PACKET #30

## INSTRUCTIONS

This Learning Packet has two parts: (1) text to read and (2) questions to answer.

The text describes a particular sport or physical activity, and relates its history, rules, playing techniques, scoring, notes and news.

The Response Forms (questions and puzzles) check your understanding and appreciation of the sport or physical activity.

## INTRODUCTION

Table tennis, or ping-pong, is an enjoyable sport but it can be highly competitive. Each player tries to outscore his opponent through the use of skill, strength, speed, stamina and strategy. The game is somewhat similar to tennis, where players hit the ball back and forth over a net.

The game is played on a table surface with the use of paddles and a ping-pong ball. The objective in the game is to be the first to score 21 points.

Table tennis is a game played by many people around the world. Games of table tennis are played in schools as well as homes. People young and old alike enjoy this fast-paced and action-packed game. For the serious player, there are many associations and organizations that sponsor competition. In addition, table tennis is an Olympic sport.

## HISTORY

The origin of table tennis has never been exactly pinpointed, even though it's a relatively young sport. The sport is younger than lawn tennis and not much older than basketball.

**A Historical Review and Analysis of Army Physical Readiness Training and Assessment** Whitfield East, 2013-12 The Drillmaster of Valley Forge Baron Von Steuben correctly noted in his Blue Book how physical conditioning and health which he found woefully missing when he joined Washington's camp would always be directly linked to individual and unit discipline courage in the fight and victory on the battlefield That remains true today Even an amateur historian choosing any study on the performance of units in combat quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field In this monograph Dr Whitfield Chip East provides a pragmatic history of physical readiness training in our Army He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent Then he introduces us to some master trainers and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century Finally he shows us how we have and must incorporate science even when there exists considerable debate to contribute to what we do and how we do it in shaping today's Army Dr East provides the history the analysis and the pragmatism and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat Our culture is becoming increasingly unfit due to poor nutrition a lack of adequate and formal exercise and too much technology Still the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts and they must be prepared through new unique and scientifically based techniques So while Dr East's monograph is a fascinating history it is also a required call

for all leaders to better understand the science and the art of physical preparation for the battlefield It was and is important for us to get this area of training right because getting it right means a better chance for success in combat
