With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale

for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500 or more on a new motor. He is a big fan of "cheap power." Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours' work, you can go boating for a fraction of what everyone else has to pay. Also-for the boater who already owns an outboard motor of any age-this book demystifies these internalcombustion marvels that can bring such frustration if they malfunction. You'll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellors, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair / maintenance information at your fingertips, even when out on your boat. This is an unusual book about an unusual project in the Peruvian Amazon. It focuses on the extraordinary achievement the indigenous movement in the Upper Amazon has accomplished in establishing its own alternative health service. The work exposes a kaleidoscopic view of this fascinating process and presents the voices of the indigenous shamans,

herbalists, midwives, and healers. It also gives an account of the experiences of the nurses, doctors, promoters and patients, and the aspirations of the indigenous leaders. Addressing a range of issues in rural health care, and proposing a model for successful implementation, this volume is important for international development and rural health planners, health workers, NGO staff, researchers, doctors, and indigenous leaders. Filled with a plethora of good stories and interesting photographs, in color and black and white, this book will also be of interest to a general readership interested in indigenous affairs and ethnic studies. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Long respected as a manufacturer of sturdy agricultural machinery, the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon, Wisconsin. Starting with a lawn and garden tractor in 1963, Deere soon entered the fast-growing snowmobile market, introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather-dependent market. This detailed history, written by two key participants in the snowmobile program, describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front-engine and water-cooled models; the process of selecting engines and negotiating with suppliers, including when problems developed; and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth, and of the people and processes that made it all happen. 2 HP, 3 HP, 4 HP, 5 HP, 6 HP, 8 HP, 9.9 HP, 15 HP, 20 HP, 25 HP (Two Cylinder), 25 HP (Three Cylinder), 28 Jet, 30 HP, 35 Jet, 40 HP, 50 HP, 60 HP E60, 65 Jet, 70 HP, 75 HP, E75, 80 HP, 90 HP FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor

Piracy is a significant global threat to international sea-borne trade - the life-blood of modern industrial economies and vital for world economic survival. The pirates of today are constantly in the world's news media, preying on private and merchant shipping from small, high-speed vessels. Andrew Palmer here provides the historical background to the new piracy, its impact on the shipping and insurance industries and also considers the role of international bodies like the UN and the International Maritime Bureau, international law and the development of advanced naval and military measures. He shows how this 'new' piracy is rooted in the geopolitics and socio-economic conditions of the late-20th century where populations live on the margins and where weak or 'failed states' can encourage criminal activity and even international terrorism. Somalia is considered to be the nest of piracy, but hotspots include not only the Red Sea region, but also the whole Indian Ocean, West Africa, Latin America, Southeast Asia and the South China Seas. SELOC Marine maintenance and repair manuals offer the most comprehensive, authoritative information available for outboard, inboard, stern-drive and diesel engines, as well as personal watercraft. SELOC has been the leading source of how-to information for the marine industry since 1974.
