Nature, the Soul, and God Jean W. Rioux, 2004-04-14 The complete title of one of the most famous works ever written Isaac Newton's Principia was actually Philosophiæ Naturalis Principia Mathematica or The Mathematical Principles of Natural Philosophy Sadly many contemporary philosophers would be hard pressed to say just what natural philosophy or philosophy of nature is all about Without question the philosophy of nature has received relatively less attention than ethics and metaphysics for some time In *Nature the Soul and God* Jean W Rioux has brought together a number of important readings in natural philosophy from the Pre Socratic philosophers and Aristotle to the 19th century entomologist Jean Henri Fabre Collectively they present three ways in which one might conceive of the natural world in a pre scientific reflection upon the way things are either the classical materialism of Empedocles Democritus and Epicurus the formalism of Plato or the hylomorphic view espoused and defended by Aristotle and Thomas Aquinas In the sections following the consideration of nature are selections from these representative views concerning the immortality of the soul and the existence of God Through the medium of philosophers both ancient and modern Rioux makes the point that one's philosophical account of the natural world will have an impact upon how one regards human nature as well as divinity itself It all begins with nature

Rioux, 2021-11-08 The full title of Newton's Principia is The Mathematical Principles of Natural Philosophy Sadly some contemporary philosophers might be hard pressed to say just what natural philosophy is about sadly because it remains foundational to questions arising in other disciplines metaphysics ethics philosophical psychology and the philosophy of god to name a few In *Nature the Soul and God* Jean Rioux has brought together primary readings in the philosophy of nature presenting ways in which philosophers conceive of and account for the natural world in a pre scientific reflection upon the way things are Its three main sections comprise a consideration of what the world would look like if natural philosophy were not possible some representative natural philosophies materialism formalism dualism and hylomorphism as well as an investigation into the implications these philosophies of nature have for other important questions such as human freedom and the immortality of the human soul Through the medium of philosophers both ancient and modern Rioux makes the point that one's philosophical account of the natural world will inevitably have an impact upon how one regards oneself and even things divine It all begins with nature

Nature and Thought St. George Jackson Mivart, 1882

The Soul in Nature Hans Christian Ørsted, 1852

An Introduction to Natural Theology Maurice R. Holloway,2018-06-21 What is the God of the philosopher Can the philosopher that is to say can human reason unenlightened by the revealed word come to a true and secure understanding of He Who Is Is it possible for mere man without the impact of a personal experience intimate and intuitive to arrive by means of an objective demonstration at an absolute affirmation that the Being we call God exists or that He is Pure Act Existence Itself because without him the world of our experience is unintelligible a complete contradiction And even if we admit as all Christian philosophers must that unaided reason is able by its own power to reach an objectively true and secure assent that God exists is there any evidence in the recorded history of our world that man without the directive knowledge of revelation ever did secure by a metaphysical effort this absolute truth that the Ipsum Esse exists Whatever be the answer to this difficult problem and we do not pretend to know it it is obvious that Father Holloway in composing his philosophical approach to God allowed himself to be guided by the knowledge of faith Indeed he must have prayed often for the enlightenment which the supernatural motion of divine grace brings even to the limited and imperfect intellect of a philosopher From the Foreword by Henri Renard S J

Natural Philosophy Epitomised: Books 8-11 of Gregor Reisch's Philosophical pearl (1503) Sachiko Kusakawa,2017-03-02 Gregor Reisch s The Philosophical pearl Margarita Philosophica first published in 1503 and republished 11 times in the sixteenth century was the first extensive printed text which discussed the disciplines taught at university to achieve widespread dissemination This distinguishes it from printed editions of individual texts of Aristotle and other authorities It is presented as a dialogue between master and pupil covering the seven liberal arts natural philosophy and moral philosophy and with illustrations throughout It has received remarkably little attention in its own right as a work of education which helped shape the world view of sixteenth century educated men Its author was a Carthusian monk This volume presents an edited translation and an extensive introduction of the four books which deal with natural philosophy the predecessor of modern science These books clearly show the extent to which for Reisch the study of nature was still primarily undertaken for Christian ends Not only was nature studied as God s creation but the study of the soul a central part of natural philosophy pursued on Aristotelian lines and its fate was here completely integrated with the salvation or damnation of the individual Christian as taught in the Bible and by the church fathers especially Augustine Natural philosophy for Reisch was a discipline which was as concerned with God and the Bible as it was with Nature and Aristotle

Man and Nature in God Lloyd E. Sandelands, 2017-12-02 Contemporary American life is tinged with dissatisfaction Increased wealth and comfort and technological advances have not made individuals happier or society more companionable Today Americans marry later or not at all and they fail at marriage as often as they succeed Man and Nature in God is a story of contemporary American decadence a grim tale of our flagging relation to nature a tale confirmed at the center of our sexual lives Sandelands grounds his critique in a modern philosophical error We have conflated a particular metaphysical outlook the subjective standpoint of science with our relationship as humans to nature We fail to see that however much we may learn about nature by treating it as object to our subject we cannot in this way learn what we most want and most need to know about nature and about ourselves Answers to such questions as How are we related to nature and How are we to think and act truly in nature continue to elude us Cast as ideology by the isms of humanism naturalism and postmodernism today s subjective standpoint has turned the question of truth into one question of politics The unhappy result has been and continues to be a profound and deadly misunderstanding of nature as well as man epitomized in contemporary American culture today Taking this as his starting point Sandelands suggests how we can save ourselves from our mortifying philosophical error thereby claiming our true relation to nature and reinvigorating our sexual lives He identifies the need for a natural philosophy that takes God to be the starting point of self understanding Although the book is about philosophy it is not only for the academic philosopher Although it is about theology it is not only for the theologian or student of religion And although the book takes modern biological and social sciences to task it is not only for biological and social scientists Instead Man and Nature in God is for everyone concerned about the disma
