Pandora's Hope Essays On The Reality Of Science Studies Bruno Latour

Pandora's Hope Bruno Latour, 1999-06-30 A scientist friend asked Bruno Latour point blank Do you believe in reality Taken aback by this strange query Latour offers his meticulous response in Pandora's Hope It is a remarkable argument for understanding the reality of science in practical terms In this book Latour identified by Richard Rorty as the new b te noire of the science worshipers gives us his most philosophically informed book since Science in Action Through case studies of scientists in the Amazon analyzing soil and in Pasteur's lab studying the fermentation of lactic acid he shows us the myriad steps by which events in the material world are transformed into items of scientific knowledge Through many examples in the world of technology we see how the material and human worlds come together and are reciprocally transformed in this process Why Latour asks did the idea of an independent reality free of human interaction emerge in the first place His answer to this question harking back to the debates between Might and Right narrated by Plato points to the real stakes in the so called science wars the perplexed submission of ordinary people before the warring forces of claimants to the ultimate truth

Science in Action Bruno Latour, 1987 From weaker to stronger rhetoric literature Laboratories From weak points to strongholds machines Insiders out From short to longer networks tribunals of reason Centres of calculation Politics of Nature Bruno Latour, 2009-07-01 A major work by one of the more innovative thinkers of our time Politics of Nature does nothing less than establish the conceptual context for political ecology transplanting the terms of ecology into more fertile philosophical soil than its proponents have thus far envisioned Bruno Latour announces his project dramatically Political ecology has nothing whatsoever to do with nature this jumble of Greek philosophy French Cartesianism and American parks Nature he asserts far from being an obvious domain of reality is a way of assembling political order without due process Thus his book proposes an end to the old dichotomy between nature and society and the constitution in its place of a collective a community incorporating humans and nonhumans and building on the experiences of the sciences as they are actually practiced In a critique of the distinction between fact and value Latour suggests a redescription of the type of political philosophy implicated in such a commonsense division which here reveals itself as distinctly uncommonsensical and in fact fatal to democracy and to a healthy development of the sciences Moving beyond the modernist institutions of mononaturalism and multiculturalism Latour develops the idea of multinaturalism a complex collectivity determined not by outside experts claiming absolute reason but by diplomats who are flexible and open to experimentation

Facing Gaia Bruno Latour, 2017-09-05 The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature For the last three centuries new ideas of nature have been continually developed by theology politics economics and science especially the sciences of the material world The situation is even more unstable today now that we have entered an ecological mutation of unprecedented scale Some call it the Anthropocene but it is best described as a new climatic regime

And a new regime it certainly is since the many unexpected connections between human activity and the natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside So the question now arises what will replace the old ways of looking at nature This book explores a potential candidate proposed by James Lovelock when he chose the name Gaia for the fragile complex system through which living phenomena modify the Earth The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame transforming Gaia into a single organism a kind of giant thermostat some sort of New Age goddess or even divine Providence In this series of lectures on natural religion Bruno Latour argues that the complex and ambiguous figure of Gaia offers on the contrary an ideal way to disentangle the ethical political theological and scientific aspects of the now obsolete notion of nature He lays the groundwork for a future collaboration among scientists theologians activists and artists as they and we begin to adjust to the new climatic regime

On the Modern Cult of the Factish Gods Bruno Latour, 2010 Building on his earlier book *We Have Never Been Modern* Bruno Latour develops his argument about the Modern fetishization of facts or the creation of factishes

Reassembling the Social Bruno Latour, 2007-09-06 Reassembling the Social is a fundamental challenge from one of the world's leading social theorists to how we understand society and the social Bruno Latour's contention is that the word social as used by Social Scientists has become laden with assumptions to the point where it has become misnomer When the adjective is applied to a phenomenon it is used to indicate a stabilized state of affairs a bundle of ties that in due course may be used to account for another phenomenon But Latour also finds the word used as if it described a type of material in a comparable way to an adjective such as wooden or steely Rather than simply indicating what is already assembled together it is now used in a way that makes assumptions about the nature of what is assembled It has become a word that designates two distinct things a process of assembling and a type of material distinct from others Latour shows why the social cannot be thought of as a kind of material or domain and disputes attempts to provide a social explanations of other states of affairs While these attempts have been productive and probably necessary in the past the very success of the social sciences mean that they are largely no longer so At the present stage it is no longer possible to inspect the precise constituents entering the social domain Latour returns to the original meaning of the social to redefine the notion and allow it to trace connections again It will then be possible to resume the traditional goal of the social sciences but using more refined tools Drawing on his extensive work examining the assemblages of nature Latour finds it necessary to scrutinize thoroughly the exact content of what is assembled under the umbrella of Society This approach a sociology of associations has become known as Actor Network Theory and this book is an essential introduction both for those seeking to understand Actor Network Theory or the ideas of one of its most influential proponents

Bruno Latour in Pieces Henning Schmidgen, 2014-10-15 Bruno Latour stirs things up Latour began as a lover of science and technology co founder of actor network theory and philosopher of a modernity that had never been modern In the meantime he is regarded not just as one of

the most intelligent and also popular exponents of science studies but also as a major innovator of the social sciences an exemplary wanderer who walks the line between the sciences and the humanities This book provides the first comprehensive overview of the Latourian oeuvre from his early anthropological studies in Abidjan Ivory Coast to influential books like *Laboratory Life and Science in Action* and his most recent reflections on an empirical metaphysics of modes of existence In the course of this enquiry it becomes clear that the basic problem to which Latour's work responds is that of social tradition the transmission of experience and knowledge What this empirical philosopher constantly grapples with is the complex relationship of knowledge time and culture

Bruno Latour Anders Blok, Torben Elgaard Jensen, 2011-05-27 French sociologist and philosopher Bruno Latour is one of the most significant and creative thinkers of the last decades Bruno Latour *Hybrid Thoughts in a Hybrid World* is the first comprehensive and accessible English language introduction to this multifaceted work The book focuses on core Latourian themes contribution to science studies STS Science Technology Society philosophical approach to the rise and fall of modernity innovative thoughts on politics nature and ecology contribution to the branch of sociology known as ANT Actor Network Theory With ANT Latour has pioneered an approach to socio cultural analysis built on the notion that social life arises in complex networks of actants people things ideas norms technologies and so on influencing each other in dynamic ways This book explores how Latour helps us make sense of the changing interrelations of science technology society nature and politics beyond modernity

Aramis, Or The Love of Technology Bruno Latour, 1996-04-15 Bruno Latour has written a unique and wonderful tale of a technological dream gone wrong The story of the birth and death of Aramis the guided transportation system intended for Paris is told in this thought provoking and fictional account by several different parties an engineer and his professor company executives and elected officials a sociologist and finally Aramis itself who delivers a passionate plea on behalf of technological innovations that risk being abandoned by their makers As the young engineer and professor follow Aramis's trail conducting interviews analyzing documents assessing the evidence perspectives keep shifting the truth is revealed as multilayered unascertainable comprising an array of possibilities worthy of Rashomon This charming and profound book part novel and part sociological study is Latour at his thought provoking best

Laboratory Life Bruno Latour, Steve Woolgar, 2013-04-04 This highly original work presents laboratory science in a deliberately skeptical way as an anthropological approach to the culture of the scientist Drawing on recent work in literary criticism the authors study how the social world of the laboratory produces papers and other texts and how the scientific vision of reality becomes that set of statements considered for the time being too expensive to change The book is based on field work done by Bruno Latour in Roger Guillemin's laboratory at the Salk Institute and provides an important link between the sociology of modern sciences and laboratory studies in the history of science

Raw Data Is an Oxymoron Lisa Gitelman, 2013-01-25 Episodes in the history of data from early modern math problems to today's inescapable dataveillance that demonstrate the dependence of data on culture We live in the era of Big

Data with storage and transmission capacity measured not just in terabytes but in petabytes where peta denotes a quadrillion or a thousand trillion Data collection is constant and even insidious with every click and every like stored somewhere for something This book reminds us that data is anything but raw that we shouldn't think of data as a natural resource but as a cultural one that needs to be generated protected and interpreted The book's essays describe eight episodes in the history of data from the predigital to the digital Together they address such issues as the ways that different kinds of data and different domains of inquiry are mutually defining how data are variously cooked in the processes of their collection and use and conflicts over what can or can't be reduced to data Contributors discuss the intellectual history of data as a concept describe early financial modeling and some unusual sources for astronomical data discover the prehistory of the database in newspaper clippings and index cards and consider contemporary dataveillance of our online habits as well as the complexity of scientific data curation

Science in Democracy Mark B. Brown, 2009 An argument that draws on canonical and contemporary thinkers in political theory and science studies from Machiavelli to Latour for insights on bringing scientific expertise into representative democracy

Prince of Networks: Bruno Latour and Metaphysics Graham Harman, 2009 Prince of Networks is the first treatment of Bruno Latour specifically as a philosopher It has been eagerly awaited by readers of both Latour and Harman since their public discussion at the London School of Economics in February 2008 Part One covers four key works that display Latour's underrated contributions to metaphysics Irreductions Science in Action We Have Never Been Modern and Pandora's Hope Harman contends that Latour is one of the central figures of contemporary philosophy with a highly original ontology centered in four key concepts actants irreduction translation and alliance In Part Two Harman summarizes Latour's most important philosophical insights

After Lockdown Bruno Latour, 2021-09-09 After the harrowing experience of the pandemic and lockdown both states and individuals have been searching for ways to exit the crisis many hoping to return as soon as possible to the world as it was before the pandemic But there is another way to learn the lessons of this ordeal as inhabitants of the earth we may not be able to exit lockdown so easily after all since the global health crisis is embedded in another larger and more serious crisis that brought about by the New Climate Regime Learning to live in lockdown might be an opportunity to be seized a dress rehearsal for the climate mutation an opportunity to understand at last where we inhabitants of the earth live what kind of place earth is and how we will be able to orient ourselves and exist in this world in the years to come We might finally be able to explore the land in which we live together with all other living beings begin to understand the true nature of the climate mutation we are living through and discover what kind of freedom is possible a freedom differently situated and differently understood In this sequel to his bestselling book *Down to Earth* Bruno Latour provides a compass for this necessary re-orientation of our lives outlining the metaphysics of confinement and

deconfinement with which we will all be obliged to come to terms by the strange times in which we are living *After Method* John Law, 2004-08-12 John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision. It is usually said that only poor research produces messy findings and the idea that things in the world might be fluid, elusive, or multiple is unthinkable. Law's startling argument is that this is wrong and it is time for a new approach. Many realities, he says, are vague and ephemeral. If methods want to know and help to shape the world, then they need to reinvent themselves and their politics to deal with mess. That is the challenge. Nothing less will do. **An Attempt at a "Compositionist Manifesto"** Bruno Latour, 2016 **History of Scientific Thought** Michel Serres, 1995-10-16 A series of meditative or considered essays examining nodal points in the long history of science from the first emergence of experts writing on clay in Babylonia *Conversations on Science, Culture, and Time* Michel Serres, Bruno Latour, 1995 Illuminating conversations with one of France's most respected and controversial philosophers *What People Want* Michael Shamiyeh, DOM Research Laboratory, 2005-03-11 Das Buch, das aus der letzten DOM Konferenz in Linz heraus entstanden ist, setzt sich in rund 30 Fachbeiträgen mit dem Leitbegriff Populismus auseinander und versucht das Phänomen aus unterschiedlichen Perspektiven heraus zu beleuchten. Muss ein erfolgreiches Design heute den Wünschen der breiten Öffentlichkeit entsprechen? Woran orientieren sich eigentlich Trends und die Erwartungen der Bevölkerung? Kann Gestaltungskultur grundsätzlich nur im Widerstand gegen populäre Trends entstehen, oder liegt in einer Anpassung an populäre Tendenzen auch ein Potential zur Schaffung einer besseren Lebensumwelt? Bruno Latour Gerard de Vries, 2018-02-12 Bruno Latour is among the most important figures in contemporary philosophy and social science. His ethnographic studies have revolutionized our understanding of areas as diverse as science, law, politics, and religion. To facilitate a more realistic understanding of the world, Latour has introduced a radically fresh philosophical terminology and a new approach to social science: Actor Network Theory. In seminal works such as *Laboratory Life*, *We Have Never Been Modern*, and *An Inquiry into Modes of Existence*, Latour has outlined an alternative to the foundational categories of modern western thought, particularly its distinction between society and nature that has major consequences for our understanding of the ecological crisis and of the role of science in democratic societies. Latour's empirical philosophy has evolved considerably over the past four decades. In this lucid and compelling book, Gerard de Vries provides one of the first overviews of Latour's work. He guides readers through Latour's main publications from his early ethnographies to his more recent philosophical works, showing with considerable skill how Latour's ideas have developed. This book will be of great value to students and scholars attempting to come to terms with the immense challenge posed by Latour's thought. It will be of interest to those studying philosophy, anthropology, sociology, science, and technology studies, and almost all other branches of the social sciences and humanities.
