

Academic Writing for Graduate Students: Answer key

Chapter 1:

- Task 1: The strategies which are likely to be most helpful to students are 3,4,6,7,8 and 9.
- Task 3:
Text A is targeted at an educated, but not highly specialized, audience, while text B is directed at experts. Text A was published in *Scientific American* and text B in *AIChE Journal*.
 1. Given the audience of text A, there is little technical vocabulary in the first paragraph, apart from *desalination* and *distillation*. Text B immediately jumps into the narrow topic and employs quite a lot of technical vocabulary with which many of us may be unfamiliar. This, however, is reasonable since the journal readers are presumed to have some background knowledge of the topic.
 2. Text A provides quite a lot of background material and does not provide too much narrow detail before reverse osmosis is introduced. Little detail on the process is given compared to Text B, which talks about network configuration and optimization.
 3. Sentence 7 in Text A provides a definition. Most of Text B is a description and could be considered an extended definition.
 4. Both texts are well written. The flow of ideas is good, largely following an old-to-new pattern of information flow. The texts move from general to specific, even though they begin at different levels of specificity.
- Task 6:
Greeting: from "Dear Mr Lee" to "... Operations Engineering"
Preparation for bad news: from "We have now finished..." to "... to limit the number we could accept"
Bad news: from "While your background..." to "...not been accepted."
Close: from "Given your excellent qualifications..." to "Sincerely"
- Task 7:
Description of a situation: Sentences 1-3
Identification of a problem: Sentences 4-7
Description of a solution: Sentences 8-11
Evaluation of the solution: Sentence 12
 1. In such a short text, it is hard to say precisely how serious the problem is based on the amount of detail. The use of the word *threat* in Sentence 4, however, does suggest that this is not something to be taken lightly. If the freshwater supply is being threatened, then researchers have good reason to be alarmed.
 2. The author suggests that the solution is a good one because it is simple and inexpensive. Note, however, that the author uses *can dispose* at the end and so seems cautiously optimistic.
 3. Answers will vary.
