The Changing Landscape of International Schooling Tristan Bunnell,2014-06-27 The number of English medium international schools that deliver their curriculum wholly or partly in the English language reportedly reached 6 000 in January 2012 It is anticipated this number will rise to over 11 000 schools by 2022 employing over 500 000 English speaking teachers The number of children being taught in these schools reportedly reached 3 million in March 2012 Alongside this phenomenal growth the landscape of international schooling has changed fundamentally moving away from largely serving the children of the expat and globally mobile business community and Embassies towards serving the local children of the wealthy and emerging middle class This has been reflected in the shift away from non profit ownership by the school community towards ownership by for profit companies and proprietors In this

book Tristan Bunnell explores the changing landscape of international schooling and discusses the implications of these changes both in terms of theoretically conceptualizing the scale nature and purpose of the field and in terms of practically serving and administering the growing industry that international education is becoming The Changing Landscape of International Schooling will be worthwhile reading for researchers academics and students of international schooling leaders and teachers in international schools and those interested in the broader development of international education

Engineering Education John Heywood,2005-12-12 A synthesis of nearly 2 000 articles to help make engineers better educators While a significant body of knowledge has evolved in the field of engineering education over the years much of the published information has been restricted to scholarly journals and has not found a broad audience This publication rectifies that situation by reviewing the findings of nearly 2 000 scholarly articles to help engineers become better educators devise more effective curricula and be more effective leaders and advocates in curriculum and research development The author s first objective is to provide an illustrative review of research and development in engineering education since 1960 His second objective is with the examples given to encourage the practice of classroom assessment and research and his third objective is to promote the idea of curriculum leadership The publication is divided into four main parts Part I demonstrates how the underpinnings of education history philosophy psychology sociology determine the aims and objectives of the curriculum and the curriculum s internal structure which integrates assessment content teaching and learning Part II focuses on the curriculum itself considering such key issues as content organization trends and change A chapter on interdisciplinary and integrated study and a chapter on project and problem based models of curriculum are included Part III examines problem solving creativity and design Part IV delves into teaching assessment and evaluation beginning with a chapter on the lecture cooperative learning and teamwork The book ends with a brief insightful forecast of the future of engineering education Because this is a practical tool and reference for engineers each chapter is self contained and may be read independently of the others Unlike other works in engineering education which are generally intended for educational researchers this publication is written not only for researchers in the field of engineering education but also for all engineers who teach All readers acquire a host of practical skills and knowledge in the fields of learning philosophy sociology and history as they specifically apply to the process of engineering curriculum improvement and evaluation Real SAT II College Entrance Examination Board,1998 A guide for students taking the SAT II test that contains practice tests information on which tests should be taken when and test taking strategies Bourdieu and the Sociology of Music Education Pamela Burnard,Ylva Hofvander Trulsson,2016-04-15 Pierre Bourdieu has been an extraordinarily influential figure in the sociology of music For over four decades his concepts have helped to generate both empirical and theoretical interventions in the field of musical study His impact on the sociology of music taste in particular has been profound his ideas directly informing our understandings of how musical preferences reflect and reproduce inequalities between social classes ethnic groups and men

and women Bourdieu and the Sociology of Music Education draws together a group of international researchers academics and artist practitioners who offer a critical introduction and exploration of Pierre Bourdieu s rich generative conceptual tools for advancing sociological views of music education By employing perspectives from Bourdieu s work on distinction and judgement and his conceptualisation of fields habitus and capitals in relation to music education contributing authors explore the ways in which Bourdieu s work can be applied to music education as a means of linking school institutional habitus and learning and curriculum and family class habitus The volume includes research perspectives and studies of how Bourdieu s tools have been applied in industry and educational contexts including the primary secondary and higher music education sectors The volume begins with an introduction to Bourdieu s contribution to theory and methodology and then goes on to deal in detail with illustrative substantive studies The concluding chapter is an extended essay that reflects on and critiques the application of Bourdieu s work and examines the ways in which the studies contained in the volume advance understanding The book contributes new perspectives to our understanding of Bourdieu s tools across diverse settings and practices of music education

The importance of teaching Great Britain: Department for Education, 2010-11-24 England s school system performs below its potential and can improve significantly This white paper outlines action designed to tackle the weaknesses in the system strengthen the status of teachers and teaching reinforce the standards set by the curriculum and qualifications give schools back the freedom to determine their own development make schools more accountable to parents and help them to learn more quickly and systematically from good practice elsewhere narrow the gap in attainment between rich and poor The quality of teachers and teaching is the most important factor in determining how well children do The Government will continue to raise the quality of new entrants to the profession reform initial teacher training develop a network of teaching schools to lead training and development and reduce the bureaucratic burden on schools Teachers will be given more powers to control bad behaviour The National Curriculum will be reviewed specifying a tighter model of knowledge of core subjects so that the Curriculum becomes a benchmark against which school can be judged Schools will be given more freedom and autonomy the Academies programme extended and parents will be able to set up Free Schools to meet parent demand Accountability for pupil performance is critical and much more information will be available to aid

understanding of a school's performance School improvement will be the responsibility of schools not central government
Funding of schools needs to be fairer and more transparent and there will be a Pupil Premium to target resources on the
