First World War was the mechanization of the armed services After many centuries of use by the Army for patrols and communications the trusty horse was finally supplanted by the new fangled motorcycle This mechanization process gathered pace during the interwar years and in particular for the military motorcycle between 1925 and 1939 By the outbreak of the Second World War the motorcycle had become an important part of the military inventory and deemed suitable for WD War Department requirements When it was first published in 1995 this fully illustrated book was unique in looking at all military motorcycles of British origin known to have been tested mainly by the Mechanical Warfare Experimental Establishment later called the Mechanisation Experimental Establishment Ten years on the authors are producing a fully revised and updated new edition of their book that will include three new chapters covering standard parts bike markings and paint schemes There will also be a picture spread that illustrates despatch rider s clothing New to this edition will be a 16pp colour section that will illustrate restored WD bikes including detail shots of engines and components *The Winged Wheel Patch* Max Burns, Ken Messenger, 1993-01-01

Visualising Business Transformation Jonathan Whelan, Stephen Whitla, 2020-01-24 Business transformation typically involves a wide range of visualisation techniques from the templates and diagrams used by managers to make better strategic choices to the experience maps used by designers to understand customer needs the technical models used by architects to propose possible solutions and the pictorial representations used by change managers to engage stakeholder groups in dialogue Up until now these approaches have always been dealt with in isolation in the literature as well as in practice This is surprising because although they can look very different and tend to be produced by distinct groups of people they are all modelling different aspects of the same thing Visualising Business Transformation draws them together for the first time into a coherent whole so that readers from any background can expand their repertoire and understand the context and rationale for each technique across the transformation lifecycle The book will appeal to a broad spectrum of readers involved in change whether that is by creating change models themselves strategists architects designers engineers business analysts developers illustrators graphic facilitators etc interpreting and using them sponsors business change managers portfolio programme project managers communicators change champions etc or supporting those involved in change indirectly trainers coaches mentors higher education establishments and professional training facilities
