Using a symptom-management approach to oncology nursing, this easy-to-use reference features succinct coverage of common types of cancer, including a chapter on pediatric cancers. The drug information section of the book and appendix features content from the Saunders Nursing Drug Handbook 2004. Practical, clinical information provided in a concise outline format. Clear, consistent organization makes information easy to find. Topics are listed at the beginning of each chapter with corresponding book pages numbers to facilitate ease of use. Written by an experienced practitioner and author. Oncologic Emergencies chapter details 12 different emergencies. Covers important end-of-life and psychosocial issues with chapters on Hospice & Palliative Care and Grief & Bereavement Issues. Includes chapters on support therapies such as Complementary, Alternative, & Herbal Medicine,

Hormonal Therapy, and Nutrition. Symptom Management chapter helps practitioners identify and share important comfort information with patients. Appendix includes the most commonly prescribed chemotherapeutic agents and pain medications for cancer patients. Spiral binding allows easy carrying and reference while in a clinical setting.

Cancer Chemotherapy Jan 14 2022 This text for beginning and advanced oncology nurses integrates the nursing process, including nursing diagnosis, with the administration of cancer chemotherapeutic agents. Chapters in the first section review the history of chemotherapy and the role of the oncology nurse in chemotherapy research. The second, main part of the text presents drug information forms and nursing care plans for more than 80 drugs. Each care plan includes a table of nursing diagnoses, defining characteristics, expected outcomes, and nursing interventions related to that drug. Finally, technical procedures for administration and safe handling of anti-neoplastic agents are discussed. c. Book News Inc.

Oncology Nursing Sep 02 2023

Pediatric Oncology Nursing Jan 26 2023 This book presents the current state of the nursing science in topics relevant to the care of pediatric oncology patients and their families across the treatment trajectory and is framed within a precision health framework. The spectrum of topics covered is wide, including, for example, symptom management, self-care management, exercise and physical activity,

family-centered care, palliative care, the role of the nurse in treatment decision making, patient and nurse resiliency, survivorship, and genetic counseling. Throughout, there is a focus on the implications of research for nursing practice, highlighting which elements of the available evidence are ready for translation into practice and which are not. In addition, careful attention is paid to the role that nursing can play in further advancing science through clinical research. The authors are leading experts from across the globe. The book will be of special interest for pediatric oncology nurses, including direct care nurses, research nurses, and nursing leaders, and will also be a stimulating source for researchers and non-oncology nurses.

Oncology Nursing Aug 09 2021 This comprehensive textbook for oncology nurses is organized into two parts. Part I contains information on the major principles of cancer treatment (i.e., epidemiology, pathophysiology, oncologic emergencies, etc.). In Part II issues related to specific cancers (i.e., breast, rectal, pancreatic, etc.) are discussed. This book is intended as a reference for oncology nurses. The field of oncology nursing has changed greatly in the last five years. Oncology nurses need a

current, comprehensive text so that they can understand a patient's trajectory, provide appropriate interventions, and teach patients and their family members how to manage symptoms and cope with their diseases. I agree with the authors that the scope and practice of oncology nursing has been expanding beyond the hospital setting. Oncology nurses are found in the outpatient as well as the home care settings. A comprehensive reference is needed in order to be able to keep abreast of this demanding and changing specialty. The book met the authors' objectives. Text chapters provide the reader with a thorough discussion of the issues. The special features found in the text on standards of patient care, patient teaching guides, and quality improvement tools are very helpful to the reader. According to the author, the book is written for oncology nurses and oncology nursing students. I agree with the authors' targeted audiences. This book is specifically written for nurses in order to help them gain an understanding of the disease process, medical management, nursing implications, and teaching needs of patients. Both of the authors of this text are credible authorities on the subject matter presented. Miaskowki has had a wide variety of oncology nursing experience and is currently professor and

chair of the Department of Physiologic Nursing at UCSF. Buchsel is recognized as an expert in the nursing care of bone marrow and stem cell transplantation. She is currently a clinical instructor at the University of Washington School of Nursing Education and is an oncology nurse consultant. The principles of cancer and current treatment modalities are covered in this book. Trends in surgical, radiation, chemotherapy, and biotherapy are written about in detail. In addition nurses are able to review the clinical implications and nursing management of patients undergoing disease specific treatment. The information on patient home care needs and patient teaching guides is very helpful. All aspects of oncology nursing care are covered in this text (including psychosocial, cultural, and terminal care issues). Tables and diagrams are appropriate and useful. One shortcoming of the text of note is that all diagrams appear in black-and-white. This is a very useful and comprehensive reference for oncology nurses. Providing the reader with nursing standards of care and patient teaching information are additional valuable features of this book. This book is well written and compares favorably with other books in the field such as Groenwald's "Cancer Nursing: Principles and Practice," 4th Edition (Jones and Bartlett, 1997). 83/100. Stacen

Surgical Oncology Nursing Jul 20 2022

Although surgery remains the mainstay of treatment for the patient diagnosed with a solid tumour, how a patient is cared for before and after surgery has undergone dramatic changes in recent years. Where once surgical patients with cancer were placed in specialized care centres staffed with specially trained and certified oncology nurses, surgical oncology patients are now often found on mixed units housing similar surgical patient populations and often in the care of nurses who are not specialized in oncology. In today's changing climate, oncology nurses work much more closely with a diverse team of healthcare professionals and having an intimate knowledge of the surgical oncology patient and treatment process has become even more important. *Surgical Oncology Nursing* provides you a detailed examination of surgical patients with cancer from diagnosis to survivorship. The care of the surgical patient with cancer involves a diverse healthcare team with many hands touching the patient at different stages, and the editors of this new book bring a varied set of backgrounds, from nurse navigation to advanced practice nursing. Chapters provide you with a full view of the process for a variety of patients with cancer. You'll gain details in areas such as diagnosis, preoperative and

perioperative care, nutritional care, surgical wounds and ostomy care, as well as survivorship issues. In addition, you'll gain insight into implications for pediatric and geriatric patients. You'll also get details on surgical procedures used on patients with cancer, including robotic minimally invasive surgery, interventional radiology, intraoperative radiation therapy, and reconstructive surgery. The core of the book focuses on the surgical care needed for patients with different types of tumours. *Surgical Oncology Nursing* reviews a variety of tumour types, from breast cancer to skin cancer, and details the specifics for the care of each patient population. In all, 11 types of cancers are reviewed, providing you the comprehensive information you need. Whether care is provided in a dedicated, oncology setting or within a diverse patient care environment, you'll need the type of knowledge found in *Surgical Oncology Nursing* to provide the best care possible for this unique patient population.

Oncology Nursing Secrets Nov 23 2022 Using a question-and-answer format, this book provides practical pearls of wisdom and tricks of the trade to enhance your oncology nursing skills and aid in effective decision-making when caring for your patients. Written by experts

in the field, this reference provides insightful answers, bulleted lists, and tables so you get the best information in an easy-to-read format. Keep it on hand every day in the clinical setting, use it to review for certification, or add it to your professional library at home! The 75 Top Secrets, listed in the front of the book, highlight the key points you should know about oncology nursing. Key Points boxes in each chapter outline important points to remember. Internet Resources boxes direct you to more information on a variety of topics via the web. Versatile question-and-answer format, written by experts in the field, makes this book great for both the experienced and new nurse. A chapter on sleep-wake disturbances enables you to help patients get the rest they need. Expanded content in chapters on carcinogenesis and genetics, biologic and targeted therapy, leukemia and myeloidyplastic syndrome, and disseminated intravascular coagulation provides a deeper look into these important aspects of oncology nursing.

Statement on the Scope and Standards of Oncology Nursing Practice Dec 13 2021 The official standards of your profession from the Oncology Nursing Society, the Statement on the Scope and Standards of Oncology Nursing Practice: Generalist and Advanced Practicerepresents the scope of your practice, the standards of care, and the standards of professional performance by which all oncology nurses measure their work. This new publication blends the scope and the standards of practice for oncology RNs and APRNs, combining the Statement on the Scope and Standards of Advanced Practice Nursing in Oncology (3rd Edition) and the Statement on the Scope and Standards of Oncology Nursing Practice, while providing you with a single resource that encompasses practitioners at all levels of practice. Developed by ONS, these new Standards should be considered the standard of care and the scope of practice and professional performance for oncology nursing, and could be used as a training tool for new nurses entering the field and as a measuring stick for nurses already working in the

profession.

Oncology Nurse Navigation Jun 30 2023 "The oncology nurse navigator is one of the few roles in nursing in which an individual nurse is accountable for and invested in providing patient-centered care throughout an entire disease trajectory. This book provides novice

nurse navigators and those developing or working in navigation programs with an overview of the role of the nurse navigator in cancer care and outlines the development of a navigation program, the skills and training needed to work as a nurse navigator, methods to evaluate outcomes, and issues related to assisting patients with specific types of cancers"--

Manual for Radiation Oncology Nursing Practice and Education Feb 07 2024 "Advances in technology, research, and evidence-based practice have led to improvements in the care of patients receiving radiation therapy. The knowledge and expertise required by nurses must focus on the needs of patients who come into their care at any point across the trajectory of the cancer journey. Nurses may work with patients at varying stages of the radiation therapy process and in a wide range of settings. Regardless, however, the need to be knowledgeable about the symptoms and side effects associated with this treatment is essential for nurses caring for this patient population. The Oncology Nursing Society has published the fifth edition of Manual for Radiation Oncology Nursing Practice and Education to support nurses who care for patients who will receive, are receiving, or have received radiation therapy. The fifth

edition features significant updates and changes to the content to reflect advances in technology, treatment options, and symptom management. New sections have been added based on input from radiation oncology nurses or as a result of changes in treatment options, the needs of specific patient populations, and observations from clinical practice. New topics include patients with cognitive changes and dementia; general distress and coping; patients with mental illness; special populations, such as women who are pregnant, adolescents, and young adults; special needs related to late effects of treatment and cardiac toxicities; and treatment modalities, including cobalt therapy and immunotherapy. This manual serves as an essential resource for individual nurses new to working in a radiation therapy setting as well as to nurses wanting to advance their knowledge in radiation biology and protection, diverse radiation therapy modalities, combination treatments, site- or disease-specific concerns, symptom management, special populations, and care during transition points. Additionally, this manual can be a resource to advanced practice clinicians, educators, and administrators, with a focus on support for nursing staff seeking the education and skills required to care for

patients receiving radiation therapy and their families"--
