Written for the do-it-yourselfer, good enough for the pro. Includes everything you wish to know about your vehicles heating and air conditioning. From simple adjustments, to complete tune-ups and troubleshooting. Covers theory and operation of all domestic and import automotive heating and air conditioning systems in use today. Step-by-step procedures are provided for diagnosis, maintenance and repair. Includes a basic theory of air conditioning and heating system operation, heating and air conditioning system components, types of automotive air conditioning systems, service and diagnostic tools, air conditioning system service and repair, glossary of terms, and trouble shooting. Most everything you need to know about how air conditioning systems work, how to maintain, service, troubleshoot and repair them. Including expanded coverage of R-12 and R-134a air conditioning systems. The Air Conditioning Manual assists entry-level

engineers in the design of air-conditioning systems. It is also usable - in conjunction with fundamental HVAC&R resource material - as a senior- or graduate-level text for a university course in HVAC system design. The manual was written to fill the void between theory and practice - to bridge the gap between real-world design practices and the theoretical calculations and analytical procedures or on the design of components. This second edition represents an update and revision of the manual. It now features the use of SI units throughout, updated references and the editing of many illustrations. \* Helps engineers quickly come up with a design solution to a required air conditioning system. \* Includes issues from comfort to cooling load calculations. \* New sections on "Green HVAC" systems deal with hot topic of sustainable buildings.
