This is the tenth in a series of volumes based on the annual workshops on EU Competition Law and Policy held at the Robert Schuman Centre of the European University Institute in Florence. The volume reproduces the materials of the roundtable debate which examined the interaction between competition law and intellectual property law. The workshop participants - a group of senior representatives of the Commission and the national competition authorities of some EC Member States, reknowned international academics and legal practitioners - discussed the economic and legal issues that arise in this particular area of application of the EC competition rules, under the following headings: 1) whether the characteristics of intellectual property products/markets justify special treatment under the competition rules; 2) a critical assessment of the Block Exemption Regulation and corresponding Guidelines recently adopted in this area of EC competition law enforcement; 3) the specific enforcement issues

that arise in relation to patent pools and collecting societies; and 4) specific problems related to IP in the domains of merger control and application of Article 82 EC. The Evaluation Guide includes instructions for installing, configuring, and using the MicroStrategy Evaluation Edition. This guide also includes a detailed, step-by-step evaluation process of MicroStrategy features, where you perform reporting with the MicroStrategy Tutorial project and its sample business data. This book brings to bear Professor Maggiolino's considerable skills as a comparative competition law scholar on what is perhaps the single most important competition policy issue facing us today - namely, how to use IP policy and competition policy in tandem to further both economic competition and competition in innovation. Professor Maggiolino's book covers a large range of IP practices by dominant firms where competition law can be invoked, including "sham" litigation and product design, improper infringement actions, predation, and refusals to license. This book is well researched, well written, and completely up to date. Every serious competition law/antitrust and intellectual property scholar and practitioner should regard it as "must" reading. Indexes the Times, Sunday times and magazine, Times literary supplement,

Times educational supplement, Time educational supplement Scotland, and the Times higher education supplement. "Covers iPad, iPad 2, and 3rd generation iPad"--Cover. Antitrust and competition law is a fast moving area of law and the subject of extensive academic research. The aim of this volume is to select articles as tools for understanding how antitrust and competition law is applied to unilateral conduct which is harmful to the consumer and to the competitiveness of the market. The articles examine the meaning of dominance and monopolisation and show that although legal and economic rules have been developed to establish whether undertakings hold such strong market positions, it is often difficult to determine with certainty that the undertaking being investigated meets the threshold. The various debates on pricing and non-pricing conduct are also represented as are the conflicts that have arisen regarding the exercise of intellectual property rights by powerful undertakings, particularly in the context of the new economies. The volume includes scholarly articles published on both sides of the Atlantic and enables a greater understanding of the application of antitrust and competition law from the point of view of economics and politics. Harvard Law Review, Number 8 (June 2014), includes an extensive Symposium on Freedom of the Press, as well as an article, "The Criminal Court Audience in a Post-Trial World," by Jocelyn Simonson, and

"Introduction: Reflections on the First Amendment and the Information Economy," by Mark Tushnet *

Note, "A Bad Man Is Hard to Find" *

The issue includes several Recent Publications summaries.
