thus raise the level of their professional functioning. The book is intended to serve several groups: student teachers whose socialization into the teaching profession should include the perception of self-evaluation as an inherent part of teaching; the student teachers' supervisors who are expected to help in developing

the knowledge and skills that are needed for purposes of self-evaluation; and teachers, school principals, and university instructors in departments of teacher education, who are interested in teacher's growth and in the development of teaching as a profession.

Evaluation Beyond Exams in Nursing Education
Jun 10 2022 Helps educators to design assignments and rigorous rubrics that truly measure student learning objectives The ability of students to pass an examination does not necessarily reflect or guarantee their ability to apply knowledge in practice, nor are traditional exams a sufficient means to evaluate all learning objectives. Written for both new and seasoned nurse educators, this book is unique in its provision of rigorous rubrics that fully take into account learning objectives and the teachingñlearning process, and promote objective grading. It examines a variety of time-tested, alternative evaluation methods, discusses how to design them, and includes best practices for using them. The book provides an overview of how evaluation and rubrics play an integral part within the larger nursing education teachingñlearning process. It helps educators clearly define learning objectives and desired outcomes, and how to evaluate them. The book describes how to formulate a variety of teaching strategies, design effective assignments, and examine in detail

specific evaluation methods including best practices for their use and exemplar analytic scoring rubrics. Also available are detailed, modifiable grading rubric templates for each assignment presented. Evaluation methods covered include papers, presentations, participation, discussion boards, concept maps, case studies, reflective journals, and portfolios. The book will assist both new and seasoned nurse educators in their quest to graduate competent, safe nurses at all levels of nursing education. Key Features: Provides rigorous, modifiable rubrics for learning objective grading Includes time-tested alternative evaluation methods Describes best practices for designing a variety of teaching-learning evaluation tools Includes guidelines for writing clear assignment descriptions Discusses papers, presentations, concept maps, case studies, portfolios, and more

Evaluating Faculty Performance Oct 03 2021

Written by experts in teaching and administration, this guide offers practical, research-based information for faculty members and administrators in search of new approaches for assessing and improving faculty potential. By recognizing that faculty evaluation can be a difficult, time-consuming, and costly process, the authors of *Evaluating Faculty Performance* have distilled existing evaluation practices into useful

recommendations for strengthening the overall system. Offering numerous suggestions for improving evaluation methods, assessing program weaknesses, and avoiding common problems, the book Examines compelling reasons for developing effective and systematic faculty assessment processes Discusses how to create a climate for positive change by favoring performance counseling over performance evaluation Identifies the essential elements and best practices in assessment, while also revealing what not to do in evaluating performance Explains the value of the professional portfolio in assessment teaching, and offers advice on how to complete a portfolio Outlines key issues, dangers, and benchmarks for success in straightforward language Included are field-tested forms and checklists that can be used to measure faculty performance in teaching, research, and service. The suggestions for improving faculty assessment are clear and practicable—sensible advice for strengthening a process that is of increasing importance in higher education.

Evaluating Research Articles from Start to Finish

Sep 25 2023 Describes how to critique various types of study including: case studies, surveys, correlation studies, regression analysis studies, factor-analytic studies, discriminant analysis studies, factorial studies, and quasi-experimental studies.

Evaluating School Programs Jul 12 2022 This updated edition of the bestseller features a five-step NCLB-based process that demonstrates how skillfully administered annual program evaluations result in lasting educational benefits.

Changing Practices in Evaluating Teaching Jun 30 2021 Over recent decades, the evaluation of teaching has undergone dramatic change. In accessible language and supportive detail, *Changing Practices in Evaluating Teaching* provides not only a cogent overview of these changes but also reflects on current developments to present several useful strategies for implementing new tools and methods in the evaluation of teaching. The authors are all prominent educators who have performed seminal work in the improvement of teaching evaluation. Written for university and college administrators as well as faculty, this book is a complete guidebook that supplies a wealth of case studies, examples, tables, Web sites, and exhibits that further enhance its utility. It explains how to Gain genuine faculty and administrative support Avoid common weaknesses in teaching evaluation by students, peers, and self Evaluate teaching by examining student learning Successfully combine disparate sources of data Establish a climate conducive to evaluation How to structure and use classroom visits, rating forms, electronic classroom

assessment, and teaching portfolios Changing Practices in Evaluating Teaching makes evident the compelling reasons why colleges and universities must institute fair teaching evaluation systems, and explains how to do so. With a notable focus on improving student learning, this book offers readers the kind of research-based and ready-to-use information required to foster truly effective and equitable teaching evaluation at their institutions.

Web Wisdom Jun 22 2023 Web Wisdom is an essential reference for anyone needing to evaluate or establish information quality on the World Wide Web. The book includes easy to use checklists for step-by-step quality evaluations of virtually any Web page. The checklists can also be used by Web authors to help them ensure quality information on their pages. In addition, Web Wisdom addresses other important issues, such as understanding the ways that advertising and sponsorship may affect the quality of Web information. It features: * a detailed discussion of the items involved in evaluating Web information; * checklists tailored to the creation and evaluation of specific Web page types (advocacy, business, informational, news, personal, entertainment); * over 40 screen captures illustrating the principles presented in the book; * discussion of copyright issues and meta tags; and * a glossary of terms and bibliography.

Evaluating Impact May 22 2023 This practical book will help you to create positive change. It is a clearly written resource that breaks down the evaluation process into seven easy steps.

Evaluating Impact uses a common-sense approach to conducting data-driven evaluations that are simple and efficient and deliver the improved and measurable performance you want.

Evaluating Health Promotion Programs Feb 04 2022 Part II deals with study designs, the techniques to determine sample selection and size, writing questionnaires, constructing scales, and managing data. Part III uses data from a national campaign to illustrate methods for impact evaluation, including basic and advanced statistical analysis."--BOOK JACKET.

Evaluating Human Services Aug 01 2021 Evaluating Human Services: A Practical Approach for the Human Service Professional, enables students to learn the skills of evaluation through practical application and analysis - from the simple to the complex. It is designed to equip the front-line human service practitioner with the ability to evaluate services in a practical step-by-step format. For, it covers both quantitative and qualitative research methods, includes all the essential concepts enumerated in social work accreditation standards, and addresses cultural competence in regard to research. In addition, while the process of

evaluation research remains the book's focus, all essential concepts of research are included - and remain centered on competencies, rather than broad-based abstractions. Therefore, the model of this text is both developmental and experiential. Not only does it provide a clear progression from simple to more complex concepts and tasks, it also calls upon the learner to apply their research.

**Revisiting Truth, Beauty, and Justice:
Evaluating With Validity in the 21st Century**

Mar 20 2023 This issue discusses ways of constructing, organizing, and managing arguments for evaluation. Not focused solely on the logic of evaluation or predictive validity, it discusses the various elements needed to construct evaluation arguments that are compelling and influential by virtue of the truth, beauty, and justice they express. Through exposition, original research, critical reflection, and application to case examples, the authors present tools, perspectives, and guides to help evaluators navigate the complex contexts of evaluation in the 21st century. This is the 142nd issue in the New Directions for Evaluation series from Jossey-Bass. It is an official publication of the American Evaluation Association.

Evaluating Public and Community Health Programs Nov 27 2023 A practical introduction to participatory program evaluation Evaluating Public and Community Health Programs provides a

comprehensive introduction to the theory and practice of evaluation, with a participatory model that brings stakeholders together for the good of the program. Linking community assessment, program implementation, and program evaluation, this book emphasizes practical, ongoing evaluation strategies that connect theory with application. This updated second edition includes new discussion on planning policy change programs using logic models and theory of change, plus expanded coverage of processes, outcomes, data collection, and more. Each chapter includes classroom activities and group discussion prompts, and the companion website provides worksheets, lecture slides, and a test bank for instructors. Mini cases help illustrate the real-world applications of the methods described, and expanded case studies allow students to dig deeper into practice and apply what they've learned. Accurate and effective evaluation is the key to a successful program. This book provides a thorough introduction to all aspects of this critical function, with a wealth of opportunities to apply new concepts. Learn evaluation strategies that involve all program stakeholders Link theory to practice with new mini cases and examples Understand the uses, processes, and approaches to evaluation Discover how ongoing evaluation increases program effectiveness Public and community health

programs are a vital part of our social infrastructure, and the more effective they are, the more people they can serve. Proper planning is important, but continued evaluation is what keeps a program on track for the long term. Evaluating Public and Community Health Programs provides clear instruction and insightful discussion on the many facets of evaluation, with a central focus on real-world service.

Evaluating America's Teachers May 29 2021

When teacher evaluations are fair, everyone wins. Poor evaluation systems don't just hurt teachers—they hurt students, too. That's why America can't afford to wait for the teacher-evaluation problem to be solved. To provide balanced, accurate, and rigorous evaluations that take into account each teacher's particular circumstances, only one system can work: evidence-governed collegial judgment. This book includes: A discussion of common evaluation systems, including testing, value-added models, and observations
Analysis of federal guidelines and state responses
Action steps teachers and school leaders can take to influence policy
A clear rationale and strategies for implementing a teacher evaluation model based on human judgment

Strategies for Evaluation Jul 24 2023 Introduces strategies for evaluation, including the use of comparisons and rankings, prioritization, and

reliability.

Evaluating Research in Academic Journals Dec 29 2023 Evaluating Research in Academic Journals is a guide for students who are learning how to evaluate reports of empirical research published in academic journals. It breaks down the process of evaluating a journal article into easy-to-understand steps, and emphasizes the practical aspects of evaluating research - not just how to apply a list of technical terms from textbooks. The book avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even when it has serious methodological flaws. Students learn when and why certain types of flaws may be tolerated, and why evaluation should not be performed mechanically. Each chapter is organized around evaluation questions. For each question, there is a concise explanation of how to apply it in the evaluation of research reports. Numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions, and demonstrate actual examples of strong and weak features of published reports. Common-sense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class. New to this edition New chapters on: evaluating mixed methods research evaluating

systematic reviews and meta-analyses program evaluation research Updated chapters and appendices that provide more comprehensive information and recent examples Full new online resources: test bank questions and PowerPoint slides for instructors, and self-test chapter quizzes, further readings and additional journal examples for students.

Impact Evaluation in Practice, Second Edition

Oct 27 2023 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to

evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Evaluating Professional Development Sep 13 2022
This is a practical guide to evaluating professional development programs at five increasing levels of sophistication: participants' reaction to professional development; how much participants learned; evaluating organizational support and change; how participants use their new knowledge and skills; and improvements in student learning.

Understanding and Evaluating Research Nov 03 2021
Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and

uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Evaluation in Action Apr 01 2024 An innovative approach to program evaluation that takes readers behind the scenes of real evaluations and the decisions the evaluators made.

Evaluation and Assessment in Educational Information Technology Feb 16 2023 Choose the right hardware and software for your school! This unique book is the first systematic work on evaluating and assessing educational information technology. Here you'll find specific strategies, best practices, and techniques to help you choose the educational technology that is most appropriate for your institution. Evaluation and Assessment in Educational Information Technology will show you how to measure the effects of information technology on teaching and learning, help you determine the extent of technological integration into the curriculum that is best for your school, and point you toward the most effective ways to teach students and faculty to use new technology.

Evaluation and Assessment in Educational Information Technology presents: a summary of the last ten years of assessment instrument development seven well-validated instruments that gauge attitudes, beliefs, skills, competencies, and technology integration proficiencies two content analysis instruments for analyzing teacher-student interaction patterns in a distance learning setting an examination of the best uses of computerized testing--as opposed to conventional tests, as used in local settings, to meet daily instructional needs, in online delivery programs, in public domain software, and available commercial and shareware options successful pedagogical and assessment strategies for use in online settings a four-dimensional model to assess student learning in instructional technology courses three models for assessing the significance of information technology in education from a teacher's perspective an incisive look at Michigan's newly formed Consortium of Outstanding Achievement in Teaching with Technology (COATT) ways to use electronic portfolios for teaching/learning performance assessment and much more!

Collaborative Approaches to Evaluation Mar 08 2022 Outlining the principles J. Bradley Cousins and colleagues developed to guide collaborative approaches in evaluation, this text provides case studies for how these principles have then been

applied in practice.

RTI Approach to Evaluating Learning Disabilities

Nov 15 2022 From leading authorities, this indispensable work is now in a revised and expanded second edition, presenting state-of-the-art tools and procedures for practitioners. The book shows how to use response to intervention (RTI) to evaluate K-12 students for specific learning disabilities (SLD). The second edition gives increased attention to optimizing the instructional environment in the context of a multi-tiered system of supports (MTSS). Procedures are described for screening at-risk students; using RTI to intensify instruction in reading, writing, and math; identifying SLD; determining eligibility for special education; and planning individualized education programs. Case examples and pointers for practice are woven throughout. In a convenient large-size format, the book includes reproducible tools that can be downloaded and printed for repeated use.

New to This Edition *Incorporates contemporary perspectives on SLD, upgraded procedures for implementing an MTSS, new approaches to measuring RTI, and enhancements in using classroom observations. *Chapter on best practices in academic screening, including important dos and don'ts. *Separate chapters on using RTI for reading, written expression, and mathematics. *Chapter on RTI and special education law,

focusing on what practitioners need to know. This book is in The Guilford Practical Intervention in the Schools Series, edited by Sandra M. Chafouleas.

High Impact Internal Evaluation Feb 29 2024

Today rapidly changing organizations need the best tools for driving high performance, meeting customer needs, measuring outcomes and improving service delivery. This book shows how to effectively use internal evaluation to determine a business or program's effectiveness, efficiency, economy and performance. It combines theory with the author's extensive experience to provide an indispensable resource for novice internal evaluators, experienced evaluation professionals and for managers responsible for evaluating their own programs.

What Counts as Credible Evidence in Applied Research and Evaluation Practice? Feb 24 2021

"What Counts as Credible Evidence in Applied Research and Evaluation Practice? is the first book of its kind to define and place into greater perspective the meaning of evidence for evaluation professionals and applied researchers. Editors Stewart I. Donaldson, Christina A. Christie, and Melvin M. Mark provide observations about the diversity and changing nature of credible evidence, include lessons from their own applied research and evaluation practice, and suggest ways in which practitioners might address the key issues and

challenges of collecting credible evidence." "This book is appropriate for a wide range of courses, including Introduction to Evaluation Research, Research Methods, Evaluation Practice, Program Evaluation, Program Development and Evaluation, and evaluation courses in Social Work, Education, Public Health, and Public Policy."--BOOK JACKET.

Encyclopedia of Evaluation Apr 20 2023 The 'Encyclopedia of Evaluation' recognises the growth of evaluation around the world & highlights all the major contributions to the field. There are over 400 entries organised alphabetically.

Research, Evaluation and Audit Apr 28 2021 Research and evaluation are characterized by similar features that center on the shared objective of answering a question. Although both use similar data collection and analysis methods, the two disciplines diverge again during use and dissemination. Research is intended to increase the body of knowledge on a particular issue; any subjective opinion limits the researcher's credibility. On the other hand, evaluators must balance the need to remain objective and the expectation to make recommendations for stakeholders. Evaluators must determine what information is valuable, what method is best for data collection, how to analyze the data, and how to relay findings to stakeholders. This requires interpretation and a certain level of judgment by

the evaluator that is absent from the role of the traditional researcher. Evaluating the authority, usefulness, and reliability of the information you find is a crucial step in the process of library research. You will need to evaluate each resource you use for research, whether it is an online or print journal article, a website, a book, a newspaper article, or other source that you want to cite. *Research, Evaluation and Audit* considers methods and approaches that are suitable in a library context, making it a useful tool for library professionals and practitioners alike. This book is a thorough introduction to research and evaluation in libraries. A large part of the book is dedicated to a variety of research methods, including historical, descriptive, and experimental methods. Whether student or practitioner, information professionals in all types of libraries can benefit from incorporating research and evaluation into their regular planning activities.

EBOOK: Evaluation May 02 2024 What is evaluation? Why is it important in public health? How can evaluation lead to improved health outcomes? Evaluation and evidence-based practice are core to professional practice within the wider public health field. Practitioners in a range of sectors, including the voluntary sector, are increasingly being held to account for the success of projects and programmes of activity. Conducting

evaluation can be challenging. Furthermore, the move to evidence-based practice demands that practitioners are able to critically interpret published evaluation findings. Evaluation is a readily accessible examination of the key theories and principles underpinning approaches to evaluation. It offers a guide to how these principles can be implemented in practice and provides insights into dealing with some of the real-life challenges and complexities of evaluation, including: Identifying indicators of success
Developing an evaluation plan Ethical issues
Making the most of findings This book is the first in a series on current theories and concepts for those working within the wider field of public health.

High Impact Internal Evaluation Mar 27 2021
Today rapidly changing organizations need the best tools for driving high performance, meeting customer needs, measuring outcomes and improving service delivery. This book shows students and professional evaluators how to effectively use the tools of internal evaluation to determine a business or program's effectiveness, efficiency, economy and performance. The author combines his extensive experience and theory into an indispensable resource for students, novice internal evaluators, experienced evaluation professionals and for managers responsible for evaluating their own programs.

Evaluation in Today's World Jan 18 2023

Recipient of a 2021 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) *Evaluation in Today's World: Respecting Diversity, Improving Quality, and Promoting Usability* is a timely and comprehensive textbook that guides students, practitioners, and users of evaluations in understanding evaluation purposes, theories, methodologies, and challenges within today's sociocultural and political context. Veronica G. Thomas and Patricia B. Campbell include discussions of evaluation history, frameworks, models, types, planning, and methods, through a social justice, diversity, and inclusive lens. The authors focus on ethics in diverse cultural contexts, help readers understand how social problems and programs get politicized and, sometimes, framed through a racialized lens, show how to engage stakeholders in the evaluation process, and communicate results in culturally appropriate ways. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Evaluating with Validity Jun 03 2024 This reissued book is one of the key works that influenced and shaped the contemporary evaluation field. The book developed a new, expanded

conception of the validity of evaluation studies, based on broad criteria of truth, beauty, and justice. It also presented a widely-used typology of evaluation approaches and critiqued these approaches with the validity criteria. Its long term influence is demonstrated by the book, (published in 1980) and criteria being prominently featured in the overall theme for the forthcoming American Evaluation Association's annual conference in November, 2010.

Evaluation and Testing in Nursing Education

Sep 01 2021 Designated a Doody's Core Title!. The second edition of Evaluation and Testing in Nursing Education helps nursing educators measure and evaluate the level of learning that their students receive and aids them in altering their class plans. This award-winning book is the only book in nursing education that focuses entirely on evaluation and testing; explains how to prepare all types of test items; and explores how to assemble, administer, and analyze tests, measurement concepts, grading, and clinical evaluation. Educators will learn the basics of how to plan for classroom testing, analyze test results, write all types of test items, incorporate methods for evaluating critical thinking, evaluate written assignments and clinical performance, and more. In addition, new content on development and evaluation of testing and distance education is

included. Directed toward teachers in nursing education programs and health care agencies, graduate students preparing for teaching roles, and nurses in clinical practice who teach others, this text is an essential resource for all health professionals involved in evaluation, measurement, and testing. This updated edition offers help with the many aspects of being a successful teacher of nursing. In the Second Edition: .: New content on development and evaluation of testing and distance education.; Writing alternate item formats similar to the NCLEX.; Developing tests that prepare students for licensure and certification.; Strategies for evaluating different cognitive levels of learning.; Evaluating written assignments and sample scoring rubrics.; Up-to-the-minute information on testing in distance education environments with a special focus on internet and on-line based testing

Evaluating the Impact of Implementing Evidence-Based Practice Oct 15 2022 The Evidence-Based Nursing Series is co-published with SigmaTheta Tau International (STTI). The series focuses on implementing evidence-based practice in nursing and midwifery and mirrors the *Worldviews on Evidence-Based Nursing*, encompassing clinical practice, administration, research and public policy. Evaluating the Impact of Implementing Evidence-Based Practice considers the importance of approaches to evaluate the implementation of

evidence-based practice. Outcomes of evidence-based practice can be wide ranging and sometimes unexpected. It is therefore important to evaluate the success of any implementation in terms of clinical outcomes, influence on health status, service users and health policy and long-term sustainability, as well as economic impacts. This, the third and final book in the series, looks at how best to identify, evaluate and assess the outcomes of implementation, reflecting a wide range of issues to consider and address when planning and measuring outcomes. An informative, practical resource for an international readership

Providing critical evaluation of models and approaches to measuring outcomes
Explores the importance of measuring successful implementation
Examines outcomes in terms of long-term sustainability
Addresses economic impacts and influence on health policy
Provides practice-based examples
Written by a team of internationally respected authors

[The Critical Assessment of Research](#) Apr 08 2022

This book examines the following factors:
sponsorship of research, control of the dissemination of research, effects of dominant research paradigms, financial interests of authors, publishers, and editors, role of new technologies (for example, Web 2.0). It is widely accepted among researchers and educators that the peer review process, the reputation of the publisher and

examination of the author's credentials are the gold standards for assessing the quality of research and information. However, the traditional gold standards are not sufficient, and the effective evaluation of information requires the consideration of additional factors. Controversies about positive evaluations of new medications that appear in peer-reviewed journals, the financial reports on Enron prior to the revelations that led to its collapse, and obstacles to the publication of research that does not conform to dominant paradigms are just a few examples that indicate the need for a more sophisticated and nuanced approach to evaluating information. Each of the factors is discussed in a factual manner, supported by many examples that illustrate not only the nature of the issues but also their complexity. Practical suggestions for the evaluation of information are an integral part of the text. Highlights frequently overlooked criteria for evaluating research Challenges the assumption that the gold standards for evaluation are sufficient Examines the role of new technologies in evaluating and disseminating research

Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics Jan 30 2024 Economic, academic, and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness.

Administrators face the complex task of developing equitable, predictable ways to evaluate, encourage, and reward good teaching in science, math, engineering, and technology. *Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics* offers a vision for systematic evaluation of teaching practices and academic programs, with recommendations to the various stakeholders in higher education about how to achieve change. What is good undergraduate teaching? This book discusses how to evaluate undergraduate teaching of science, mathematics, engineering, and technology and what characterizes effective teaching in these fields. Why has it been difficult for colleges and universities to address the question of teaching effectiveness? The committee explores the implications of differences between the research and teaching cultures-and how practices in rewarding researchers could be transferred to the teaching enterprise. How should administrators approach the evaluation of individual faculty members? And how should evaluation results be used? The committee discusses methodologies, offers practical guidelines, and points out pitfalls. *Evaluating, and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics* provides a blueprint for institutions ready to build

effective evaluation programs for teaching in science fields.

Evaluating and Valuing in Social Research Jul 04 2024 Much applied research takes place as if complex social problems--and evaluations of interventions to address them--can be dealt with in a purely technical way. In contrast, this groundbreaking book offers an alternative approach that incorporates sustained, systematic reflection about researchers' values, what values research promotes, how decisions about what to value are made and by whom, and how judging the value of social interventions takes place. The authors offer practical and conceptual guidance to help researchers engage meaningfully with value conflicts and refine their capacity to engage in deliberative argumentation. Pedagogical features include a detailed evaluation case, "Bridge to Practice" exercises and annotated resources in most chapters, and an end-of-book glossary.
