Recover from system startup failures Use and troubleshoot Windows Networking Effectively prepare yourself for exam day CD Features Practice Exams! Ready to test your skills? Want to find out if you're ready for test day? Use the practice tests supplied on this CD to help prepare you for the big day. Test yourself, and then check your answers. Coupled with the in-depth material in the book, this is the ultimate one-two A+ study preparation package! Charles J. Brooks is currently co-owner and vice president of Educational Technologies Group Inc., as well as co-owner of eITPrep LLP, an online training company. He is in charge of research and product development at both organizations. A former electronics instructor and technical writer with the National Education Corporation, Charles taught and wrote on post-secondary EET curriculum, including introductory electronics, transistor theory, linear integrated circuits, basic digital theory, industrial electronics, microprocessors, and computer peripherals. Charles has authored several books, including the first five editions of A+ Certification Training Guide, The Complete Introductory Computer Course, and IBM PC Peripheral Troubleshooting and Repair. He also writes about networking, residential technology integration, and convergence. From basic printer concepts and purchasing analysis to networking, maintenance, and troubleshooting, this is the ultimate printer information resource. Includes practical hints, cautions, troubleshooting tips, a glossary of printer terms, a vendor list, and font vendor information. Designed as a technician-level reference, this pocket-sized book covers all the essential information needed to diagnose and repair computer printer problems. There is a massive installed base of printers and this serves as a handy, portable reference for all types of impact, ink-jet, and laser printers. Every 3rd issue is a quarterly cumulation. This book is the companion volume to Rethinking Innateness: A Connectionist Perspective on Development (The MIT Press, 1996), which proposed a new theoretical framework to answer the question "What does it mean to say that a behavior is innate?" The new work provides concrete illustrations—in the form of computer simulations—of properties of connectionist models that are particularly relevant to cognitive development. This enables the reader to pursue in depth some of the practical and empirical issues raised in the first book. The authors' larger goal is to demonstrate the usefulness of neural network modeling as a research methodology. The book comes with a complete software package, including demonstration projects, for running neural network simulations on both Macintosh and Windows 95. It also contains a series of exercises in the use of the neural network simulator provided with the book. The software is also available to run on a variety of UNIX platforms. Black Lightning shows laser printer users how to save hundreds of dollars in supplies, repair, maintenance and upgrades; how to get the best quality and productivity out of their printers; and how to push the limits of their printers with special techniques for creating negatives, overheads, separations, and iron-on transfers. Fast Accurate Bids is the smart choice for both large and small commercial printers, in-house screen printers, embroiderers, and other apparel decorators. This easy-to-use Windows PC software program generates customer quotes quickly, accurately, and

consistently. It also lets apparel decorators get a better understanding of their costs and pricing. The Fast Accurate Bids User's Manual describes how to create customer bids. It provides detailed information on how to approach the bid process and gives lists of things to note when using the various features the software provides. PostScript Language Reference, Third Edition is the official reference for the PostScript language from Adobe Systems Incorporated. PostScript is a de facto standard for page description-how text, images, & graphics will appear on a printed page or screen display. This book offers the most comprehensive coverage of the entire PostScript language, including recent Language Level 3 extensions. This authoritative manual from the creators of PostScript contains the complete description of every command & operand in the language. *

- * Covers Language Level 3, never before documented in book form
- * Extensions included HiFi color, support for marked images, & smoother shading capabilities
- * Book features 12-page four-color section, plus a CD-ROM containing the entire text in PDF

This updated guide offers a new approach for amateur photographers working with digital images. It focuses on the tools of digital imaging and shows how they function in different software. It guides photographers on getting up and running with digital imaging and ensures they are able to make informed decisions on software and equipment. Includes The Official Hewlett-Packard Troubleshooting Guide—with answers to FAQs from the Hewlett-Packard Technical Support Department! www.idgbooks.com A book/CD-ROM guide for developers and administrators who use HP Printer Control Language (PCL) and Hewlett-Packard's LaserJet and DeskJet printers. There is material on physical details of printer operation as well as coverage of features of the latest models such as color printing, Printer Job Language, and HP-GL/2. Emphasis is on PCL operation rather than a collection of escape sequences. The CD-ROM contains a Printer Application Language utility program with C++ source code, examples, and macro definitions for PCL 5 and PCL 3 commands. Annotation copyrighted by Book News, Inc., Portland, OR The Serial Set contains the House and Senate Documents and the House and Senate Reports. This volume includes Senate Reports from 107th Congress, 2nd Session, 2002. Instructions and notes from models of slide rules that are no longer produced. This is a reference work to preserve slide rules manuals. Many

companies are no longer in business after the 1970's. The instruction manuals were rarely ever sold separately from the slide rules and many were lost over time. The project is to provide a composite hard copy book and digital of reprints of restored instructions from the most popular manufacturer's slide rule models.
