Joining the profession. Evidence-based medicine is a
concept that is at the forefront of anaesthesia.
Clinicians are increasingly encouraged to practise
patient management based on available evidence in
the scientific literature. For example, new anaesthesia
methods, e.g. regional anaesthesia, are being used
more frequently based on case studies that show the
efficacy and cost-savings associated with the
treatment. Additionally, considering that many
anaesthetists are required to cover a range of areas,
information discussing proven methods as well as
pitfalls to avoid are valuable to all those working in the
field. This book provides a detailed summary of the
most important trials and studies in anaesthesia,
ranging from neuroanaesthesia and anaesthesia for

transplant, to paediatric and thoracic anaesthesia, allowing the reader to rapidly extract key results. Each chapter is written by a prominent anaesthetist in that particular field, and papers have been selected on a number of criteria, including impact factor, authors' choices, or even because the conclusions reached do not indicate best practice. With this wealth of information collected into this newest volume in the 'Landmark Papers in' series, Landmark Papers in Anaesthesia is essential reading for all practicing anaesthetists. There has been an exponential increase in the volume and quality of published research relating to breast disease over the past decades. This book identifies the 50 key scientific articles in the field of breast disease and breast surgery and examines their importance and impact on current clinical care. Among thousands of articles, a small fraction are truly 'game changing'. Such studies form the foundations of breast surgery today, and the selection of papers within this book provide the 50 landmark papers every 21st-century breast surgeon needs to know. A commentary to each carefully selected paper explains why these papers are so important, thus providing every surgeon with the foundation stones of knowledge in this fast-moving area. A valuable reference not only to the established surgeon, but also to breast surgery residents and trainees, as well as to more experienced surgeons as they continue to learn new techniques and approaches and to improve their knowledge of breast disease and treatments. The papers provide an

evidence-based resource for those surgeons preparing for professional exams and may inspire clinicians to produce new research. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Every medical specialty has as its basis a core of classic papers which both reflects the historical background and gives insight into its present and future developments. The selected papers in this volume highlight landmarks in the development of critical care medicine. Internationally acclaimed experts have chosen what they consider to be the most important papers in their respective subspecialties. Each entry follows a set format, starting with the abstract and the reference to the original source of publication. This is followed by analysis of the strengths and weaknesses of the paper and the contribution it has made to the development of critical care. Additional information including citation score of each paper is given together with detailed analysis of the top 500 most widely cited papers.
