Nclex Pharmacology Study Guide

NCLEX-RN (r) - Pharmacology Study Guide Marnie Kramer-Kile, 2016-04 The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX RN R in a systematic and purposeful way. The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation. This guide organizes content using the current NCLEX RN R Test Plan 2016 2019 and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation. The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high stakes exam writing. Many candidates while studying for the NCLEX RN R often forgo studying pharmacological concepts in the detail required for the exam. Unique to this Pharmacology Guide is a five step algorithm created by the author to help graduates approach drug to drug interaction questions. This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another. The purpose of the modules in this Pharmacology study guide series are to Provide in depth review of the major drug classes from a systems approach e.g respiratory nervous system etc to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management. Summarize important information related to drug therapy and guide graduates to in depth review of serious adverse events associated with medications. The modules will contain summary tables review questions and exercises for key concepts. Direct the reader to important areas for client assessment during drug therapy. This is a working pharmacology study guide so while key information will be presented and organized for review it is up to you to do the detailed work of content review by answering the questions and exercises in each module. The following resources are recommended to use with this pharmacology study guide: 1 Pharmacology textbook. This resource will contain the detailed information pertaining to drug classes and specific nursing considerations related to drug therapy. 2 Drug guide. These resources contain alphabetized drug information and outline pharmacokinetic and pharmacodynamics characteristics of medications. You will find important information related to the absorption, distribution, metabolism, and excretions of drugs, as well as protein binding and therapeutic index. 3 An online drug repository if the resources above do not contain the information needed to answer the questions in the guide. Each module contains practice questions using NCLEX RN R formatted questions. It is recommended that you seek additional practice questions from resources that challenge you to go into pharmacological concepts such as serious adverse events and drug to drug interactions in detail and test your knowledge specific nursing interventions related to drug therapy. There are a total of 12 working Modules covered in the Pharmacology Study Guide: Module 1 Understanding Drug to Drug Interactions, Module 2 Drugs Affecting the Respiratory System, Module 3 Drugs Affecting the Nervous System, Module 4 Drugs Affecting the Gastrointestinal System, Module 5 Vascular and Cardiac Medications, Module 6 Drugs Affecting the Urinary and Renal System, Module 7 Anti Infective Medications, Module 8 Drugs Affecting the Endocrine System, Module 9 Antineoplastic Medications, Module 10 Medications Given in Mental Health Contexts, Module 11 Drugs and the Intra Ante Post Partum Client, Module 12 Pain Management and Anesthesia.

Study Guide for Pharmacology and the Nursing Process - E-Book Linda Lane Lilley, Shelly Rainforth Collins, Julie S. Snyder, 2016-01-19 Prepare for success in pharmacology and on the NCLEX Examination with the Study Guide for Pharmacology and the Nursing Process 8th Edition. Designed to accompany Lilley's Pharmacology and the Nursing Process 8th Edition textbook, this workbook features worksheets for each chapter that include NCLEX RN Examination style review questions, critical thinking and application questions, case studies, and other educationally sound learning activities. Chapter by chapter worksheets are divided into 3 main sections: Chapter Review and NCLEX Examination Preparation, Critical Thinking and Application, and Case Study Focus. Each chapter includes at least one prioritization exercise in which the reader must evaluate a clinical scenario and answer the question: "What is the nurse's best action?" Overview of dosage calculations section contains explanations of key drug calculation concepts, sample drug labels, practice problems, and a practice quiz. Answers for all exercises are provided at the back of the book to facilitate self-study. Learning strategies expand upon the unique cartoon-illustrated study strategies included in the Lilley text. NEW: Expanded NCLEX focus includes one to two additional NCLEX Examination style questions for each chapter, including additional alternate item format types. Chapter review and NCLEX Examination preparation included in each chapter worksheet contains a number of application-based NCLEX practice questions, including at least one alternate item question per chapter. NEW: Updated content is completely current and consistent with the Lilley textbook.
