(Kprt) This book provides a unique insight and background of a uro-oncology nurse's career from a personal and professional perspective, one that encapsulates the ever changing dynamics in the nursing profession over 40 years - 1970's to current, 2022. In writing this book, the objective is to devise a beneficial point of reference, one that is conducive to enlightening individuals within the healthcare profession and the wider context, on the art of reflection and acknowledging its benefits in terms of exploring their feelings and

understanding their meaning. Reflection is a highly beneficial tool. In this context, the process enables the author to reflect constructively on her nursing career and practice, to highlight the positive as well as the negative aspects within that practice, and illustrate how the experiences gained have contributed to her development, personally and professionally, throughout that journey. Reflection includes deliberate reflection on experience, emotions, actions and responses and acknowledging how essential these have been to informing the author's existing knowledge base and in ensuring a higher level of learning and understanding. In the continued quest to deliver optimal healthcare, the objective of reflection is in enabling healthcare individuals e.g. nursing students, newly qualified nurses or those considering change of nursing speciality, to better understand their patients from a holistic standpoint (physical, psychological, psycho-social, spiritual, cultural and economic) and ultimately, improving the individual patient's overall experience – cancer or otherwise, as well as improving and enhancing practice outcomes. The importance of reflection and its contribution to increasing the healthcare professional's self-awareness – emotional, personal and professional, is also well underlined. Various Modules and Case Studies within the book are used to explain and highlight key issues, and to enhance content and visual acuity.

Rediscover the improbable story of Christmas. Four thousand years ago, God promised he would do something through the bloodline of Abraham. Two thousand years later, Jesus was born. And two thousand years after that, we're still talking about it. Why? The story of Jesus' birth was not what anyone expected: a baby . . . born in the armpit of the Mediterranean . . . to save us from sins that no one thought we needed saving from. This Christmas season, join Andy Stanley as he unpacks why the improbability of the Christmas story is what makes it so believable. No one could have or would have made it up. Economist Joel Waldfogel illustrates how our consumer spending generates vast amounts of economic waste--to the shocking tune of \$85 billion each winter. He provides solid explanations to show us why it's time to stop the madness and think twice before buying gifts for the holidays. Gift giving is different than shopping for our own needs: we make less-informed choices, max out on credit to buy gifts worth less than the money spent, and leave recipients less than satisfied, creating what Waldfogel calls "deadweight loss." And this waste isn't confined to Americans--most major economies share in this orgy of wealth destruction. While recognizing the difficulties of altering current trends, he offers viable alternatives. By reprioritizing our

gift-giving habits, Scroogenomics proves that we can still maintain the economy without gouging our wallets, and reclaim the true spirit of the holiday season.--From publisher description.
