Jake Adams has seemingly retired and gone fly fishing in Patagonia. But his quiet retreat is interrupted when the Agency sends a man to retrieve him to testify before a congressional committee. His testimony quickly becomes an internet sensation—not a good thing for an autonomous operative. Meanwhile, a college professor is murdered in Oregon and his colleague is nearly killed, sending him running for his life. Jake is drawn back into the shadowy world of espionage to retrieve this professor in Montana and secure his new technology that will make nuclear weapons obsolete. Eventually, Jake finds himself in South Korea in a battle for his life to secure the technology, save a beautiful congresswoman, and stop a cabal of agents from a despotic regime and misguided opportunists. Follow Jake in his most poignant adventure that could either end his life or save his own soul. Sam Adams loved intelligence work, and that enthusiasm shines throughout this memoir of his years with the Central Intelligence Agency. His career was dominated by an epic struggle over Vietnam -- over military attempts to hide the true size of the enemy forces there, and over the integrity of the intelligence process. Adams's insistence on telling the truth caused an ungodly ruckus in both Washington and Saigon at the time, and years later, after the CIA had threatened to fire him (on thirteen occasions!) and he had quit the agency in disgust, Adams brought his story back up to the surface more loudly than ever in a CBS television documentary which eventually resulted in a notorious trial on libel charges brought by General William Westmoreland. After leaving the CIA, Adams sat down to write an account of his life at the agency. There is nothing else quite like the story he tells. From the Trade Paperback edition. Jake Adams, morose and distraught, has isolated himself on the frigid island of Iceland during the heart of the Aurora Borealis. Again, he considers retiring and drifting into an alcoholic coma. But then he is summoned back to work for Spanish billionaire and benefactor, Carlos Gomez. Jake doesn't hesitate to help. Young women are disappearing in South America, and Jake now understands how that would impact him if his daughter had been taken. With the help of his old friends, Jake heads to Argentina to take up the search. Jake quickly discovers this case is more than the simple abduction of young women. A shadowy cabal of criminals has built a covert network of corruption that will make the Panama Papers look like the ramblings of a child. Can Jake and friends unravel this sophisticated network and save the girls? Can he also save himself in the process?"Akin to Ludlum and Higgins. . ."--Dale Brown, New York Times bestselling author "A damned good writer."--David Hagberg, New York Times bestselling author Follow Jake Adams on his fifth thrilling adventure in this international thriller series. Jake is back in Europe, trying his best to stay out of trouble. But that's never easy for him. What seems like a standard murder investigation turns into a complex conspiracy that will rock the institutions of Europe, and thrust Jake into an insidious plot that pits the old world of the Teutonic Order against new nanotechnology. THE FBI ARREST 12 RUSSIAN SPIES...Newspaper headlines, radio and television networks announced the startling news. A dozen or more undocumented Russian

agents were caught operating undercover within the United States. This event might well have occurred back during the last Millennium, and did, but this is 2010; the Cold War has been over for almost twenty years, or has it? Were we surprised? After all, the President of the United States had within the previous week of the arrests, hosted the President of Russia to an Official State Visit. As this book enters the final publication phase, I could not have created a more perfect, although factually unsettling, introduction to the exciting and factual story which you are about to begin. The most powerful and aggressive intelligence and secret police organizations in the world have for centuries belonged to Russia, and during the Cold War, the Soviet Union. The long and sordid history of Russian secret police operations and tactics dates back to the 17th Century and Ivan the Terrible. The Soviets, known for their paranoia and mackorova (masquerade), frequently renamed these agencies in attempts to foil foreign interests. The name changes were largely cosmetic and their foul work never changed. Soviet leaders throughout the Cold War found it expedient to pit the KGB and the GRU against one another for maximum benefit of desired objectives. Although the story herein is one of fiction, perhaps it is more appropriately one of "faction"--a fictional story derived from factual history, and as we now know persists today. Herein, I have delved into many of the factual truths about these two Cold War secret spy organizations, their sordid and brutal deeds, their recruiting, training and surveillance tactics, agent operations and exploitation of Western technologies. Enjoy! Skildring af efterretningstjenester (Spionage) og fremtidige efterretningsmæssige metoder. Four years after Chad Hunter and Frank Baldwin secured the most successful small arms weapon system in American history, the Hypershot, they are thrust back into a new adventure that propels them from Southeast Asia to Scandinavia and back to the wilderness. Sirena, an American spy, is undercover in Copenhagen when her contact is killed right in front of her, before she can get the information she needs. Now she is suddenly propelled on a journey to the American Southwest, following the killers. Meanwhile, someone is blowing up palatial estates of businessmen across the world. What's the motive? How are they doing it without detection? Then a government scientist working on one of the most secret weapons ever conceived is kidnapped. Are these series of events related? Only Sirena can find out for sure, but she must do so before the bombers strike more high-valued targets, while wrestling with her feelings for Chad. Global Shot can strike at any time without warning. Rods from God will strike down like Thor. Volume 1 of the Best Selling Jake Adams International Espionage Thriller series containing books 1-5, Fatal Network, Extreme Faction, The Dolomite Solution, Vital Force, and Rise of the Order. Jake Adams, former CIA officer and Air Force Intelligence captain, is back with a new thrilling adventure. This second installment pits Jake against some of the most idealistic terrorists ever to strap on a suicide bomb. Jake is hired by a Portland, Oregon company as a private security agent during an international agriculture conference in Odessa, Ukraine. When a world-renowned bio-chemist is murdered, Jake seeks his killer. The scientist had been the foremost authority on chemical and biological weapons, developing the most deadly agents for the former Soviet Union. But now he was supposed to be a staunch opponent of those weapons. Was he still secretly developing those deadly weapons? Across the world, a small group of terrorists poison the entire Johnston Atoll Chemical Agent Disposal System facility on the tiny North Pacific island killing scores of people, and then steal a cluster bomb with over a hundred nerve gas bomblets. Jake battles a deadly group of terrorists who will stop at nothing for their cause. EXTREME FACTION brings all the old agents from the U.S., England, Israel and Russia back together again. The names might have changed, but the games remain the same. Jake travels to the Kurdistan mountain region, where he encounters some of the most deadly, idealistic terrorists on earth. He finds a plot so diabolical, so insidious, that only the most astute would understand it. And those who would normally despise such actions, have actually embraced it this time. Only one man can stop the deadly plan...Jake Adams! Jake Adams is living on Pico Island in The Azores with his girlfriend Sirena, the former Israeli CIA officer. When he is called back to work with Spanish billionaire, Carlos Gomez, Jake is not completely on board with this mission. Something isn't adding up with his job to track down a hacker last known to be in the autonomous Basque Country of Spain. Jake and Sirena quickly

discover that they are not alone in search of this hacker who has been on the run for more than a decade. Nearly every police and intel agency in the world wants this hacker, due to both actions and words against various regimes. One person's free speech is another country's sedition. Some want the hacker in jail, while others want him dead. Follow Jake and Sirena as they track down this wanted man around the world. Could this be Jake's last mission? Jake Adams finds himself in a Tunisian prison, being held for murdering an international terrorist who happens to be well connected in that country. When a mysterious man suddenly shows up to offer him a get out of jail free card, Jake is a bit suspicious. But what choice does he have? To secure his release all he has to do is one favor for a wealthy Texas senator—find his sister who is missing somewhere in Europe. No problem. When Jake picks up a tail almost immediately after leaving Tunisia, he quickly discovers that this case might not be as easy as it seems. The case takes Jake across Italy, from Rome to the catacombs of Sicily, and finally to a harrowing rescue that could get him killed. Jake Adams is a man on the run. The former CIA officer has survived one assassination attempt already, but just barely. His girlfriend wasn't so lucky. And now someone else has tried. Jake has no choice but to go underground until he can discover who wants him dead and why. But Jake made many enemies during his career, and few friends. With a member of the Austrian polizei and a German intelligence officer as his only allies, Jake sets out across Europe, fighting to stay one step ahead of the assassins who dog his every move. What he finds could not only end his life, but could shift the balance of power in the world. Jake Adams is called back to the CIA to secure the rescue of an operative kidnapped in the Baltics, and who is missing across the border in Russia. As soon as he gets to Estonia, he quickly realizes the Russians are up to their old Cold War tricks. The Kremlin has sent tanks through Belarus and continues to fly warplanes into sovereign territory, while cruising warships off the coast of the Baltic nations. Will the Russians invade the Baltic States of Estonia, Latvia and Lithuania? If so, will NATO invoke Article Five of its charter, where an attack on one is an attack on all? Jake becomes embroiled in a complex battle over hegemony of the Baltic States that could finally force NATO to do something about an increasingly belligerent Russian leadership. For Jake, this time it's personal. The BEST of Trevor Scott, including the Jake Adams adventures Fatal Network and Lethal Froce, the Chad Hunter thriller Hypershot, the Tony Caruso mystery Burst of Sound, and the best selling novella Fractured State. Perfect for fans of Daniel Silva and Brad Thor No country can rival the sheer diversity of intelligence organizations that Germany has experienced over the past 300 years. Given its pivotal geographical and political position in Europe, Germany was a magnet for foreign intelligence operatives, especially during the Cold War. As a result of this, it is no wonder that during certain periods of history Germany was probably busier spying on its own citizens than on its enemies. Because of the Gestapo and the SS of Nazi Germany to the Stasi of the German Democratic Republic, the fear of domestic abuse by security agencies with police powers runs far deeper in German society than elsewhere in the West. The Historical Dictionary of German Intelligence presents the turbulent history of German intelligence through a chronology, a bibliography, and hundreds of cross-referenced dictionary entries on the agencies and agents, the operations and equipment, the tradecraft and jargon, and many of the countries involved. No military reference collection is

complete without it. The end of the Cold War threw the world's intelligence agencies into turmoil. Post Ames, the old security of a superpower confrontation had vanished and with the new world order came a search for a new identity and purpose for the global intelligence community. At stake was a \$50 billion international industry employing a million people. With unrivalled access to senior intelligence figures in America, Britain and Russia, from the CIA, SIS and SVR, James Adams reveals how the world of secret agencies began to evolve. In an increasingly turbulent and frightening world of terrorism, chemical warfare and economic espionage, how do secret services conduct their business when it is dictated by uncertain and destabilising political dialogue as well as internal bureaucracy and duplication of military intelligence? He examines security forces and secret agencies uncovering information vital to national security in a modern and secular world, in the midst of pressure for radical reform and greater transparency when the need for secrecy is greater than ever. Praise for the author: "James Adams goes in at the top. When he wants to write about the KGB (now called the SVR) he talks to Primakov, its chief. He sits at a table with the heads of MI5 and MI6 and interviews the head of the CIA. The result is a comprehensive guide to the changing bureaucracies of espionage, thoughtful and provocative." - Daily Telegraph "Its breadth is vast and conclusions unnerving. It is a benchmark for intelligence analysis in the aftermath of the Cold war." - Yorkshire Post "Fascinating ... valuable" - Sunday Times "Partly de-mythologizing and partly revelatory ... As reliable a general review of the world's larger intelligence agencies as you can get." -

T.L.S. James Adams was born in Newcastle in 1951 and educated at Harrow and Neuchatel University. He was trained as a journalist on the Evening Chronicle, Newcastle, and after a period working in Africa and the USA became chief reporter and then news editor on 8 Days, a magazine specialising in Middle East Affairs. He has held various positions with The Sunday Times including Defence Correspondent. He is married and lives in London. Jake Adams is pulled back into the shadow game in central Europe, where a young Austrian Polizei woman has gone missing. Jake saved Anika Senka when she was a young girl, a refugee from the Balkan Wars of the 90s. Now, a murder in Innsbruck, Austria and the disappearance of his young friend, draws Jake into a case of international intrigue. He barely gets to Austria when the shooting begins, and Jake quickly realizes this is not a simple missing person case. The complex world of countries in the European Union clash with underworld organizations exploiting a void of normalcy. With Sirena at Jake's side, they must navigate this new world and peel away the layers of bureaucracy as they battle complicit governments and opportunistic organized criminals, turning normally sedate Alpine villages into a war zone. Will Jake survive his own frustrations, along with the bullets of his enemies?" Akin to Ludlum and Higgins. . . Imagine your main business competitor building a world-class, satellite-equipped "war room" to secretly scope out and monitor your progress developing international ventures. Incredible? Imagine your classified product prototype mysteriously landing on the market under a brand name belonging to your archrival. Astounding? Aldrich Ames was a downwardly mobile CIA officer with a serious inferiority complex, and an even more serious drink problem. Yet to the KGB, he was the most important recruit since Kim Philby. And Ames was special. His betrayal would make him a multimillionaire, cause the death of at least ten of America's best agents, and single-handedly destroy a superpower's Cold War intelligence operation... On 21 February 1994, Aldrich Ames and his wife Rosario were finally arrested outside their home by the FBI. It was the end of the biggest spy hunt in American history -- and the

beginning of the biggest scandal ever to hit the CIA. But why was Ames not caught sooner? And who, in the end, was to blame? Despite requests from the FBI, during Ames's authorized contact with the Soviet Embassy officials in Washington, the Agency failed to monitor his contacts. Ames was given the perfect opportunity... There were several failings that led to Ames' ability to carry out such a monumental betrayal. Financial inquiries took much longer to undertake than was necessary; the polygraph sessions Ames was subjected to were not properly coordinated and the examiner himself had several failings; and even with Ames' deficiencies being well-known, he was still selected for assignments where he was given access to highly sensitive information. These and many other factors all contributed to Ames carrying out the biggest CIA scandal. Sell Out is the first major investigation of the Ames affair. James Adams is Washington Bureau Chief and defence correspondent of the Sunday Times, and a leading authority on covert warfare, terrorism, weapons and international relations. His other works, also published by Endeavour Press, include the 'comprehensive, thoughtful and provocative' The New Spies, The Financing of Terror, Trading in Death and Secret Armies. Born in Newcastle upon Tyne, he now lives in Washington, DC, with his wife and two children. When private security consultant Jake Adams is hired by a Portland, Oregon technology company to find one of its missing employees in Germany, Jake figures it will be an easy job. Fly to Germany, find the man shacking up with some fraulein, and report back his findings. But nothing is easy for Adams, a former CIA and Air Force intelligence officer. He quickly stumbles into a case of international corporate espionage, murder, conspiracy and a mystery that pits him against some of his most brutal foes from his intelligence days; from an aircraft carrier off the coast of Italy to the German Rhine. Can his tenacity save him from ruthless agents? Murder, suspense, and intrigue propel this third Jake Adams mystery thriller from the Dolomite mountains of northern Italy, to the winding back streets of Innsbruck, Austria, and across the Atlantic to Rhode Island's Narragansett Bay area. Two scientists have discovered the DNA link to heart disease in a remote Italian mountain village, and a way to synthesize it and begin selling it to the general public. They're up for the Nobel Prize and set to make millions after teaming up with an Austrian biotechnology company. But there are factions who make a good living off the number one killer in America, and other companies that would like the solution for themselves. When someone kills one scientist and tries for the second, trying to steal this new cure, only one man can bring The Dolomite Solution to the public...Jake Adams! When a series of events bring Chad Hunter and hot Agency super spy Sirena back together again, the action gets ramped up immediately. Chad has been hired by the Defense Department to develop a new weapon system based on the Hypershot rail gun system, with a scheduled test looming from a remote site on a volcano in Ecuador. While attending a United Nations World Conference on International Telecommunications in Brazil, Chad runs into Sirena. After a terrorist group bombs the hotel, killing a number of diplomats, and almost killing Chad and Sirena, the two of them join forces to discover who was behind the bombing. Did the bombing have anything to do with Chad's weapons test? Eventually, Sirena must choose between her allegiance with the Agency and her friendship with Chad, while both run for their lives from the remote Ecuadorian forest to the steamy shores of Columbia, fighting a brutal force of hired killers, government agents and a cabal of bureaucratic numbskulls determined to bring them both down. Jake Adams is back with his fourth thrilling adventure. When an old Cold Warrior from Russia asks Jake to observe the launch of their newest ICBM, Jake finds himself in the taiga of the Russian Far East. But something goes terribly wrong with the missile, and the Russians discover an American plane has shot down the missile with their new Airborne Laser system. This event sets into motion a chain of events that span from the U.S. capitol, California, the Pacific Northwest, a remote Aleutian Island, and across the Pacific to China and South Korea. Jake is recruited back into Network service undercover in China, where he battles with double agents, the Chinese Army, and even the elements, as he struggles to discover his enemies. Everyone wants this new laser system, but Jake must ensure it doesn't get into the wrong hands. In a harrowing finale, only one man can keep the laser system away from the other factions. . . Jake Adams! Colonel Alexandr "Sasha" Katsanov, the loyal and dedicated Soviet GRU

espionage agent, is challenged once again when KGB operatives attempt to kill him, but instead brutally murder his wife, Katiya.
