

# Argumentative Essay on Immigration

Illegal immigration has been a problem for the United States for a long time. This phenomenon is not new and thousands of illegal immigrants have come into US through either the Mexico border, the Pacific Ocean, or through many other ways. Some people have entered the country legally through a visit visa, but then have stayed illegally and are working in various places. Illegal immigration is a double-edged sword; on the one hand it provides the local economy with cost benefits as the illegal immigrants are not paid so much, while they are more productive. On the other hand, these illegal immigrants do not pay taxes and their employers also do not pay their taxes. There are both pros and cons of illegal immigration and this paper shall take a look at some facts pertinent to illegal immigration in the United States.

"Every day thousands of illegals stream across the 2,500 miles of border with Mexico. According to the U.S. Immigration and Naturalization Service, or INS, the total number of illegals in America from this source increases by 275,000 annually. Already the United States is host to an illegal population of 7 to 12 million, of whom the vast majority are Mexican or Hispanic in origin. These illegal and uninvited guests help themselves to jobs, education, welfare and unemployment compensation. The many whose wages are paid under the table pay little or no taxes. And they are easy prey for unscrupulous employers and politicians" (Hayes 2000)

The U.S. population primarily is growing as a result of births in the minority and immigrant communities. We do not like to think about it--as it is a political correctness problem--but there is stratification of labor, mostly along education lines, where the tough jobs in agriculture, manufacturing, and services are taken by those without recourse into the white-collar world of employment. Especially when these low paying jobs do not require language ability, immigrants historically have jumped at these opportunities as a way to get their foot in the door. The U.S.-born unemployed do not think first about having just any job to help plant their feet. They first think about what their wages will be. If you are here illegally, you clearly have a competitive advantage (Howell 2006).

Most of the Americans and the American officials are of the opinion that illegal immigration is bad for the country and it should be stopped completely. The Immigration Reform and Control Act (IRCA) is a law in the United States of America that pertains to the policies and regulations regarding employment. This law was enacted in 1986 for various reasons, which includes the fact that many illegal employees work in the United States. The two main requirements of the IRCA include: "(1) to hire only persons authorized to work in the United States and (2) to not discriminate on the basis of citizenship status or national origin" (LMD 1992). In order to be eligible to work in the United States, the workers must complete an I-9 form and must be able to prove their authorization to work in the United States to their employers. "Employers may not refuse to consider all qualified persons with work authorization, whether citizen or non-citizen. Employers must accept any document listed in the INS Handbook for Employers, and may not arbitrarily specify an INS document, or require additional documents. Employers may not refuse to hire a qualified worker whose employment authorization expires at a later date. IRCA imposes back pay and severe penalties on employers who commit immigration-related employment discrimination" (LMD 1992). I am for this
