The Power of a Man Apr 10 2022 Rick Johnson equips men to be the powerful and influential men God created them to be, as husbands, fathers, and world-changers.

**Power of Position** Jan 08 2022 How biodiversity classification, with its ranking of species, has social and political implications as well as implications for the field of information studies. The idea that species live in nature as pure and clear-cut named individuals is a fiction, as scientists well know. According to Robert D. Montoya, classifications are powerful mechanisms and we must better attend to the machinations of power inherent in them, as well as to how the effects of this power proliferate beyond the boundaries of their original intent. We must acknowledge the many ways our classifications are implicated in environmental, ecological, and social justice work—and information specialists must play a role in updating our notions of what it means to classify. In *Power of Position*, Montoya shows how classifications are systems that relate one entity with other entities, requiring those who construct a system to value an entity's relative importance—by way of its position—within a system of other entities. These practices, says Montoya, are important ways of constituting and exerting power.

Classification also has very real-world consequences. An animal classified as protected and endangered, for example, is protected by law. Montoya also discusses the Catalogue of Life, a new kind of composite classification that reconciles many local (“traditional”) taxonomies, forming a unified taxonomic backbone structure for organizing biological data. Finally, he shows how the theories of information studies are applicable to realms far beyond those of biological classification.

*The Power Book* Aug 27 2023 With this inspiring and brightly illustrated

guide to power, learn about the different types of power, what it means to have power, and what you can do with your own power to create positive change in the world, no matter who or how old you are. What makes you the boss of me? What makes a king a king, or a queen a queen? Why can some people vote for their leaders, but other people can't? Does having lots of money make you powerful? Why are there fewer female scientists, leaders, and artists than men in history books? These are things that kids wonder about. The Power Book answers these and other questions in a relatable way for young people, including thought-provoking discussions on challenging topics, like war, bullying, racism, sexism, and homophobia. You will gain an understanding of your place in your family, your school, and the world, and will discover ways in which you can use your own power to shape the future. As you explore the many aspects of power, thinking points pose questions that spark self-reflection and quotes and stories from some of the greatest change-makers--such as Gandhi, Martin Luther King Jr., Emmeline Pankhurst, Rosa Parks, Malala Yousafzai, and Stephen Hawking--provide historical context and inspiration. Find more opportunities for learning at the back with a glossary of terms and suggestions for further reading. Gain a greater understanding of how power works, then learn how to harness it for good with The Power Book.

The Power of Habit Oct 29 2023 NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In *The Power of Habit*, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, *The Power of Habit* contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. *The Power of Habit* is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and hang on to the good.”—Financial Times “A flat-out

great read.”—David Allen, bestselling author of *Getting Things Done: The Art of Stress-Free Productivity* “You’ll never look at yourself, your organization, or your world quite the same way.”—Daniel H. Pink, bestselling author of *Drive* and *A Whole New Mind* “Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change.”—The New York Times Book Review

*The Power of a Positive No* Mar 02 2024 “William Ury brings a marvelous blend of experience, insight, integrity and warmth to his work. In this wonderful book he teaches us how to say No—with grace and effect—so that we might create an even better Yes.” —Jim Collins, author of *Good to Great* No is perhaps the most important and certainly the most powerful word in the language. Every day we find ourselves in situations where we need to say No—to people at work, at home, and in our communities—because No is the word we must use to protect ourselves and to stand up for everything and everyone that matters to us. But as we all know, the wrong No can also destroy what we most value by alienating and angering people. That’s why saying No the right way is crucial. The secret to saying No without destroying relationships lies in the art of the Positive No, a proven technique that anyone can learn. This indispensable book gives you a simple three-step method for saying a Positive No. It will show you how to assert and defend your key interests; how to make your No firm and strong; how to resist the other side’s aggression and manipulation; and how to do all this while still getting to Yes. In the end, the Positive No will help you get not just to any Yes but to the right Yes, the one that truly serves your interests. Based on William Ury’s celebrated Harvard University course for managers and professionals, *The Power of a Positive No* offers concrete advice and practical examples for saying No in virtually any situation. Whether you need to say No to your customer or your coworker, your employee or your CEO, your child or your spouse, you will find in this book the secret to saying No clearly, respectfully, and effectively. In today’s world of high stress and limitless choices, the pressure to give in and say Yes grows greater every day, producing overload and overwork, expanding e-mail and eroding ethics. Never has No been more needed. A Positive No has the power to profoundly transform our lives by enabling us to say Yes to what counts—our own needs, values, and priorities. Understood this way, No is the new Yes. And the Positive No may be the most valuable life skill you’ll ever learn.

**The Power of Experiments** Mar 22 2023 How tech companies like Google, Airbnb, StubHub, and Facebook learn from experiments in our data-driven

world—an excellent primer on experimental and behavioral economics Have you logged into Facebook recently? Searched for something on Google? Chosen a movie on Netflix? If so, you've probably been an unwitting participant in a variety of experiments—also known as randomized controlled trials—designed to test the impact of different online experiences. Once an esoteric tool for academic research, the randomized controlled trial has gone mainstream. No tech company worth its salt (or its share price) would dare make major changes to its platform without first running experiments to understand how they would influence user behavior. In this book, Michael Luca and Max Bazerman explain the importance of experiments for decision making in a data-driven world. Luca and Bazerman describe the central role experiments play in the tech sector, drawing lessons and best practices from the experiences of such companies as StubHub, Alibaba, and Uber. Successful experiments can save companies money—eBay, for example, discovered how to cut \$50 million from its yearly advertising budget—or bring to light something previously ignored, as when Airbnb was forced to confront rampant discrimination by its hosts. Moving beyond tech, Luca and Bazerman consider experimenting for the social good—different ways that governments are using experiments to influence or “nudge” behavior ranging from voter apathy to school absenteeism. Experiments, they argue, are part of any leader's toolkit. With this book, readers can become part of “the experimental revolution.”

**The Power of Pull** Apr 22 2023 How we can effectively address our most pressing challenges in a rapidly changing and increasingly interdependent world.

**Power of the P** Jul 14 2022 Three high school friends become entrepreneurs when they set up and run an illegal strip joint in Gary, Indiana. When the business becomes very successful, the law steps in. Can the three female friends deal with the business, their personal lives, and seamy side of running a strip club?

Share Jesus Without Fear Mar 10 2022 This inspirational tool encourages and enables Christians to share their faith with confidence and God-given assurance.

**The 48 Laws Of Power** Apr 03 2024 THE MILLION COPY INTERNATIONAL BESTSELLER 'If power is your ultimate goal, this is the book you need' The Times Amoral, cunning, ruthless, and instructive, this piercing work distills three thousand years of the history of power into forty-eight well-explicated laws. As attention-grabbing in its design as it is in its

content, this bold volume outlines the laws of power in their unvarnished essence, synthesizing the philosophies of Machiavelli, Sun-tzu, Carl von Clausewitz, and other great thinkers. Some laws require prudence ("Law 1: Never Outshine the Master"), some stealth ("Law 3: Conceal Your Intentions"), and some the total absence of mercy ("Law 15: Crush Your Enemy Totally"), but like it or not, all have applications in real-life situations. Illustrated through the tactics of Queen Elizabeth I, Henry Kissinger, P T Barnum, and other famous figures who have wielded - or been victimised by - power, these laws will fascinate any reader interested in gaining, observing or defending against ultimate control.

The Power of One Jan 20 2023 First with your head and then with your heart ...So says Hoppie Groenewald, boxing champion, to a seven-year-old boy who dreams of being the welterweight champion of the world. For the young Peekay, its a piece of advice he will carry with him thr...

*How Not to Be Wrong* Sep 27 2023 "Witty, compelling, and just plain fun to read . . ." —Evelyn Lamb, Scientific American The Freakonomics of math—a math-world superstar unveils the hidden beauty and logic of the world and puts its power in our hands The math we learn in school can seem like a dull set of rules, laid down by the ancients and not to be questioned. In *How Not to Be Wrong*, Jordan Ellenberg shows us how terribly limiting this view is: Math isn't confined to abstract incidents that never occur in real life, but rather touches everything we do—the whole world is shot through with it. Math allows us to see the hidden structures underneath the messy and chaotic surface of our world. It's a science of not being wrong, hammered out by centuries of hard work and argument. Armed with the tools of mathematics, we can see through to the true meaning of information we take for granted: How early should you get to the airport? What does "public opinion" really represent? Why do tall parents have shorter children? Who really won Florida in 2000? And how likely are you, really, to develop cancer? *How Not to Be Wrong* presents the surprising revelations behind all of these questions and many more, using the mathematician's method of analyzing life and exposing the hard-won insights of the academic community to the layman—minus the jargon. Ellenberg chases mathematical threads through a vast range of time and space, from the everyday to the cosmic, encountering, among other things, baseball, Reaganomics, daring lottery schemes, Voltaire, the replicability crisis in psychology, Italian Renaissance painting, artificial languages, the development of non-Euclidean geometry, the coming obesity apocalypse, Antonin Scalia's views on crime and punishment, the psychology

of slime molds, what Facebook can and can't figure out about you, and the existence of God. Ellenberg pulls from history as well as from the latest theoretical developments to provide those not trained in math with the knowledge they need. Math, as Ellenberg says, is "an atomic-powered prosthesis that you attach to your common sense, vastly multiplying its reach and strength." With the tools of mathematics in hand, you can understand the world in a deeper, more meaningful way. *How Not to Be Wrong* will show you how.

*The Power of a Plant* Dec 19 2022 In *The Power of a Plant*, globally acclaimed teacher and self-proclaimed CEO (Chief Eternal Optimist) Stephen Ritz shows you how, in one of the nation's poorest communities, his students thrive in school and in life by growing, cooking, eating, and sharing the bounty of their green classroom. What if we taught students that they have as much potential as a seed? That in the right conditions, they can grow into something great? These are the questions that Stephen Ritz—who became a teacher more than 30 years ago—sought to answer in 2004 in a South Bronx high school plagued by rampant crime and a dismal graduation rate. After what can only be defined as a cosmic experience when a flower broke up a fight in his classroom, he saw a way to start tackling his school's problems: plants. He flipped his curriculum to integrate gardening as an entry point for all learning and inadvertently created an international phenomenon. As Ritz likes to say, "Fifty thousand pounds of vegetables later, my favorite crop is organically grown citizens who are growing and eating themselves into good health and amazing opportunities." *The Power of a Plant* tells the story of a green teacher from the Bronx who let one idea germinate into a movement and changed his students' lives by learning alongside them. Since greening his curriculum, Ritz has seen near-perfect attendance and graduation rates, dramatically increased passing rates on state exams, and behavioral incidents slashed in half. In the poorest congressional district in America, he has helped create 2,200 local jobs and built farms and gardens while changing landscapes and mindsets for residents, students, and colleagues. Along the way, Ritz lost more than 100 pounds by eating the food that he and his students grow in school. *The Power of a Plant* is his story of hope, resilience, regeneration, and optimism.

**The Power of Dialogue** Feb 06 2022 Exemplifying a fruitful fusion of French and German approaches to social theory, *The Power of Dialogue* transforms Jurgen Habermas's version of critical theory into a new "critical hermeneutics" that builds on both Hans-Georg Gadamer's philosophical

hermeneutics and Michel Foucault's studies of power and discourse. At the book's core is the question of how social power shapes and influences meaning and how the process of interpretation, while implicated in social forms of power, can nevertheless achieve reflective distance and a critique of power. It offers an original perspective on such issues as the impact of prejudice and cultural background on scientific interpretation, the need to understand others without assimilating their otherness, and the "truth" of interpretation.

Power of Three Jun 24 2023 Ayna could predict the future. Cari could find what was lost. Gair thought he was ordinary. The three children of Gest, the chief of Garholt, know the perils of the Moor on which they live. The Dorig, their people's enemies, are cold-blooded, fierce underwater creatures who terrify anyone unlucky enough to happen upon them. The Giants are dangerous and violent. But it's not until their home is invaded that Gair learns of a dying curse that endangers all three peoples of the Moor. A curse that ordinary Gair, with the help of his extraordinary brother and sister, may be able to break, but only at the most dreadful risk to all three, and to the Moor itself.

**The Power of a Praying Parent** Sep 03 2021 Why Leave Your Child's Life to Chance When You Can Give It to God? Bestselling author Stormie Omartian has ignited the prayer lives of millions through her Power of a Praying® series. In this timeless guide written for parents, Stormie shares how you can pray through each stage of your child's life, from early childhood to adulthood. In 32 short, easy-to-read chapters, learn how to put your child's life in God's loving hands as you pray for every part his or her life. You don't have to be a perfect parent. But you do need to be a praying parent. And you can do that. The Harvest Legacy Series For more than 50 years Harvest House Publishers has provided high-quality books that affirm biblical values, helping countless readers grow spiritually strong. The Harvest Legacy series celebrates the lasting influence of select Harvest House titles with deluxe, special-edition releases. These enduring works have collectively impacted millions—and they are sure to inspire readers for years to come!

*The Book of Power* May 24 2023 Power Without Apologies "I believe that the last thing the mature seeker needs in literature or talks today are chin-stroking ideas or 'insights.' The seeker requires power. Power—not force—to see through self-expressive wishes. Force dissipates and dies with its user. True power is generative: it creates and builds." With this trenchant introduction, scholar of esotericism Mitch Horowitz presents some of the

most important and practical works, from history and today, on attaining and wielding ethical power. The Book of Power includes: The Art of War by Sun Tzu, translated by British sinologist Lionel Giles Crystalizing Public Opinion by Edward Bernays The Science of Being Great by Wallace D. Wattles The Power of Sex Transmutation by Mitch Horowitz Your Invisible Power by Geneviève Behrend At Your Command by Neville Goddard The Magic Story by Frederick van Rensselaer Dey The Prince by Niccolò Machiavelli, abridgement based on the translation by Renaissance scholar N.H. Thomson Here is a collection that brings methods and actionable ideas into focus for how to increase your command of life.

**The Power of a Single Number** Dec 31 2023 Widely used since the mid-twentieth century, GDP (gross domestic product) has become the world's most powerful statistical indicator of national development and progress. Practically all governments adhere to the idea that GDP growth is a primary economic target, and while criticism of this measure has grown, neither its champions nor its detractors deny its central importance in our political culture. In *The Power of a Single Number*, Philipp Lepenies recounts the lively history of GDP's political acceptance—and eventual dominance. Locating the origins of GDP measurements in Renaissance England, Lepenies explores the social and political factors that originally hindered its use. It was not until the early 1900s that an ingenuous lone-wolf economist revived and honed GDP's statistical approach. These ideas were then extended by John Maynard Keynes, and a more focused study of national income was born. American economists furthered this work by emphasizing GDP's ties to social well-being, setting the stage for its ascent. GDP finally achieved its singular status during World War II, assuming the importance it retains today. Lepenies's absorbing account helps us understand the personalities and popular events that propelled GDP to supremacy and clarifies current debates over the wisdom of the number's rule.

**The Power of  $q$**  Feb 01 2024 This unique book explores the world of  $q$ , known technically as basic hypergeometric series, and represents the author's personal and life-long study—inspired by Ramanujan—of aspects of this broad topic. While the level of mathematical sophistication is graduated, the book is designed to appeal to advanced undergraduates as well as researchers in the field. The principal aims are to demonstrate the power of the methods and the beauty of the results. The book contains novel proofs of many results in the theory of partitions and the theory of representations, as well as associated identities. Though not specifically designed as a textbook, parts of

it may be presented in course work; it has many suitable exercises. After an introductory chapter, the power of q-series is demonstrated with proofs of Lagrange's four-squares theorem and Gauss's two-squares theorem. Attention then turns to partitions and Ramanujan's partition congruences. Several proofs of these are given throughout the book. Many chapters are devoted to related and other associated topics. One highlight is a simple proof of an identity of Jacobi with application to string theory. On the way, we come across the Rogers–Ramanujan identities and the Rogers–Ramanujan continued fraction, the famous “forty identities” of Ramanujan, and the representation results of Jacobi, Dirichlet and Lorenz, not to mention many other interesting and beautiful results. We also meet a challenge of D.H. Lehmer to give a formula for the number of partitions of a number into four squares, prove a “mysterious” partition theorem of H. Farkas and prove a conjecture of R. Wm. Gosper “which even Erdős couldn't do.” The book concludes with a look at Ramanujan's remarkable tau function.

**The Power of Light** Nov 29 2023 An original investigation into the social and technological history of solar power From the days of Archimedes and Leonardo, the earliest efforts to harness the power of the sun have become the stuff of legend. But it was not until the industrial revolution, with its great demands for fuel, that inventors --like Prometheus carrying fire from Mt. Olympus--began to build machines capable of channeling the sun's rays into usable energy. In *The Power of Light*, solar energy expert Frank Kryza recounts the dramatic saga of solar invention, from its optimistic dawning in the mid-19th century to its impending triumph today. With a fervent passion for his subject, the author introduces solar pioneers such as Auguste Mouchot, whose solar-powered steam engine amazed Napoleon III, and Frank Shuman, whose solar pumping station, in 1911, became the largest and most cost-effective machine prior to the space age. While presenting a thorough and original investigation into this little-known chapter of science history, *The Power of Light* offers a sober meditation on the revolutionary impact technology often has on society.

**The Power of Now** Nov 05 2021 It's no wonder that *The Power of Now* has sold over 16 million copies worldwide and has been translated into over 30 foreign languages. Much more than simple principles and platitudes, the book takes readers on an inspiring spiritual journey to find their true and deepest self and reach the ultimate in personal growth and spirituality: the discovery of truth and light. In the first chapter, Tolle introduces readers to enlightenment and its natural enemy, the mind. He awakens readers to their

role as a creator of pain and shows them how to have a pain-free identity by living fully in the present. The journey is thrilling, and along the way, the author shows how to connect to the indestructible essence of our Being, "the eternal, ever-present One Life beyond the myriad forms of life that are subject to birth and death." Featuring a new preface by the author, this paperback shows that only after regaining awareness of Being, liberated from Mind and intensely in the Now, is there Enlightenment.

The Power of Words May 31 2021 In medieval and early modern Europe, the use of charms was a living practice in all strata of society. The essays in this latest CEU Press publication explore the rich textual tradition of archives, monasteries, and literary sources. The author also discusses texts amassed in folklore archives and ones that are still accessible through field work in many rural areas of Europe.

**The Power of a Half Hour** Mar 29 2021 "The Power of a Half Hour is full of unique, practical, and God-inspired truths to keep your time focused on all that God has called you to do. If you apply these principles...they will bring renewed purpose and inspiration to your life." --Joyce Meyer, Bible teacher and best-selling author "Allow the deep revelations and years of wisdom from this man of God to impart health and life into your faith journey." -- Brian Houston, senior pastor, Hillsong Church Turn your fleeting minutes into defining moments. What can you do in thirty minutes? Have lunch? Watch television? Check Facebook? How about change your life? Why do some people achieve far more than others? We all get the same twenty-four hours in a day, yet a special few seem to have superhuman abilities when it comes to accomplishing great things in life. Tommy Barnett, a proven master at "getting things done," says the key to maximizing your productivity is to make use of small, manageable moments in your day—just thirty minutes at a time. In this remarkably practical book, Tommy shows how to begin a whole new life of fruitfulness. You'll see immediate results in all areas of your life, including your— - Purpose and values - Personal goals - Faith - Character and attitude - Dreams - Career - Relationships - Marriage and family - Church involvement and ministry Why not change time from being your worst enemy to your everlasting friend? It all starts with the amazing things you can do in only a half hour. Through inspiring stories and biblical principles, discover how your downtime can have a major upside. Get going—you don't have a minute to lose!

*A Question of Power* Oct 17 2022 An acclaimed author and celebrated journalist breaks down the history of electricity and the impact of global

energy use on the world and the environment.? Global demand for power is doubling every two decades, but electricity remains one of the most difficult forms of energy to supply and do so reliably. Today, some three billion people live in places where per-capita electricity use is less than what's used by an average American refrigerator. How we close the colossal gap between the electricity rich and the electricity poor will determine our success in addressing issues like women's rights, inequality, and climate change. In *A Question of Power*, veteran journalist Robert Bryce tells the human story of electricity, the world's most important form of energy. Through onsite reporting from India, Iceland, Lebanon, Puerto Rico, New York, and Colorado, he shows how our cities, our money--our very lives--depend on reliable flows of electricity. He highlights the factors needed for successful electrification and explains why so many people are still stuck in the dark. With vivid writing and incisive analysis, he powerfully debunks the notion that our energy needs can be met solely with renewables and demonstrates why--if we are serious about addressing climate change--nuclear energy must play a much bigger role. Electricity has fueled a new epoch in the history of civilization. *A Question of Power* explains how that happened and what it means for our future.

*Truth Has a Power of Its Own* Oct 05 2021 American history told from the bottom up by Howard Zinn himself—and the perfect all-ages introduction to his eye-opening viewpoint, published on Zinn's hundredth birthday *Truth Has a Power of Its Own* is an engrossing collection of conversations with the late Howard Zinn and “an eloquently hopeful introduction for those who haven't yet encountered Zinn's work” (Booklist). Here is an unvarnished, yet ultimately optimistic, tour of American history—told by someone who was often an active participant in it. Viewed through the lens of Zinn's own life as a soldier, historian, and activist and using his paradigm-shifting *A People's History of the United States* as a point of departure, these conversations explore the American Revolution, the Civil War, the labor battles of the nineteenth and twentieth centuries, U.S. imperialism from the Indian Wars to the War on Terrorism, World Wars I and II, the Cold War, and the fight for equality and immigrant rights—all from an unapologetically radical standpoint. Longtime admirers and a new generation of readers alike will be fascinated to learn about Zinn's thought processes, rationale, motivations, and approach to his now-iconic historical work. Zinn's humane (and often humorous) voice—along with his keen moral vision—shine through every one of these lively and thought-provoking conversations. Battles over the

telling of our history still rage across the country, and there's no better person to tell it than Howard Zinn.

**The Power of Showing Up** Jun 05 2024 Parenting isn't easy. Showing up is. Your greatest impact begins right where you are. Now the bestselling authors of *The Whole-Brain Child* and *No-Drama Discipline* explain what this means over the course of childhood. "There is parenting magic in this book."—Michael Thompson, Ph.D., co-author of the *New York Times* bestselling classic *Raising Cain* One of the very best scientific predictors for how any child turns out—in terms of happiness, academic success, leadership skills, and meaningful relationships—is whether at least one adult in their life has consistently shown up for them. In an age of scheduling demands and digital distractions, showing up for your child might sound like a tall order. But as bestselling authors Daniel Siegel and Tina Payne Bryson reassuringly explain, it doesn't take a lot of time, energy, or money. Instead, showing up means offering a quality of presence. And it's simple to provide once you understand the four building blocks of a child's healthy development. Every child needs to feel what Siegel and Bryson call the Four S's: • **Safe:** We can't always insulate a child from injury or avoid doing something that leads to hurt feelings. But when we give a child a sense of safe harbor, she will be able to take the needed risks for growth and change. • **Seen:** Truly seeing a child means we pay attention to his emotions—both positive and negative—and strive to attune to what's happening in his mind beneath his behavior. • **Soothed:** Soothing isn't about providing a life of ease; it's about teaching your child how to cope when life gets hard, and showing him that you'll be there with him along the way. A soothed child knows that he'll never have to suffer alone. • **Secure:** When a child knows she can count on you, time and again, to show up—when you reliably provide safety, focus on seeing her, and soothe her in times of need, she will trust in a feeling of secure attachment. And thrive! Based on the latest brain and attachment research, *The Power of Showing Up* shares stories, scripts, simple strategies, illustrations, and tips for honoring the Four S's effectively in all kinds of situations—when our kids are struggling or when they are enjoying success; when we are consoling, disciplining, or arguing with them; and even when we are apologizing for the times we don't show up for them. Demonstrating that mistakes and missteps are repairable and that it's never too late to mend broken trust, this book is a powerful guide to cultivating your child's healthy emotional landscape.

**The Power of the Heart** Nov 17 2022 With its unprecedented convocation

of eighteen of the world's greatest spiritual thinkers, writers, and scientists, including Maya Angelou, Deepak Chopra, Paulo Coelho, and Eckhart Tolle, this beautifully designed full-color spiritual guide—which ties into a film of the same name—reveals how you can overcome limitations and fulfill your highest potential. Baptist de Pape, a young lawyer, was mired in anxiety and fears about his future when he felt the call to investigate the incredible power of the heart and how it can lead us to our true purpose in life. On a quest that took him around the world, de Pape interviewed eighteen living icons—all on camera—including Isabel Allende, Jane Goodall, Marci Shimoff, Marianne Williamson, and Gary Zukav. Generously sharing their touching personal stories as well as profound guidance, these leaders co-created with de Pape a multidimensional, illuminating portrait of the heart as an inexhaustible source of love and wisdom that far surpasses that of the mind. With exciting spiritual and scientific insights, *The Power of the Heart* presents fascinating evidence that the heart is more than a physical organ. It possesses its own intelligence, capable of transforming your views of money, health, relationships, and success. Mindfulness exercises and contemplations guide you to activate the heart's special powers—including intuition, intention, gratitude, forgiveness, and love. These unforgettable lessons from the world's greatest teachers will inspire you to find your hidden talents, hear your inner voice, and fulfill your highest purpose in life.

**The Power of Presence** Apr 30 2021 Everyone, regardless of position or personality, can strengthen their presence. *The Power of Presence* shows how. When some people speak, everyone listens. When they need commitment to projects, others jump on board. They just seem to have that indescribable “presence”—a subtle magnetic field around them wherever they go that signals authority and authenticity and attracts disciples with ease. Wouldn't it be incredible if doors opened as effortlessly for you? How amazing would it be if you could command the room like they do? You don't have to wonder; you can make it happen! Filled with strategies, exercises, and personal stories from years spent coaching leaders, communications expert Kristi Hedges explains how to: Build relationships based on trust Rid yourself of limiting behaviors Embody the values you are trying to convey Explore how others see you and correct misperceptions Communicate in way that inspire The key is to cultivate the communication aptitude, mental attitude, and unique leadership style needed to connect with and motivate others. Everyone recognizes a commanding presence when they see it, and soon they'll see it in you!

**The Power of the Powerless** May 04 2024 Books of great political insight and novelty always outlive their time of birth and this reissued work, initially published in 1985, is no exception. Written shortly after the formation of Charter 77, the essays in this collection are among the most original and compelling pieces of political writing to have emerged from central and Eastern Europe during the whole of the post-war period. Václav Havel's essay provides the title for the book. It was read by all the contributors who in turn responded to the many questions which Havel raises about the potential power of the powerless. The essays explain the anti-democratic features and limits of Soviet-type totalitarian systems of power. They discuss such concepts as ideology, democracy, civil liberty, law and the state from a perspective which is radically different from that of people living in liberal western democracies. The authors also discuss the prospects for democratic change under totalitarian conditions. Steven Lukes' introduction provides an invaluable political and historical context for these writings. The authors represent a very broad spectrum of democratic opinion, including liberal, conservative and socialist.

**The Power of Half** Aug 03 2021 A true story of making a difference: "What does your family stand for? Read this book—it will change your life" (Daniel H. Pink). It all started when fourteen-year-old Hannah Salwen had a "eureka" moment. Seeing a homeless man in her neighborhood at the same moment when a glistening Mercedes coupe pulled up, she said "You know, Dad, if that man had a less nice car, that man there could have a meal." Until that day, the Salwens had been caught up like so many of us in the classic American dream—providing a good life for their children, accumulating more and more stuff, doing their part but not really feeling it. So when Hannah was stopped in her tracks by this glaring disparity, her parents knew they had to do something. As a family, they made the extraordinary decision to sell their Atlanta mansion, downsize to a house half its size, and give half of the sale price to a worthy charity. What began as an outlandish scheme became a remarkable journey that transported them across the globe and well out of their comfort zone. In the end they learned that they had the power to change a little corner of the world—and found that it changed them, too. "You feel lighter reading this book, as if the heavy weight of house and car and appliances, the need to collect these things to feel safe as a family, are lifted and replaced by something that makes much more sense." —Los Angeles Times

**The Education of an Idealist** Dec 07 2021 A NEW YORK TIMES, WALL

**STREET JOURNAL, AND USA TODAY BESTSELLER** An intimate, powerful, and galvanizing memoir by Pulitzer Prize winner, human rights advocate, and former US Ambassador to the UN Samantha Power. Named one of the best books of the year: The New York Times • National Public Radio • Time • The Economist • The Washington Post • Vanity Fair • Christian Science Monitor • Publishers Weekly • Audible “Her highly personal and reflective memoir . . . is a must-read for anyone who cares about our role in a changing world.”—President Barack Obama Includes an updated afterword Tracing her distinctly American journey from immigrant to war correspondent to presidential Cabinet official, Samantha Power’s acclaimed memoir is a unique blend of suspenseful storytelling, vivid character portraits, and shrewd political insight. After her critiques of US foreign policy caught the eye of Senator Barack Obama, he invited her to work with him on Capitol Hill and then on his presidential campaign. When Obama won the presidency, Power went from being an activist outsider to serving as his human rights adviser and, in 2013, becoming the youngest-ever US Ambassador to the United Nations. Power transports us from her childhood in Dublin to the streets of war-torn Bosnia to the White House Situation Room and the world of high-stakes diplomacy, offering a compelling and deeply honest look at navigating the halls of power while trying to put one’s ideals into practice. Along the way, she lays bare the searing battles and defining moments of her life, shows how she juggled the demands of a 24/7 national security job with raising two young children, and makes the case for how we each can advance the cause of human dignity. This is an unforgettable account of the power of idealism—and of one person’s fierce determination to make a difference. “This is a wonderful book. [...] The interweaving of Power’s personal story, family story, diplomatic history and moral arguments is executed seamlessly and with unblinking honesty.”—THOMAS L. FRIEDMAN, The New York Times Book Review “Truly engrossing...A pleasure to read.”—RACHEL MADDOW “A beautiful memoir about the times we’re living in and the questions we must ask ourselves...I honestly couldn’t put it down.” —CHERYL STRAYED, author of Wild “Power’s compelling memoir provides critically important insights we should all understand as we face some of the most vexing issues of our time.” —BRYAN STEVENSON, author of Just Mercy

**The Power of Zero, Revised and Updated** Feb 18 2023 OVER 300,000 COPIES IN PRINT, WITH A NEW CHAPTER ON THE 2018 TAX CUTS. There's a massive freight train bearing down on the average American

investor, and it's coming in the form of higher taxes. The United States Government has made trillions of dollars in unfunded promises for programs like Social Security and Medicare—and the only way to deliver on these promises is to raise taxes. Some experts have even suggested that tax rates will need to double, just to keep our country solvent. Unfortunately, if you're like most Americans, you've saved the majority of your retirement assets in tax-deferred vehicles like 401(k)s and IRAs. If tax rates go up, how much of your hard-earned money will you really get to keep? In *The Power of Zero*, McKnight provides a concise, step-by-step roadmap on how to get to the 0% tax bracket by the time you retire, effectively eliminating tax rate risk from your retirement picture. Now, in this expanded edition, McKnight has updated the book with a new chapter on the 2017 Tax Cuts and Jobs Act, showing readers how to navigate the new tax law, and how they can extend the life of their retirement savings by taking advantage of it now. The day of reckoning is fast approaching. Are you ready to do what it takes to experience the power of zero?

The Power of Giving Away Power Aug 15 2022 “This book is a breakthrough. It’s beautifully written, perfectly timed and heralds a new way forward. I’m buying a dozen copies to share with friends and colleagues.” - Seth Godin, Founder of altMBA and author of *The Practice* If you let go of hierarchy, chaos will reign...or so many leaders believe. But when leaders find the courage to distribute rather than hoard power, creativity multiplies, trust deepens, and inclusivity expands... and a new kind of order emerges. A few rare leaders have learned to embrace a new organizational shape and mindset: Constellations. Organizations designed as constellations are dynamic and flexible networks of distinct yet interwoven individuals. Each member of the team feels like a singular star and is also connected to others to form something greater. That is how Visa reimaged how we pay for things, how Wikipedia beat the richest company in the world and how Barack Obama and his grassroots team revolutionized political campaigning. These leaders did what most leaders dread – they gave away power. Barzun brilliantly layers lessons across history and industries with his own experiences as an internet entrepreneur, political organizer, and US ambassador to the United Kingdom and Sweden. *The Power of Giving Away Power* shows how the Constellation mindset shines in some of the most impactful organizations and innovations the world has ever known. And it encourages us all to recognize, as Barzun writes, "the power we can create by seeing the power in others" — and making the leap to lead. Together.

**The Power of Home Numbers** Jun 12 2022 THE POWER OF HOME NUMBERS Jesse Kalsi has appeared as a guest on my radio program, Seeing Beyond, many times. His unique method of combining numerology and astrology to help people is always intriguing. Jesses professional and compassionate nature is always welcome on my radio. Bonnie Coleen Host/Producer Seeing Beyond Talk Radio He was a most enjoyable guest and I highly recommend him for radio and television programs. Christine Craft KGO AM 810 Radio San Francisco, California The Power of Home Numbers is a must-read for all who seek a deeper understanding of the meaning of numbers and our everyday connection to them. Lisa K. Crosato Actress and Producer

*Power in Numbers* Feb 26 2021 From rocket scientists to code breakers, “fascinating stories” of women who overcame obstacles, shattered stereotypes, and pursued their passion for math (Notices of the American Mathematical Society). With more than 200 photos and original interviews with several of the amazing women covered, *Power in Numbers: The Rebel Women of Mathematics* is a full-color volume that puts a spotlight on the influence of women on the development of mathematics over the last two millennia. Each biography reveals the life of a different female mathematician, from her childhood and early influences to the challenges she faced and the great achievements she made in spite of them. Learn how: After her father terminated her math lessons, Sofia Kovalevskaya snuck algebra books into her bed to read at night Emmy Noether became an invaluable resource to Albert Einstein while she was in the Navy Native American rocket scientist Mary Golda Ross developed designs for fighter jets and missiles in a top-secret unit Katherine Johnson’s life-or-death calculations at NASA meant that astronauts such as Alan Shepard and John Glenn made it home alive Shakuntala Devi multiplied massive numbers in her head so her family could eat at night Pamela Harris proved her school counselors wrong when they told her she would only succeed as a bilingual secretary Carla Cotwright-Williams began her life in the dangerous streets of South-Central Los Angeles before skyrocketing to a powerful career with the Department of Defense in Washington, DC These women are a diverse group, but their stories have one thing in common: At some point on their journeys, someone believed in them—and made them think the impossible was perhaps not so impossible. “A quick read . . . full of dramatic stories and eye-catching illustrations.” —MAA Reviews “I found myself marveling at the personal anecdotes and quotes throughout the book.” —Notices of the American

Mathematical Society

**A Random Book about the Power of ANYone** Sep 15 2022 You can be greater than you know how to be. In a world where you are pushed to know more, this book will prove that your greatest asset is often not knowing. In a world where you are told it's all in the planning, this book will encourage you to keep your cart ahead of your horse and allow your dreams to lead you. In a world where you are told you need to become someone, this book will show you that you already are someone. The author—the foremost accidental expert on this subject—is Talia Leman. A high school student. Runner in the rain. Science enthusiast. World changer. Random kid. Writing with infectious enthusiasm, humor, and resoluteness, she shares her secrets to being more than you know how to be, including *Don't Line Up Your Ducks*, *Sideways Is a Better Way to Go Forward*, and *Too Many Cooks Is the Right Number*. In this unexpectedly poignant, strikingly honest, and informative guide, Talia Leman shows you how to make room for life's surprises, demonstrating that everyone has what it takes to make a difference for anything that matters to them. *A Random Book about the Power of ANYone* will move you to rethink and reimagine what's possible, one random inspiration, one random idea, one random person at a time.

*The Power of One More* Jul 26 2023 You're one more intentional thought and action away from discovering your best life In *The Power of One More*, renowned keynote speaker and performance expert Ed Mylett draws on 30 years of experience as an entrepreneur and coach to top athletes, entertainers, and business executives to reveal powerful strategies to help you live an extraordinary "one more" life. In *The Power of One More*, you'll: Learn why you're closer to your dreams and goals than you think and why using *The Power of One More* strategies will help you cross the finish line in whatever race you're running Understand the psychology and science of how to use *The Power of One More* in every part of your life to help you solve problems and achieve levels of success you never thought possible Discover time-tested and unique solutions to challenges that will remove the mental roadblocks you've been battling for years Perfect for anyone who wants more bliss, wealth, or better relationships, *The Power of One More* is an indispensable roadmap to realizing and exceeding your personal and professional goals by tapping into the superpowers and gifts you already have inside you.

*The Power of the Zoot* Jul 02 2021 Flamboyant zoot suit culture, with its ties to fashion, jazz and swing music, jitterbug and Lindy Hop dancing, unique

patterns of speech, and even risqué experimentation with gender and sexuality, captivated the country's youth in the 1940s. *The Power of the Zoot* is the first book to give national consideration to this famous phenomenon. Providing a new history of youth culture based on rare, in-depth interviews with former zoot-suiters, Luis Alvarez explores race, region, and the politics of culture in urban America during World War II. He argues that Mexican American and African American youths, along with many nisei and white youths, used popular culture to oppose accepted modes of youthful behavior, the dominance of white middle-class norms, and expectations from within their own communities.

*Power of UN* May 12 2022 When he is given a device that will allow him to "undo" what has happened in the past, Gib Finney is not sure what event from the worst day in his life he should change in order to keep his sister from being hit by a truck.

*The Power of And* Jul 06 2024 The idea that business is only about the money doesn't hold true in the twenty-first century, when companies around the world are giving up traditional distinctions in order to succeed. Yet our expectations for businesses remain under the sway of an outdated worldview that emphasizes profits for shareholders above all else. *The Power of And* offers a new narrative about the nature of business, revealing the focus on responsibility and ethics that unites today's most influential ideas and companies. R. Edward Freeman, Kirsten E. Martin, and Bidhan L. Parmar detail an emerging business model built on five key concepts: prioritizing purpose as well as profits; creating value for stakeholders as well as shareholders; seeing business as embedded in society as well as markets; recognizing people's full humanity as well as their economic interests; and integrating business and ethics into a more holistic model. Drawing on examples across companies, industries, and countries, they show that these values support persevering in hard times and prospering over the long term. Real-world success stories disprove the conventional wisdom that there are unavoidable trade-offs between acting ethically and succeeding financially. *The Power of And* presents a conceptual revolution about what it means for business to be responsible, providing a new story for us to tell in order to help all kinds of companies thrive.
