Multiword expressions Manfred Sailer ,Stella Markantonatou ,2018 Multiword expressions MWEs are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs The ten contributions in this volume look at MWEs in Bulgarian English French German Maori Modern Greek Romanian Serbian and Spanish They discuss prominent issues in MWE research such as classification of MWEs their formal grammatical modeling and the description of individual MWE types from the point of view of different theoretical frameworks such as Dependency Grammar

MEMS Materials and Processes Handbook Reza Ghodssi, Pinyen Lin, 2011-03-18 MEMS Materials and Processes Handbook is a comprehensive reference for researchers searching for new materials properties of known materials or specific processes available for MEMS fabrication The content is separated into distinct sections on Materials and Processes The extensive Material Selection Guide and a Material Database guides the reader through the selection of appropriate materials for the required task at hand The Processes section of the book is organized as a catalog of various microfabrication processes each with a brief introduction to the technology as well as examples of common uses in MEMS

Data Mining: Concepts and Techniques Jiawei Han, Micheline Kamber, Jian Pei, 2011-06-09 Data Mining Concepts and Techniques provides the concepts and techniques in processing gathered data or information which will be used in various applications Specifically it explains data mining and the tools used in discovering knowledge from the collected data This book is referred as the knowledge discovery from data KDD It focuses on the feasibility usefulness effectiveness and scalability of techniques of large data sets After describing data mining this edition explains the methods of knowing preprocessing processing and warehousing data It then presents information about data warehouses online analytical processing OLAP and data cube technology Then the methods involved in mining frequent patterns associations and correlations for large data sets are described The book details the methods for data classification and introduces the concepts and methods for data clustering The remaining chapters discuss the outlier detection and the trends applications and research frontiers in data mining This book is intended for Computer Science students application developers business professionals and researchers who seek information on data mining Presents dozens of algorithms and implementation examples all in pseudo code and suitable for use in real world large scale data mining projects Addresses advanced topics such as mining object relational databases spatial databases multimedia databases time series databases text databases the World Wide Web and applications in several fields Provides a comprehensive practical look at the concepts and techniques you need to get the most out of your data

Vegetable Fiber Composites and their Technological Applications Mohammad Jawaid, Anish Khan, 2021-08-18 This book explores vegetable fiber composite as an eco friendly biodegradable and sustainable material that has many potential industrial applications The use of vegetable fiber composite supports the sustainable development goals SDGs to utilize more sustainable and greener composite materials which are also easy to handle and locally easily available with economical production costs This book presents various types of vegetable fiber composite and its processing methods and treatments to obtain desirable properties for certain applications The book caters to researchers and students who are working in the field of bio composites and green materials

Minerals in Africa Francis Gudyanga, 2020-08-10 Africa's dire need to industrialize is universally acknowledged and it is evident that the continent's vast mineral resources can catalyze that industrialization This requires the promotion of local beneficiation and value addition of minerals to yield materials on which modern Africa's industry and society can rely

This book is therefore about transforming Africa's comparative advantages in minerals into the continent's competitive edge regarding materials. Mineral beneficiation and value addition form the basis and provide opportunities for mineral-driven Africa's industrialization. The scope of the book is three-fold with inter-connected relationships: Information, Technical, and Policy-oriented. It will be a useful reference material for mining undergraduate students on beneficiation and value addition of each of the minerals found in Africa. The book, while presenting a broad overview of beneficiation and value addition of Africa's minerals, provides crucial starting material for postgraduate research students and R D institutions who wish to delve into more advanced methods of extraction and utilization of mineral-derived materials that are in Africa for the purpose of industrialization of the continent. [Handbook of Portfolio Construction](#) John B. Guerard, Jr., 2009-12-12

Portfolio construction is fundamental to the investment management process. In the 1950s, Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the efficient frontier to summarize optimal trade-offs between expected return and risk. The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics. Such concepts as the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Theory (APT) for example, provide the foundation for setting benchmarks for predicting returns and risk and for performance measurement. This volume showcases original essays by some of today's most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques. Covering a wide spectrum of topics including portfolio selection, data mining, tests, and multi-factor risk models, the book presents a comprehensive approach to portfolio construction tools, models, frameworks, and analyses with both practical and theoretical implications.

Manufacturing and Application of Stainless Steels Andrea Di Schino, 2020-04-15

Stainless steels represent a quite interesting material family both from a scientific and commercial point of view, following to their excellent combination in terms of strength and ductility together with corrosion resistance. Thanks to such properties, stainless steels have been indispensable for the technological progress during the last century, and their annual consumption increased faster than other materials. They find application in all these fields requiring good corrosion resistance together with ability to be worked into complex geometries. Despite their diffusion as consolidated materials, many research fields are active regarding the possibility to increase stainless steels mechanical properties and corrosion resistance by grain refinement or by alloying by interstitial elements. At the same time, innovations are coming from the manufacturing process of such a family of materials, also including the possibility to manufacture them starting from metals powder for 3D printing. The Special Issue scope embraces interdisciplinary work covering physical metallurgy and processes, reporting about experimental and theoretical progress concerning microstructural evolution during processing, microstructure properties relations, applications including automotive, energy, and structural.
