Neurodiversity in Higher Education David Pollak, 2009-03-16 This edited collection offers screening teaching and practical support for specific learning differences in Higher Education Uses international case studies to explain how psychologists identify assess and support a range of specific learning differences in students The higher education sector has come to terms with dyslexia but today's students are disclosing a range of learning differences including dyspraxia ADHD Asperger's Syndrome and dyscalculia Institutions in all major Western countries are required by law to avoid disadvantaging students with special educational needs so staff must be up to date on how to recognise and support them Supported by an already popular website Brain HE with extra materials and colour photographs

Divergent Mind Jenara Nerenberg, 2020-03-24 AUDIBLE EDITOR'S PICK A paradigm shifting study of neurodivergent women those with ADHD autism synesthesia high sensitivity and sensory processing disorder exploring why these traits are overlooked in women and how society benefits from allowing their unique strengths to flourish As a successful Harvard and Berkeley educated writer entrepreneur and devoted mother Jenara Nerenberg was shocked to discover that her symptoms only ever labeled as anxiety were considered autistic and ADHD Being a journalist she dove into the research and uncovered neurodiversity a framework that moves away from pathologizing abnormal versus normal brains and instead recognizes the vast diversity of our mental makeups When it comes to women sensory processing differences are often overlooked masked or mistaken for something else entirely Between a flawed system that focuses on diagnosing younger male populations and

the fact that girls are conditioned from a young age to blend in and conform to gender expectations women often don't learn about their neurological differences until they are adults if at all As a result potentially millions live with undiagnosed or misdiagnosed neurodivergences and the misidentification leads to depression anxiety low self esteem and shame Meanwhile we all miss out on the gifts their neurodivergent minds have to offer Divergent Mind is a long overdue much needed answer for women who have a deep sense that they are different Sharing real stories from women with high sensitivity ADHD autism misophonia dyslexia SPD and more Nerenberg explores how these brain variances present differently in women and dispels widely held misconceptions for example it's not that autistic people lack sensitivity and empathy they have an overwhelming excess of it Nerenberg also offers us a path forward describing practical changes in how we communicate how we design our surroundings and how we can better support divergent minds When we allow our wide variety of brain makeups to flourish we create a better tomorrow for us all
