providing humanistic care Jan Morse R N Ph D College of Health and Human Development The Pennsylvania State University The book provides a view into the major issues adults with chronic illness experience in obtaining health care a perspective that is rarely available to those of use who use the health care system mainly for acute problems or indeed who are the providers The book is powerful intense and often uncomfortable reading the patients own words should sensitize all of us who work with the chronically ill Verbatim accounts of patients experiences are woven into a lucid and perceptive view of the structure and organization of Canadian health care which should be read by health policymakers in all the western industrialized countries Juliene G Lipson Ph D F A A N University of California San Francisco Thorne takes a unique approach in providing a graphic illustration of how the beliefs and values guiding the health care system contribute to the problems the chronically ill encounter in obtaining care Those concerned with the evolving social and health policy in the United States would be well served in reading Negotiating Health Care Academic Library Book Review [Chronic Illness](#) Pamala D.
