G.N. Georgano, Bill Munro, 2009-08-18 *The London Taxi* is an iconic image of London transport and society. The unique vehicle is the only one in the world to be specifically designed for hire work in cities and its distinctive turning circle of only 25 feet a direct result of the strict regulations of design stipulated by the Public Carriage Office serves it well for maneuvering through the busy traffic of the capital. Since the introduction of the London taxicab a great variety of taxis have been produced and placed on the city's streets although the market has always been dominated by a few names Austin being the leading taxi manufacturer in the 1930s and for decades after. This album follows the development of the taxi from its early years in the city through to the later models in the post war era. Illustrated throughout with many black and white and color photographs. *The London Taxi* paints an image of the changing lifestyles of Londoners through the context of the growing cab trade and the many different styles of taxi that have served the people of London.

Peeling Back the Mask Miguna Miguna, 2012. *Peeling Back the Mask* is an insider's account from one of the Kenyan Prime Minister's former advisers detailing instances of corruption and fraud at the highest level of Kenyan government. With massive online and media coverage this book has become the spearhead of a national campaign to aspire to a new corruption free Kenya. This remarkable book generated twenty thousand hits on the publisher website within hours of its announcement and Google reports Miguna Miguna is in the top five subjects searched online in Africa.

Suspension Geometry and Computation John C. Dixon, 2009-10-27. *Revealing suspension geometry design methods in unique detail*. John Dixon shows how suspension properties such as bump steer roll steer bump camber compliance steer and roll centres are analysed and controlled by the professional engineer. He emphasizes the physical understanding of suspension parameters in three dimensions and methods of their calculation using examples programs and discussion of computational problems. The analytical and design approach taken is a combination of qualitative explanation for physical understanding with algebraic analysis of linear and non linear coefficients and detailed discussion of computer simulations and related programming methods. Includes a detailed and comprehensive history of suspension and steering system design fully illustrated with a wealth of diagrams. Explains suspension characteristics and suspension geometry coefficients providing a unique and in depth understanding of suspension design not found elsewhere. Describes how to obtain desired coefficients and the limitations of particular suspension types with essential information for suspension designers chassis technicians and anyone else with an interest in suspension characteristics and vehicle dynamics. Discusses the use of computers in suspension geometry analysis with programming techniques and examples of suspension solution including advanced discussion of three dimensional computational geometry applied to suspension design. Explains in detail the direct and iterative solutions of suspension geometry.

The Theater Samuel Gover Winchester, 1840. *FX4 Black Cab* Bill Munro, 2012-05-01. From the origins of the Hackney carriage the author follows the evolution of the taxi through early 20th century designs by William Beardmore of Glasgow to the dominance of later vehicles commissioned from Austin by Mann and Overton in 1929. Later designs follow a distinct lineage and despite continual improvement of the design
