I. Course Description and Prerequisites

AP Biology is a college level course and will be taught as such. We will follow the College Board Course Description with only minor deviations. Students who earn a 4 or 5 on the AP Exam are well prepared for advanced work in college and, in many cases, the waiver of two semesters of freshman Biology. Students should have earned a B or higher in an introductory Biology course and a B or higher in an introductory Chemistry course before enrolling in AP Biology.

II. Course Requirements

Students are expected to complete reading assignments in the textbook prior to class. Students will also be expected to take notes on the reading assignments. Reading is essential to your success in AP Biology. I will spend class time teaching content via lecture, discussion, and hands-on activities. All reading assignments, lecture notes and class work should be kept in your class notes binder. Lab work is also a critical component of AP Biology. The eight required AP labs will be conducted throughout the year, in addition to alternative laboratory activities of my choosing. It is crucial that you keep your lab work organized in your laboratory binder. You will also use your lab binder to take notes and collect data during the lab. Tests cover multiple chapters and are listed following the course outlines
