Index is composed of 3 sections: Basic classifications subject, Current VA directives, and Rescinded VA directives. Prepared by the Task Committee of the Urban Water Resources Research Council of ASCE. Copublished by ASCE and the Water Environment Federation. Design and Construction of Urban Stormwater Management Systems presents a comprehensive examination of the issues involved in engineering urban stormwater systems. This Manual, which updates relevant portions of Design and Construction of Sanitary and Storm Sewers, MOP 37, reflects the many changes taking place in the field, such as the use of microcomputers and the need to control the quality of runoff

as well as the quantity. Chapters are prepared by authors with experience and expertise in the particular subject area. The Manual aids the practicing engineer by presenting a brief summary of currently accepted procedures relating to the following areas: financial services; regulations; surveys and investigations; design concepts and master planning; hydrology and water quality; storm drainage hydraulics; and computer modeling. First published in 1973, this book considers the differences between mainstream schools and special educational needs schools, for children with learning disabilities. It contains a wealth of research data, case history material and reference to existing literature, designed to answer many questions which parents, heads, and schoolteachers have asked. Questions considered include whether children with disabilities do as well in ordinary schools as children without, whether they are as happy and well adjusted, and how they fit into the social structure of the class. The book also looks at whether much teasing occurs and how practical difficulties can be overcome.
