

Evolution - Part 3 of 7 - Extinction (PBS Documentary)**Video Worksheet KEY**

1. What is the percentage of species that have gone extinct that have ever lived on the planet? **95-99%**
2. The last extinction was how many years ago? **65 million**
3. How many times have there been mass extinctions in the past 500 million years? **5**
4. 250 million years ago marks the end of the geological time period called the **Permian**.
5. After the Permian, which geologic period comes next? **Triassic**
6. When the geologist moves up about 50 feet along the rock, approximately how many years did he move up? **2,000-3,000 years of time**
7. In mass extinction the collapse of one species **brings down others**.
8. It took how many years after the mass extinction for the dinosaurs to evolve? **20 million years**
9. In an expedition to the Gobi Desert, Roy Chapman Andrews hoped to find early human remains, but instead what did he find in the sandstone? **Early dinosaur bones and eggs, fossils of tiny mammals**
10. 65 million years ago it is thought that an asteroid the size of **Mount Everest** reached the earth traveling 25,000 miles per hour.
11. You can think of mammals after the KT event as the first **colonizers**.
12. About 35 million years ago mammal evolution produced the first true **monkeys and apes**.
13. We have caused the rate of extinction to soar. It is now over **100 times** greater than normal.
14. Large carnivores are usually the first animals to be wiped out from the system. What would be an example? **Tigers**
15. 100 lbs of plants sustains how many pounds of herbivore? **10** how many pounds of carnivore? **1**
16. There is no doubt that extinction on a global level is **human-caused**. Anything from **clear-cutting forests to removing insect habitats** to just desecrating them, changing them.

Pbs Evolution Extinction Answers For

Extinctions Michael J. Benton, 2023-09-28 In this vast sweep of our Earth's history Michael Benton brings the deep past to life as never before Deploying the cutting edge tools in biology chemistry physics and geology that are transforming our understanding of previous environmental cataclysms including the incredible new discovery of a hitherto unknown extinction event he uncovers not only their lethal effects but also the processes that brought about such large scale destruction Beginning with the oldest extinction Benton investigates the Late Ordovician which set the evolution of the first animals on an entirely new course the late Devonian brought on by global warming the cataclysmic End Permian which wiped out over 90 per cent of all life on Earth and book ending the age of the dinosaurs the newly discovered Carnian Pluvial Event and the End Cretaceous asteroid He examines how global warming acid rain ocean acidification erupting volcanoes and meteorite impact have affected conditions on Earth the drastic consequences for global ecology and how life in turn survived adapted and evolved This expert retelling of scientific breakthroughs allows us to link long ago upheavals to our modern crises As today's climate scientists and political leaders grapple to understand these processes and our planet enters the sixth great extinction these insights from the past may hold the key to survival

Extinction Michael Charles Boulter, 2002 The head of the team analyzing Fossil Record 2 the largest database of information on extinct animals and plants brings us a thoroughly researched introduction to the new developments in the science of life and a chilling account of the effects that humans have had on the planet based on his experience and research

The End of Evolution Peter Douglas Ward, 1995 A finalist for a Los Angeles Times book award this contagiously enthusiastic book eloquently recreates the dramatic history of life and its great extinctions and issues an unprecedentedly compelling call to act to preserve our planet's biodiversity Line art photos

Extinctions in the History of Life Paul D. Taylor, 2004-11-11 Extinction is the ultimate fate of all biological species over 99 percent of the species that have ever inhabited the Earth are now extinct The long fossil record of life provides scientists with crucial information about when species became extinct which species were most vulnerable to extinction and what processes may have brought about extinctions in the geological past Key aspects of extinctions in the history of life are here reviewed by six leading palaeontologists providing a source text for geology and biology undergraduates as well as more advanced scholars Topical issues such as the causes of mass extinctions and how animal and plant life has recovered from these cataclysmic events that have shaped biological evolution are dealt with This helps us to view the biodiversity crisis in a broader context and shows how large scale extinctions have had profound and long lasting effects on the Earth's biosphere

Lost Creatures of the Earth Jon Erickson, 2014-05-14 Presents an examination of possible phenomena that caused dramatic changes in the earth's surface that could explain periodic mass extinctions and the evolution of new species

Thylacine Ben Garrod, 2022-03-03 TV scientist Ben Garrod presents the biggest extinction events ever told from the

point of view of evolution's superstars the most incredible animals ever to swim stalk slither or walk our planet Whether you're 9 or 90 his unique exploration of the most destructive yet most creative force in nature makes top level science fun Here are the superstars of the story of life from the super weird to the super ferocious Usually a species has 10 million years or so of evolving eating chasing playing maybe doing homework or even going to the moon before it goes extinct Thylacine was super hunted Wiped out by humans The last wild thylacine was shot in 1930 and the last captive one died in 1936 We humans are the only species with the power to eliminate other species from the story of life But who are the winners and losers A truly gripping and awe inspiring series of books An awesome way in which to learn tons and have a great time doing it VIP Reading Collect all eight books about animals we have lost in mass extinctions caused by asteroids or mega volcanoes clashing continents and climate change Past brought to full colour life by palaeoartist Gabriel Ugueto

The End of Evolution Peter Douglas Ward, 1995 [Extinctions in Near Time](#) Ross D.E. MacPhee, Hans-Dieter Sues, 2013-11-09 Near time an interval that spans the last 100 000 years or so of earth history qualifies as a remarkable period for many reasons From an anthropocentric point of view the outstanding feature of near time is the fact that the evolution cultural diversification and global spread of Homo sapiens have all occurred within it From a wider biological perspective however the hallmark of near time is better conceived of as being one of enduring repeated loss The point is important Despite the sense of uniqueness implicit in phrases like the biodiversity crisis meant to convey the notion that the present bout of extinctions is by far the worst endured in recent times substantial losses have occurred throughout near time In the majority of cases these losses occurred when and only when people began to expand across areas that had never before experienced their presence Although the explanation for these correlations in time and space may seem obvious it is one thing to rhetorically observe that there is a connection between humans and recent extinctions and quite another to demonstrate it scientifically How should this be done Traditionally the study of past extinctions has fallen largely to researchers steeped in such disciplines as paleontology systematics and paleoecology The evaluation of future losses by contrast has lain almost exclusively within the domain of conservation biologists Now more than ever there is opportunity for overlap and sharing of information *Extinctions of Living Things* Michael Bright, 2008-10-04 This volume examines the history of extinctions on Earth

The Sixth Extinction Richard E. Leakey, 1996 Richard Leakey One Of The World's Foremost Experts On Man's Evolutionary Past Now Turns His Eye To The Future And Doesn't Like What He Sees To the philosophical the earth is eternal while the human race presumptive keeper of the world's history is a mere speck in the rich stream of life It is known that nothing upon Earth is forever geography climate and plant and animal life are all subject to radical change On five occasions in the past catastrophic natural events have caused mass extinctions on Earth But today humans stand alone in dubious distinction among Earth's species Homo Sapiens possesses the ability to destroy entire species at will to trigger the sixth extinction in the history of life In *The Sixth Extinction* Richard Leakey and Roger Lewin consider how the grand sprawl of

human life is inexorably wreaking havoc around the world The authors of *Origins* and *Origins Reconsidered* unimpeachable authorities on the human fossil record turn their attention to the most uncharted anthropological territory of all the future and man's role in defining it According to Leakey and Lewin man and his surrounding species are end products of history and chance Now however humans have the unique opportunity to recognize their influence on the global ecosystem and consciously steer the outcome in order to avoid triggering an unimaginable upheaval

Lisowicia Ben Garrod, 2021-10-21 TV scientist Ben Garrod presents the biggest extinction events ever told from the point of view of evolution's superstars the most incredible animals ever to swim stalk slither or walk our planet Whether you're 9 or 90 his unique exploration of the most destructive yet most creative force in nature makes top level science fun Usually a species has 10 million years or so of evolving eating chasing playing maybe doing homework or even going to the moon before it goes extinct *Lisowicia* was super sized Weighing in at 9 tonnes it was one of the largest animals roaming the planet during the Late Triassic It was a kind of cross between a reptile and a mammal but not quite either What did *Lisowicia* eat how and where did it live and what caused the complete disappearance of this animal which lay undiscovered for over 200 million years Eye opening science with striking artwork Sunday Times Best Children's Books for Summer 2021 Collect all eight books about animals we have lost in mass extinctions caused by asteroids or mega volcanoes clashing continents and climate change Past brought to full colour life by palaeoartist Gabriel Ugueto [Extinction & Evolution](#) Jack R. Kryder, 2016-07-22 Our Earth is running out of resources to support humankind at a prodigious rate In many areas in approximately ten years we'll be running out of food and freshwater to survive worldwide Its amounting to extinction of the human race In addition computerized Mechanical Humans are evolving to the point they will take over the earth and replace us That's right you me and everyone else on the planet These facts are neither good nor bad because that's the way things were designed to happen from the beginning of time Its well worth it for you to read this booklet and check out the facts as listed and see if you agree with me If we do nothing wars and bloodshed are sure to happen as the effects of extinction becomes felt and visible on a worldwide basis The purpose of this booklet is to keep the wars and bloodshed from happening Hopefully you'll be willing to help me get the word out Jack R Kryder

Rivers in Time Peter Douglas Ward, 2000 Elaborating on and updating Ward's previous work *The End of Evolution* *Rivers in Time* delves into his newest discoveries The book presents the gripping tale of the author's investigations into the history of life and death on Earth through a series of expeditions that have brought him ever closer to the truth about mass extinctions past and future [Dying Planet](#) Jon Erickson, 1991 What we need to know on a personal and societal level to reverse current trends for our planet *Extinction Bad Genes Or Bad Luck* David Raup, 1992-11-03 The science of extinction is a lively and moveable feast of scientific speculation and research Scientist author David Raup takes the subject of nature's disappearing act to task covering everything from the Ice Age Blitzkreig to the fate of the marshes on Martha's Vineyard the extinction of flying reptiles to mankind's impact on tropical reefs Graphs [Extinction and Evolution](#)

Niles Eldredge, 2019-10-11 A resource on fossils and the stories they tell of the history of life on earth **The Call of Distant Mammoths** Peter D. Ward, 2012-12-06 To help us understand what happened during the Ice Age Peter Ward takes us on a tour of other mass extinctions through earth's history He presents a compelling account of the great comet crash that killed off the dinosaurs and describes other extinctions that were even more extensive In so doing he introduces us to a profound paradigm shift now taking place in paleontology rather than arising from the gradual workings of everyday forces all mass extinctions are due to unique catastrophic events Written with an irresistible combination of passion and expertise The Call of Distant Mammoths is an engaging exploration of the history of life and the importance of humanity as an evolutionary force Carefully argued an intelligent and compelling book THE OLYMPIAN SEATTLE WASHINGTON Ward deftly summarizes a large body of scientific literature simplifying complex ideas for the general reader without condescension PUBLISHERS WEEKLY Did the overkill really happen Peter Ward deftly summarizes the arguments Ward tells the story well THE NEW SCIENTIST **The Next Species** Michael Tennesen, 2016-03-29 Delving into the history of the planet and based on reports and interviews with scientists a science writer traveling to rain forests canyons craters and caves all over the world to explore the potential winners and losers of the next era of evolution describes what life on earth could look like after the next mass extinction *Evolution of Extinction: The Choice Before Us* Richard Kenneth Curtis, 1982 The Mass-Extinction Debates William Glen, 1994 This book examines the arguments and behavior of the scientists who have been locked in conflict over two competing theories to explain why 65 million years ago most life on earth including the dinosaurs perished

Embracing the Tune of Term: An Mental Symphony within **Pbs Evolution Extinction Answers For**

In a world used by monitors and the ceaseless chatter of fast interaction, the melodic beauty and psychological symphony produced by the published term usually disappear into the background, eclipsed by the relentless noise and disruptions that permeate our lives. But, set within the pages of **Pbs Evolution Extinction Answers For** a wonderful literary value overflowing with fresh emotions, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, this interesting masterpiece conducts visitors on an emotional journey, well unraveling the concealed tunes and profound impact resonating within each cautiously crafted phrase. Within the depths of this poignant examination, we shall explore the book is main harmonies, analyze its enthralling publishing style, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
