Designed for the one-semester human biology course, this full-color manual offers activities for 23 laboratory sessions in a variety of formats to allow the instructor to customize these exercises to the needs of their course. The lab manual's depth of coverage invites students to explore fundamental concepts of human biology in a laboratory setting. A microbiology laboratory manual designed for a one-semester, college undergraduate education. The manual is designed to be self-guided so that the students can learn and discover on their own time. This manual contains a series of experiments designed to build a student's knowledge and mastery of microbiological laboratory techniques. This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated coverage, and increased visual support to enable students to apply concepts from the Human Biology course.
