Reading Assessment Melissa Lee Farrall, 2012-06-05 A groundbreaking integrated approach to reading assessment that addresses each child's unique Learning Profile. Fifteen to twenty percent of our nation's children have reading difficulties. Educational evaluators must be able to use progress monitoring and diagnostic tools effectively to identify students who may be at risk, evaluate the effectiveness of school-wide reading programs, and suggest interventions that will improve reading skills. Written from a strengths-based perspective, *Reading Assessment: Linking Language, Literacy, and Cognition* is the first book of its kind to present a research-based integrated review of reading, cognition, and oral language testing and assessment. Author Melissa Lee Farrall explores the theoretical underpinnings of reading, language, and literacy; explains the background of debates surrounding these topics; and provides detailed information and administration tips on the wide range of reading inventories and standardized tests that may be used in a reading psychoeducational assessment. With a focus on how to craft professional evaluation reports that illuminate a student's strengths, not just weaknesses, *Reading Assessment* enables school psychologists, diagnosticians, reading specialists, and special education professionals to conduct evaluations and develop effective interdisciplinary remedial recommendations and interventions. Clear, engaging, and inviting, *Reading Assessment* features case examples and practice exercises, chapter opening reviews of each theory, strengths, weaknesses, and potential problems of tests and their interpretations, chapter ending review questions that foster skill development and critical thinking, comprehensive information on more than 50 different assessment tests. *Reading Assessment* is an invaluable resource that helps professionals gain the knowledge and skills to confidently interpret test results and prepare detailed and effective evaluation reports designed to meet each child's unique needs as a learner.
