Letters and Diary of Laura M. Towne Oct 03 2023 This Is A New Release Of The Original 1912 Edition.

I Hold a Wolf by the Ears Aug 21 2022 ONE OF TIME'S 10 BEST FICTION BOOKS OF 2020. Longlisted for the Joyce Carol Oates Prize. Named a Best Book of 2020 by NPR, Bustle, Good Housekeeping, the New York Public Library, Library Journal, Lit Hub, Electric Literature, and Tor.com "As enchanting as fairy tales, as mysterious as dreams, these exquisitely composed fictions are as urgent and original as any being written today." —Sigrid Nunez, author of *The Friend*, winner of the 2018 National Book Award for Fiction An urgent and unsettling collection of women on the verge from Laura van den Berg, author of *The Third Hotel* *I Hold a Wolf by the Ears*, Laura van den Berg's first story collection since her prizewinning book *The Isle of Youth*, draws readers into a world of wholly original, sideways ghost stories that linger in the mouth and the mind. Both timeless and urgent, these eleven stories confront misogyny, violence, and the impossible economics of America with van den Berg's trademark spiky humor and surreal eye. Moving from the peculiarities of Florida to liminal spaces of travel in Mexico City, Sicily, and Iceland, *I Hold a Wolf by the Ears* is uncannily attuned to our current moment, and to the fears we reveal to no one but ourselves. In "Lizards," a man mutes his wife's anxieties by giving her a LaCroix-like seltzer laced with sedatives. In the title story, a woman poses as her more successful sister during a botched Italian holiday, a choice that brings about strange and destructive consequences, while in "Karolina," a woman discovers her prickly ex-sister-in-law in the aftermath of an earthquake and is forced to face the truth about her violent brother. *I Hold a Wolf by the Ears* presents a collection of women on the verge, trying to grasp what's left of life: grieving, divorced, and hyperaware, searching, vulnerable, and unhinged, they exist in a world that deviates from our own only when you look too closely. With remarkable control and transcendent talent, van den Berg dissolves, in the words of the narrator of "Slumberland," "that border between magic and annihilation," and further establishes herself as a defining fiction writer of our time.

Imperiled Ocean Jan 06 2024 On a life raft in the Mediterranean, a teenager from Ghana wonders whether he will reach Europe alive. A young chef disappears from a cruise ship, leaving a mystery for his friends and family to solve. A water-squatting community battles eviction from a harbor in a Pacific Northwest town, raising the question of who owns the water. *Imperiled Ocean* is a deeply reported work of narrative journalism that follows people as they head out to sea. What they discover holds inspiring and dire implications for the life of the ocean, and for all of us back on land. As *Imperiled Ocean* unfolds, battles are fought, fortunes made, and lives are lost. Behind this human drama, the ocean is growing ever more unstable, threatening to upend life on land. We meet a biologist tracking sturgeon who is unable to stop the development and pollution destroying the fish's habitat, he races to learn about the fish before it disappears. Sturgeon has survived more than 300 million years on earth and could hold important truths about how humanity might make itself amenable to a changing ocean. As a fisher and scientist, his ability to listen to the water becomes a parable for today. By eavesdropping on an imperiled world, he shows a way we can move forward to save the oceans we all share.

Ocean Outbreak Sep 09 2021 There is a growing crisis in our oceans: mysterious outbreaks of infectious disease are on the rise. Marine epidemics can cause mass die-offs of wildlife from the bottom to the top of food chains, impacting the health of ocean ecosystems as well as lives on land. Portending global environmental disaster, ocean outbreaks are fueled by warming seas, sewage dumping, unregulated aquaculture, and drifting plastic. Ocean Outbreak follows renowned scientist Drew Harvell and her colleagues into the field as they investigate how four iconic marine animals—corals, abalone, salmon, and starfish—have been devastated by disease. Based on over twenty years of research, this firsthand account of the sometimes gradual, sometimes exploding impact of disease on our ocean's biodiversity ends with solutions and a call to action. Only through policy changes and the implementation of innovative solutions from nature can we reduce major outbreaks, save some ocean ecosystems, and protect our fragile environment.

Unbroken Feb 24 2023 #1 NEW YORK TIMES BESTSELLER • NOW A MAJOR MOTION PICTURE • Look for special features inside. Join the Random House Reader's Circle for author chats and more. In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Appearing in paperback for the first time—with twenty arresting new photos and an extensive Q&A with the author—Unbroken is an unforgettable testament to the resilience of the human mind, body, and spirit, brought vividly to life by Seabiscuit author Laura Hillenbrand. Fathoming the Ocean Apr 16 2022 “[An] amiable, in-depth examination of the most critical era for the

development of modern oceanography” (Publishers Weekly). In a history at once scientific and cultural, Helen Rozwadowski shows us how the Western imagination awoke to the ocean's possibilities?in maritime novels, in the popular hobby of marine biology, in the youthful sport of yachting, and in the laying of a trans-Atlantic telegraph cable. The ocean emerged as important new territory, and scientific interests intersected with those of merchant-industrialists and politicians. Rozwadowski documents the popular crazes that coincided with these interests?from children's sailor suits to the home aquarium and the surge in ocean travel. She describes how, beginning in the 1860s, oceanography moved from yachts onto the decks of oceangoing vessels, and landlubber naturalists found themselves navigating the routines of a working ship's physical and social structures. Fathoming the Ocean offers a rare and engaging look into our fascination with the deep sea and into the origins of oceanography?origins still visible in a science that focuses the efforts of physicists, chemists, geologists, biologists, and engineers on the common enterprise of understanding a vast, three-dimensional, alien space. “Rozwadowski greatly expands our own understanding, all while telling a story that is original, wide-ranging, and illuminating.” —Margaret Deacon, Southampton Oceanography Centre, author of *Science and the Sea: The Origins of Oceanography* “Required reading for anyone wanting to understand how the oceans have come to play the role that they do in Western knowledge.” —Eric L. Mills, Dalhousie University and author of *Biological Oceanography: An Early History, 1870-1960* “Chronicles the birth of deep-sea oceanography, from early observations by Benjamin Franklin to the voyage of HMS Challenger in the 1870s. [Rozwadowski] weaves a rich narrative from the world of renowned as well as lesser-known oceanographers.” —Nature

Brandy Sep 21 2022 So... we all know Brandy's a fine girl, and what a good wife she would be, but who says (with a little luck, Of course, and some lovely Irish charm) she couldn't steal the sailor from the sea?!? Surely there's more To The story than what we've been told. The locket is nice, As is the braided silver chain, but come on! There must be more to Brandy's life than serving whiskey and wine to drunken sailors while she impatiently waits For The man she loves to return to her port. Travel back in time with me as we explore Brandy's life. Who was she, really? Why did she continue to hold onto the hope of finding happiness with a man who has obviously rejected her? Why do any of us hold onto such hope when the odds are so clearly stacked against us? is it because there's always that slight chance that our dreams may come true in the end, And The heartache will have been worth it? I believe that is precisely the reason! If you agree, let's explore Brandy's story more closely to discover what we might find. Take my hand... Do you hear the rushing water as it crashes into the shore? Do you feel the warm California sun as it softly kisses your face, And The light breeze as it tousles your hair? If so, you're on the right track and our journey has begun.

The Sun Is a Compass Jun 06 2021 For fans of Cheryl Strayed, the gripping story of a biologist's human-powered journey from the Pacific Northwest to the Arctic to rediscover her love of birds, nature, and adventure. During graduate school, as she conducted experiments on the peculiarly misshapen beaks of chickadees, ornithologist Caroline Van Hemert began to feel stifled in the isolated, sterile environment of the lab. Worried that she was losing her passion for the scientific research she once loved, she was compelled to experience wildness again, to be guided by the sounds of birds and to follow the trails of animals. In March of 2012, she and her husband set off on a 4,000-mile wilderness journey from the Pacific rainforest to the Alaskan Arctic, traveling by rowboat, ski, foot, raft, and canoe. Together, they survived harrowing dangers while also experiencing incredible moments of joy and grace -- migrating birds silhouetted against the moon, the steamy breath of caribou, and the bond that comes from sharing such experiences. A unique blend of science, adventure, and personal narrative, *The Sun is a Compass* explores the bounds of the physical body and the tenuousness of life in the company of the creatures who make their homes in the wildest places left in North America. Inspiring and beautifully written, this love letter to nature is a lyrical testament to the resilience of the human spirit. Winner of the 2019 Banff Mountain Book Competition: Adventure Travel

Swallow the Ocean Nov 23 2022 Charismatic, beautiful Sally Flynn was the center of her daughters' imaginations, particularly Laura's. Without warning, life as they knew it changed as paranoid schizophrenia overtook Sally. Whether it was accusing Laura's father of trying to win her over to the side of Satan, or buying only certain products that were evil-free, glimmers of her mother's future paranoia grew brighter as Laura's early years passed. Once her husband left the family and filed for divorce, Sally's symptoms bloomed in earnest, and the three girls united in flights of fancy of the sort their mother had taught them in order to deflect danger. Set in 1970s San Francisco, *Swallow the Ocean* is a searing, beautifully written memoir of a childhood under siege and three young girls determined to survive. In luminous prose, this memoir paints a most intimate portrait of what might have been a catastrophic childhood.

Swallow the Ocean Jun 11 2024 When Laura Flynn was a little girl, her beautiful, dynamic mother, Sally, was the center of her imagination. It wasn't long, however, before Sally's fun-loving side slowly and methodically became absorbed by madness. As Laura's parents divorced and her father struggled to gain custody, Sally's symptoms bloomed in earnest while Laura and her sisters united in flights of fancy of the sort their mother taught them so that they might deflect the danger threatening their fragile family. Set in 1970s San Francisco, *Swallow the Ocean* is redolent with place. In luminous prose, this memoir paints a most intimate portrait of what might have been a catastrophic childhood had Laura and her sisters not been resilient and determined enough to survive their environment even as they yearned to escape it.

Bering Sea Strong Mar 28 2023 Full of unusual characters, mischief, camaraderie, and testosterone-fueled man gossip. Bering Sea Strong is a tale of adventure and self-discovery. The story portrays a young woman on a solo journey, pushed to the edge of the earth and further from the weight of family—marked by divorce, death, disability, and depression—and a life she desires on land. Locked at sea for ninety days as the lone female trying to tuck in tight alongside twenty-five rough-and-tumble commercial fishermen in Alaska, Laura Hartema offers a rare glimpse into the intertwining worlds of a fisheries observer and the crew she works beside. She graphically illustrates the challenges of daily life and relationships in a way few have seen before. Her story provides an unprecedented portrait of the bizarre and entertaining human dynamics aboard an at-sea catcher-processor vessel, where men battle dangerous working conditions, loneliness, and boredom while rivaling for the attention of the only woman. Between trough and crest, Laura ponders the trauma and tragedies of her Midwest childhood as her capabilities and resilience are regularly tested. She is often left deciding when to “blow it off” and when to “blow a gasket.” In the end, the tumultuous Bering Sea is where she finds the strength to overcome the wounds of her past, embrace life’s uncertainty, and steam ahead into the uncharted waters of her future. Bering Sea Strong

demonstrates one woman's determination to overcome obstacles in pursuit of a satisfying career and a better life.

Food, Energy and Water Sustainability Feb 12 2022 Societies around the world face an increasingly uncertain future as social and ecological changes create pressure on resource governance, and this uncertainty calls for new models that illuminate the intersections of civil society, public sector, and private sector resource management. This volume presents a diversity of collaborations between various governance actors in the management of the Food-Energy-Water (FEW) nexus. It analyses the ability of emergent governance structures to cope with the complexity of future challenges across FEW systems. Divided into two sections, chapters in the first half of the book present a collection of case studies from around the world exemplifying how FEW nexus challenges are addressed in a multitude of ways and by a variety of actors. Chapters in the second half offer broader perspectives on the management of FEW and underline the lessons that emerge from applying a FEW lens to the question of natural resource governance. The varied examples in this book highlight that the management of FEW is often a question of reinventing, adapting, and building upon existing practices. Such practices are deeply embedded in unique socio-cultural, environmental, and political contexts as well as 'hard' infrastructures. Most of all, this edited volume seeks to communicate the wealth of ideas from committed individuals who continue to work to improve natural resource governance and our sustainable futures.
