Gülru Necipoğlu,1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain  
from the premodern Islamic world the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an  
exceedingly rich and valuable source of information In the course of her in depth analysis of this scroll dating from the late  
fifteenth or early sixteenth century Gülru Necipoğlu throws new light on the conceptualization recording and transmission of  
architectural design in the Islamic world between the tenth and sixteenth centuries Her text has particularly far reaching  
implications for recent discussions on vision subjectivity and the semiotics of abstract representation She also compares the  
Islamic understanding of geometry with that found in medieval Western art making this book particularly valuable for all  
historians and critics of architecture The scroll with its 114 individual geometric patterns for wall surfaces and vaulting is  
reproduced entirely in color in this elegant large format volume An extensive catalogue includes illustrations showing the  
underlying geometries in the form of incised drawings from which the individual patterns are generated An essay by  
Mohammad al Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the  
scroll s patterns could be used to design a three dimensional vault      **Popular Photography** ,2006-12      **HWM** ,2005-11
