

### Physician Assisted Suicide

Destinee Bridges Professor Richard Dahm Eng W233-22 Annotated Bibliography- Final Draft 16 October 2012  
Physician Assisted Suicide Public opinion on suicide acceptability through a physician has become a very controversial topic in today's world. In the following, six scholarly articles will be reviewed. In each article one will give their opinion to the matter of physician-assisted suicide and provide arguments to back up their claim. Most of these articles are from physicians themselves and others close to their field to give insight.  
Dieterle, J. M. (2007). Physician-assisted suicide: A new look at arguments.

Bioethics, 21(3), 127-139. Dieterle is a professor at Eastern Michigan University in the department of history and philosophy. In this paper he reviewed the arguments against physician assisted suicide. He discusses the Oregon's Death with Dignity Act and their practice with PAS. Dieterle does not provide positive arguments for physician-assisted suicide because he believes that no anti-PAS argument has value. Consequential arguments were analyzed throughout this paper. After reviewing some of the arguments, Dieterle stated that statistics based on Pas does not agree with the consequential predictions.

Fass, J. , & Fass, A. (2011). Physician-assisted suicide: Ongoing challenges for pharmacists. *American Journal of Health-System Pharmacy*, 68(9), 846-849. Jennifer Fass is a clinical assistant professor and Andrea Fass pharmacy assistant professor. They open this paper with an eye catching statement, "The pharmacist on duty at a community pharmacy in Oregon receives a phone call from a local physician who says he intends to write a prescription for a lethal dose of secobarbital to end a patient's life (Fass & Fass, 2011, p. 846). " They review the Death with Dignity Act that was created in 2008.

This states that a terminally ill patient with less than six months to live and 18 years or older has the right to request aid from a physician to assist in suicide. The code of ethics for pharmacists does not discuss physician-assisted suicide and because of this pharmacists believe that it is okay to help aid in death in order to help one die with their dignity. "A pharmacist is dedicated to protecting the dignity of their patient," and "A pharmacists promises to help individuals achieve optimum benefit from their medications, to be committed to their welfare, and to maintain their trust (Fass & Fass, 2011, p. 48). " This article was useful due to the information and informative way of giving information. Also by using some form of statistical data (more so of percentages). Lachman, V. (2010). Physician-assisted suicide: Compassionate liberation or murder? *MedSURG Nursing*, 19(2), 121-125. Vicki Lachman, a clinical associate professor at Drexel University is the author of this investigation of physician-assisted suicide and if it is considered compassionate liberation (right) or murder(

**Physician-Assisted Death** James M. Humber, Robert F. Almeder, Gregg A. Kasting, 1994-02-04 Physician Assisted Death is the eleventh volume of Biomedical Ethics Reviews We the editors are pleased with the response to the series over the years and as a result are happy to continue into a second decade with the same general purpose and zeal As in the past contributors to projected volumes have been asked to summarize the nature of the literature the prevailing attitudes and arguments and then to advance the discussion in some way by staking out and arguing forcefully for some basic position on the topic targeted for discussion For the present volume on Physician Assisted Death we felt it wise to

enlist the services of a guest editor Dr Gregg A Kasting a practicing physician with extensive clinical knowledge of the various problems and issues encountered in discussing physician assisted death Dr Kasting is also our student and just completing a graduate degree in philosophy with a specialty in biomedical ethics here at Georgia State University Apart from a keen interest in the topic Dr Kasting has published good work in the area and has in our opinion done an excellent job in taking on the lion s share of editing this well balanced and probing set of essays We hope you will agree that this volume significantly advances the level of discussion on physician assisted euthanasia Incidentally we wish to note that the essays in this volume were all finished and committed to press by January 1993

*Approaching Death* Committee on Care at the End of Life, Institute of Medicine, 1997-10-30 When the end of life makes its inevitable appearance people should be able to expect reliable humane and effective caregiving Yet too many dying people suffer unnecessarily While an overtreated dying is feared untreated pain or emotional abandonment are equally frightening *Approaching Death* reflects a wide ranging effort to understand what we know about care at the end of life what we have yet to learn and what we know but do not adequately apply It seeks to build understanding of what constitutes good care for the dying and offers recommendations to decisionmakers that address specific barriers to achieving good care This volume offers a profile of when where and how Americans die It examines the dimensions of caring at the end of life Determining diagnosis and prognosis and communicating these to patient and family Establishing clinical and personal goals Matching physical psychological spiritual and practical care strategies to the patient s values and circumstances *Approaching Death* considers the dying experience in hospitals nursing homes and other settings and the role of interdisciplinary teams and managed care It offers perspectives on quality measurement and improvement the role of practice guidelines cost concerns and legal issues such as assisted suicide The book proposes how health professionals can become better prepared to care well for those who are dying and to understand that these are not patients for whom nothing can be done

**Physician Assisted Suicide** Margaret P. Battin, Rosamond Rhodes, Anita Silvers, 2015-10-15 Physician Assisted Suicide is a cross disciplinary collection of essays from philosophers physicians theologians social scientists lawyers and economists As the first book to consider the implications of the Supreme Court decisions in *Washington v Glucksburg* and *Vacco v Quill* concerning physician assisted suicide from a variety of perspectives this collection advances informed reflective vigorous public debate

[Physician-Assisted Suicide: What are the Issues?](#) L.M. Kopelman, K.A. de Ville, 2001-11-30 *Physician Assisted Suicide What are the Issues* offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the United States and elsewhere over physician assisted suicide Two rulings by the U S Supreme Court have altered the contemporary debate on physician assisted suicide *Washington v Glucksberg* 1997 and *Vacco v Quill* 1997 In these cases the Supreme Court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide These rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal

debate over the extent of an individual's rights to control the timing manner and means of his/her death. The debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing. Responses to these issues can be divided into those who defend physician-assisted suicide and many of these other activities and those who object. But those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non-principled in that they believe there are more prudent, less disruptive or more efficient policies. The authors in this book sort out these responses and look at the assumptions underlying them. Several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists.

Physician-Assisted Death National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, 2018-09-29. The question of whether and under what circumstances terminally ill patients should be able to access life-ending medications with the aid of a physician is receiving increasing attention as a matter of public opinion and of public policy. Ethicists, clinicians, patients and their families debate whether physician-assisted death ought to be a legal option for patients. While public opinion is divided and public policy debates include moral, ethical and policy considerations, a demand for physician-assisted death persists among some patients and the inconsistent legal terrain leaves a number of questions and challenges for health care providers to navigate when presented with patients considering or requesting physician-assisted death. To discuss what is known and not known empirically about the practice of physician-assisted death, the National Academies of Sciences, Engineering and Medicine convened a 2-day workshop in Washington DC on February 12-13, 2018. This publication summarizes the presentations and discussions from the workshop.

Euthanasia and Physician-Assisted Suicide Gerald Dworkin, R. G. Frey, Sissela Bok, 1998-08-28. The moral issues involved in doctors assisting patients to die with dignity are of absolutely central concern to the medical profession, ethicists and the public at large. The debate is fuelled by cases that extend far beyond passive euthanasia to the active consideration of killing by physicians. The need for a sophisticated but lucid exposition of the two sides of the argument is now urgent. This book supplies that need. Two prominent philosophers, Gerald Dworkin and R. G. Frey, present the case for legalization of physician-assisted suicide. One of the best-known ethicists in the US, Sissela Bok, argues the case against. Death with Dignity Robert Orfali, 2011. In this book, the author makes a case for legalized physician-assisted dying. Using the latest data from Oregon and the Netherlands, he puts a new slant on perennial debate topics such as slippery slopes, the integrity of medicine and sanctity of life. This book provides an in-depth look at how we die in America today. It examines the shortcomings of our end-of-life system. You will learn about terminal torture in hospital ICUs and about the alternatives: hospice and palliative care. The author scrutinizes the good, the bad and the ugly. He provides a critique of the practice of palliative sedation. The book makes a strong case that assisted dying complements hospice. By providing both, Oregon now has the best palliative care system in America. This book, above all, may help you or someone you care about navigate this strange landscape we call end-of-life. It

can be an informed guide to a good death in the age of hospice and high tech medical intervention

**Physician-assisted Death** L. W. Sumner, 2017 The issue of physician assisted death is now firmly on the American public agenda Already legal in five states it is the subject of intense public opinion battles across the country Driven by an increasingly aging population and a baby boom generation just starting to enter its senior years the issue is not going to go away anytime soon In *Physician Assisted Death* L W Sumner equips readers with everything they need to know to take a reasoned and informed position in this important debate The book provides needed context for the debate by situating physician assisted death within the wider framework of end of life care and explaining why the movement to legalize it now enjoys such strong public support It also reviews that movement's successes to date beginning in Oregon in 1994 and now extending to eleven jurisdictions across three continents Like abortion physician assisted death is ethically controversial and the subject of passionately held opinions The central chapters of the book review the main arguments utilized by both sides of the controversy on the one hand appeals to patient autonomy and the relief of suffering on the other the claim that taking active steps to hasten death inevitably violates the sanctity of life The book then explores both the case in favor of legalization and the case against focusing in the latter instance on the risk of abuse and the possibility of slippery slopes In this context the experience of jurisdictions that have already taken the step of legalization is carefully reviewed to see what lessons might be extracted from it It then identifies some further issues that lie beyond the boundaries of the current debate but will have to be faced sometime down the road euthanasia for patients who are permanently unconscious or have become seriously demented and for severely compromised newborns The book concludes by considering the various possible routes to legalization both political and judicial Readers will then be prepared to decide for themselves just where they stand when they confront the issue both in their own jurisdiction and in their own lives

*The Future of Assisted Suicide and Euthanasia* Neil M. Gorsuch, 2009-04-12 After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia Gorsuch builds a nuanced novel and powerful moral and legal argument against legalization one based on a principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong At the same time the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present

**Physician-Assisted Suicide and Euthanasia** Sheldon Rubenfeld, Daniel P. Sulmasy, 2020-11-03 Unlike Nazi medical experiments euthanasia during the Third Reich is barely studied or taught Often even asking whether euthanasia during the Third Reich is relevant to contemporary debates about physician assisted suicide PAS and euthanasia is dismissed as inflammatory *Physician Assisted Suicide and Euthanasia Before During and After the Holocaust* explores the history of euthanasia before and during the Third Reich in depth and demonstrate how Nazi physicians incorporated mainstream Western philosophy eugenics population medicine prevention and other medical ideas into their ideology This

book reveals that euthanasia was neither forced upon physicians nor wantonly practiced by a few fanatics but widely embraced by Western medicine before being sanctioned by the Nazis Contributors then reflect on the significance of this history for contemporary debates about PAS and euthanasia While they take different views regarding these practices almost all agree that there are continuities between the beliefs that the Nazis used to justify euthanasia and the ideology that undergirds present day PAS and euthanasia This conclusion leads our scholars to argue that the history of Nazi medicine should make society wary about legalizing PAS or euthanasia and urge caution where it has been legalized *Regulating how We Die* Linda L. Emanuel,1998 Addressing the subject of euthanasia medical ethicist Dr Linda Emanuel assembles testimony from leading experts to provide not only a clear account of the arguments for and against physician assisted suicide and euthanasia but also historical empirical and legal perspectives on this complex and often heart rending issue

**Physician-Assisted Dying** Timothy E. Quill,Margaret P. Battin,2004-10-13 In this volume a distinguished group of physicians ethicists lawyers and activists come together to present the case for the legalization of physician assisted dying for terminally ill patients who voluntarily request it To counter the arguments and assumptions of those opposed to legalization of assisted suicide the contributors examine ethical arguments concerning self determination and the relief of suffering analyze empirical data from Oregon and the Netherlands describe their personal experiences as physicians family members and patients assess the legal and ethical responsibilities of the physician and discuss the role of pain depression faith and dignity in this decision Together the essays in this volume present strong arguments for the ethical acceptance and legal recognition of the practice of physician assisted dying as a last resort not as an alternative to excellent palliative care but as an important possibility for patients who seek it Holland-Frei Cancer Medicine Robert C. assisted suicide and euthanasia      **Medically Assisted Death** Robert Young, 2007-10-18 Does a competent person suffering from a terminal illness or enduring an otherwise burdensome existence who considers his life no longer of value but is incapable of ending it have a right to be helped to die Should someone for whom further medical treatment would be futile be allowed to die regardless of expressing a preference to be given all possible treatment These are some of the questions that are asked and answered in this wide ranging discussion of both the morality of medically assisted death and the justifiability of making certain instances legal A case is offered in support of the moral and legal permissibility of specified instances of medically assisted death along with responses to the main objections that have been levelled against it The philosophical argument is bolstered by empirical evidence from The Netherlands and Oregon where voluntary euthanasia and physician assisted suicide are already legal
