Latvia Country Study Guide - Strategic Information and Developments Volume 1 Strategic Information and Developments "Foundations in Neonatal and Pediatric Respiratory Care is unique. The approach and layout of each chapter is standardized, much like the format for scientific papers published in medical journals. Each chapter provides the reader with a thorough review of the literature on the subject, and the text is written in a clear and concise manner. Illustrations, tables, and figures enhance the learning experience. The supplemental web-based materials provide relevant, evidence-based materials to enhance the reader's current practice and prepare them for the exam"-- Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2014. This textbook is a comprehensive guide to perinatology for trainees in obstetrics, trainees in paediatrics, and neonatal nurses. Divided into seven sections, the book covers foetal wellbeing, foetal disorders, maternal illness and effects on the foetus, obstetric conditions and effects on the foetus or newborn, congenital infections, and delivery room management. The final section discusses foetal death and still birth, and placental examination. Each section is further divided into various chapters covering different topics relevant to that section. Each chapter is presented in a structured manner, with objectives clearly outlined, a concluding summary, and extensive references. Topics are covered from a multidisciplinary approach, drawing on expertise from both obstetricians and neonatologists. The book includes online access to video lectures, notes and self assessment. Obstetric Anesthesia Practice is a timely update in the field, providing a concise, evidence-based, and richly illustrated book for students, trainees, and practicing clinicians. The book comprehensively covers a robust list of topics focused to improve understanding in the field with emphasis on recent developments in clinical practices, technology, and procedures. Praise for the Fifth Edition: "This book provides a complete look at neonatal healthcare delivery...[It] includes discussions of contemporary topics of interest, such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice dialogues provide great

opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates." Score: 92, 4 Stars--Doody's Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective, with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the 'why' behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation Trauma-Informed Care Substantial revisions to the Neonatal Resuscitation Program Updates in Continuous Quality Improvement Emphasis on neuroprotective factors Emerging global trends Genomics and its relationship to precision health prevention of diseases Maternal-Fetal Units Neonatal Abstinence Syndrome and maternal drug use Leadership and cost management of the NICU Updates on neonatal care protocols and procedures, new treatments, and new trends in family-centered integrative developmental care New palliative care protocols Video clips regarding parental caregiving Parent perspectives on care Podcasts from experts in the field Highlighted callouts for Emergency Alert, Quality and Safety Issues, and Family Concerns Key Features: Complete physiologic and embryologic foundation of each neonatal body system The relevance of various diagnostic tests Integrates quality and safety as per QSEN competencies Case studies, evidence-based practice boxes, parent handouts, and online resources Authored by internationally reputed "mother" of neonatal nursing Parent Voices provide new perspective on neonatal care Kozier and Erb's Fundamentals of Nursing prepares students for practice in a range of diverse clinical settings and help them understand what it means to be a competent professional nurse in the twenty-first century. This third Australian edition has once again undergone a rigorous review and writing process. Contemporary changes in the regulation of nursing are reflected in the chapters and the third edition continues to focus on the three core philosophies: Person-centred care, critical thinking and clinical reasoning and cultural safety. Students will develop the knowledge, critical thinking and clinical reasoning skills to deliver care for their patients in ways that signify respect, acceptance, empathy, connectedness, cultural sensitivity and genuine concern. Designed for recently-graduated RNs, and nurses transitioning to a new clinical area, this extensive clinical reference is the best resource to provide essential information on the pediatric and neonatal specialty areas. Concise and practical entries provide fundamental coverage of the most common clinical problems and issues encountered in nursing practice today. Alphabetized for easy access, each entry includes a definition and description of the clinical problem; etiology; clinical aspects, such as assessment, nursing interventions, management, and implications, and outcomes. Each entry focuses on the role of the nurse throughout the treatment process, and discusses the role of other health care providers with a focus on multidisciplinary treatment. Written by outstanding authorities from all over the world, this comprehensive new textbook on pediatric and neonatal ventilation puts the focus on the effective delivery of respiratory support to children, infants and newborns. In the early chapters, developmental issues concerning the respiratory system are considered, physiological and mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed. Thereafter, the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained, with the emphasis on a practical step-by-step approach. Respiratory monitoring and safety issues in ventilated patients are considered in detail, and many other topics of interest to the bedside clinician are covered, including the ethics of withdrawal of respiratory support and educational issues. Throughout, the text is complemented by numerous illustrations and key information is clearly summarized in tables and lists. Covering the evaluation and management of every key disease and condition affecting newborns, Avery's Diseases of the Newborn, by Drs. Christine A. Gleason and Sandra E. Juul, remains your #1 source for practical, clinically relevant information in this fast-changing field. Brings you up to date on current topics such as the evolving epidemic of neonatal abstinence syndrome and the new clinical uses of ultrasound The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Management. CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios. In the field of anti-poverty policies, the interplay between the Europe 2020 overarching strategy and the 'Semester' have marked major discontinuity vis-à-vis the Open Method of Coordination for social protection and social inclusion (Social OMC) of the Lisbon phase. This book therefore asks whether and how Europe matters in the fight against poverty and social exclusion by assessing the emergence and possible institutionalisation of a European multi-level, multi-stakeholder and integrated policy arena in the new institutional framework. Supranational developments, multi-level interactions, as well as the strategy effects at the national level are analysed in six European countries - Belgium, Germany, Italy, Poland, UK and Sweden - with the aim to identify the key factors affecting the implementation of the Europe 2020 anti-poverty strategy. This book will be of key interest to students, scholars and practitioners in social policy, political science and European governance, and more broadly to European Union politics, European integrations studies, sociology and economics. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care. The year 2023 marked the tenth anniversary of Croatia's membership of the European Union, the last acceding country to the EU, and thus represents a fitting opportunity to explore the political, economic and social dimensions of this tremendous transformation. This book examines how Croatia has changed over the last ten years and looks at the driving forces as well as the obstacles on its post-accession path of Europeanisation. The book argues that the Croatian case has special importance given that the last decade of European integration has arguably been the most challenging one yet. It started with the Eurozone-wide sovereign debt crisis and ended with the economic hardship caused by the COVID-19 pandemic and Russia's aggression on Ukraine. Such demanding circumstances where agenda was often defined in an ad hoc way posed a huge test for Croatia's governmental capacity. The book provides answers to the question of how successful Croatian policymakers were in dealing with the crises-related challenges and other needed adaptations. The book explores how EU membership has affected the design and implementation of selected national public policies, the functioning of governing institutions and patterns of cooperation between main social actors. Expert contributors analyse the impact of the EU membership in two principal areas: political and economic, with individual chapters addressing relevant topics. The book is intended for researchers, academics and students interested in these issues, as well as policymakers, entrepreneurs and lobbyists concerned with European integration. Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations — all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-

highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice. This contributed volume explores flexible, adaptable, and sustainable solutions to the shockingly high costs of birth across the globe. It presents innovative and collaborative maternity care practices and policies that are intersectional, human rights-based, transdisciplinary, science-driven, and community-based. Each chapter describes participatory and midwifery-oriented care that helps improve maternal and newborn outcomes within minoritized populations. The featured case studies respond to resource constraints and inequities of access by transforming relations between providers and families or by creating more egalitarian relations among diverse providers such as midwives, obstetricians, and nurses that minimize inefficient hierarchies within maternity care. The authors build on a growing awareness that quality and respectful midwifery care has lower costs and improved outcomes for child bearers, newborns, and providers. Topics include: Sustainable collaborations including transfers of care among midwives and obstetricians in India, The Netherlands, Germany, United Kingdom, and Denmark Midwifery-oriented, femifocal, indigenous, and inclusive models of care that counter obstetric violence and gender stereotypes in Mexico, Chile, Guatemala, Argentina, and India Doula care and midwifery care for women of color, previously incarcerated women, indigenous women, and other minoritized groups in the global north and south Practices and metrics for improving quality of newborn and maternal care as well as maternal and newborn outcomes in disruptive times and disaster settings Sustainable Birth in Disruptive Times is an essential and timely resource for providers, policy makers, students, and activists with interests in maternity care, midwifery, medical anthropology, maternal health, newborn health, obstetrics, childbirth, medicine, and global health in disruptive times.
