Each of the six books in the Practical Math in Context presents topics students are likely to encounter in everyday life. Mastery of practical math skills is the overarching goal of the series. Each book includes problems that involve estimation, equations, mental math, calculators, and critical thinking. Each book includes additional concept-specific skills such as graphing, averages, statistics, ratios, and measurement. The series is appropriate for use with small groups, a full class, or by independent learners. The lessons are self-explanatory, freeing the teacher for individual instruction. This resource provides the answers to math assignments that kindergarten through 5th-grade students complete in 70 Times 7 Math: Classwork/Homework, which is sold separately and supplements the textbook 70 Times 7 Math (An All-In-One Math Book for Grades Kindergarten Through 5th). The assignments are meant to provide students individual practice solving problems taught in their textbooks and to equip them to do well on the corresponding tests. There are four classwork assignments to help prepare students for each exam. (Both paper and computer-based tests are available and can be purchased from the Habakkuk Educational Materials website at <https://www.habakkuk.net/>. The classwork/homework assignments that this book provides the answers to can also be purchased from the website.) Each week's classwork will be in the same format as the test. If there are, let's say, 100 problems on an upcoming test, students in grades 3rd through 5th would complete all 100 of those types of problems each week for four weeks, although the answers to corresponding problems will differ from one week to the next. Questions included on the classwork and tests are not randomly selected from the chapters in focus. Instead, they are very comprehensive in that every type of problem students learn about in their textbook or complete as a class on the interactive whiteboard will also be solved individually by students on the classwork assignments and corresponding tests. Moreover, page numbers where students can turn to for help in their textbooks are specified at the beginning of the assignments and (in the case of the assignments exclusively for grades 3rd through 5th) beside the individual problems. (Tutorial videos are available in the electronic textbooks.) The classwork is graded by the teacher and the number of problems missed on each page can be recorded at the bottom (-0, -3, etc.). It is recommended that students be allowed to correct any problems with checkmarks before the final grade for the assignment is determined. Correcting errors from the classwork tends to help students to do better on the tests. Time should be allotted daily for students to work on the assignments. The pages may be reproduced for non-commercial, classroom use and assigned as classwork or homework. There are worksheets to aid kindergarten through 2nd-grade students in memorizing the addition and subtraction facts and 3rd-6th graders in memorizing the multiplication and division facts, as each worksheet contains all 100 of the facts in random order. There are also a set of addition, subtraction, multiplication, and division worksheets that have been specially designed to use for bingo games. Other worksheets are aimed at helping students in grades 3rd-6th to become proficient at solving long division problems and at solving problems that require regrouping. There are 26 pages of this type of worksheet, and each page consists of addition with regrouping, subtraction with regrouping, multiplication with regrouping, and long division problems for students to solve. In

addition, there are worksheets to equip older students (those in 6th grade and up) with the ability to quickly add, subtract, multiply, and divide integers, and instructions on how to solve the integers are provided with each worksheet. Other reproducible pages that can be used to make bar graphs, to write digital times, to learn about symmetry and place value are also provided. The answer keys to the worksheets are included at the end of the book.
