The World's Most Powerful Leadership Principle Apr 03 2024 To lead is not to be "the boss," the "head honcho," or "the brass." To lead is to serve. Although serving may imply weakness to some, conjuring up a picture of the CEO waiting on the workforce hand and foot, servant leadership is actually a robust, revolutionary idea that can have significant impact on an organization's performance. Jim Hunter champions this hard/soft approach to leadership, which turns bosses and managers into coaches and mentors. By "hard," Hunter means that servant leaders can be hard-nosed, even autocratic, when it comes to the basics of running the business: determining the mission (where the company is headed) and values (what the rules are that govern the journey) and setting standards and accountability. Servant leaders don't commission a poll or take a vote when it comes to these critical fundamentals. After all, that's what a leader's job is, and people look to the leader to set the course and establish standards. But once that direction is provided, servant leaders turn the organizational structure upside down. They focus on giving employees everything they need to win, be it resources, time, guidance, or inspiration. Servant leaders know that providing for people and engaging hearts and minds foster a workforce that understands the benefits of striving for the greater good. The emphasis is on building authority, not power; on exerting influence, not intimidation. While many believe that servant leadership is a wonderful, inspiring idea, what's been missing is the how-to, the specifics of implementation. Jim Hunter shows how to do the right thing for the people you lead. A servant leader or a self-serving leader: Which one are you? With Jim Hunter's guidance, everyone has the potential to develop into a leader with character who leads with authority.

Leadership Jul 06 2024 Pulitzer Prize-winning historian James MacGregor Burns has devoted his

legendary career to the study of leadership in all its aspects—from politics to business. Leadership, Burns's pioneering study, introduces the highly influential theory of "transformational leadership," stating that the best leaders are those who inspire others to come together toward the achievement of higher aims. Featuring fascinating case studies drawn from history, Leadership is the classic text for anyone seeking to understand executive decision-making, the dynamics of influence, and moral leadership.

Presidential Leadership Aug 03 2021 Koch and Fisher have updated and expanded the latter's highly respected 1984 book, *Power of the Presidency*. In *Presidential Leadership*, the authors explore the transformational style of leadership in greater depth. This theory is based on a strong, charismatic university president who leads and transforms the university through the power of his or her own vision for the future. The provocative arguments offered throughout the book are based both on empirical studies and on the authors' personal experiences as university presidents. Chapters on total quality management, presidential spouses, and fund raising are new to this edition, as are 11 appendixes offering sample materials for conducting presidential searches.

Distributed Leadership Feb 01 2024 James Spillane, the leading expert in Distributed Leadership, shows how leadership happens in everyday practices in schools, through formal routines and informal interactions. He examines the distribution of leadership among administrators, specialists, and teachers in the school, and explains the ways in which leadership practice is stretched over leaders, followers, and aspects of the situation, including routines and tools of various sorts in the organization such as memos, scheduling procedures, and evaluation protocols. This book is a volume in the Jossey-Bass Leadership Library in Education—a series designed to meet the demand for new ideas and insights about leadership in schools.

Leading Change Jul 14 2022 "[An] important new book . . . Mr. O'Toole puts soul and values squarely back into a vital topic, leadership." --Tom Peters *The New York Times Book Review* "A deeply philosophical and eminently practical study of leadership as change." --James MacGregor Burns Pulitzer Prize and National Book Award winner, and author of *Leadership* Current management philosophy advocates an outmoded Machiavellian approach to running organizations: Leaders are told in countless books that they can only accomplish their goals by being tough, manipulative, dictatorial, or paternalistic as the situation requires. In *Leading Change*, noted management theorist James O'Toole proposes a provocative new vision of leadership in the business world--a vision of leadership rooted in moral values and a consistent display of respect for all followers. As O'Toole brilliantly demonstrates, values-based leadership is not only fair and just, it is also highly effective in today's complex organizations. When leaders truly believe that their prime goal is the welfare of their followers, they get results. The finest leaders--from political giants like Washington, Jefferson, and Lincoln to contemporary CEOs like Max De Pree and James Houghton--have always shared leadership with their followers. They create organizations that encourage change and self-reevaluation; they foster an atmosphere of open-mindedness and fresh thinking, in which assumptions can be challenged and goals reassessed. Grounded in the ideas of moral philosophy, *Leading Change* powerfully transcends the standard how-to management primer to define a challenging new approach to leadership. As O'Toole so persuasively argues, growth and change are possible, indeed necessary, and they will be effected by individuals who have the stature and the courage to lead morally. This important book, at once thought-provoking and totally practical, is bound to take its place as one of the landmark business volumes of our times. "Jim O'Toole has written the essential work for organizations to survive and thrive in today's changing world. His intellectually penetrating thinking shows us how the sometimes conflicting problems we wrestle with--often in piecemeal fashion--fit together to form a complete picture, even as the picture itself continues to change. His message is so critical to the very existence of every organization that any leader who fails to heed his advice condemns his or her company to mediocrity and/or early death. It's that basic." --Warren Bennis Professor and founding chairman of the Leadership Institute at the University of Southern California Author of *An Invented Life* and *Why Leaders Can't Lead*

Growing Leaders May 31 2021 Seven out of ten Christian leaders feel overworked, four in ten suffer financial pressures, only two in ten have had management training and 1,500 give up their job over a ten-year period. It comprehensively surveys leadership skills and styles, discerning our personal calling, avoiding the 'red zone' of stress, developing character, and living as part of the community of God's people. The book contains twelve chapters, in six sections, plus a resources section: Part 1: Leadership today, Part 2: Growing leaders know they're chosen, Part 3: Growing leaders discern God's call, Part 4: Growing leaders develop Christ-like character, Part 5: Growing leaders cultivate competence, Part 6: Growing leaders lead in community. First published in 2004.

Supported by over 30 years of research, from over seventy countries, and with examples from real-world leaders, *Learning Leadership* is a clarion call to unleash the leadership potential that is already present in society today. *Learning Leadership* provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. Emerging leaders, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamentals for becoming the best leaders they can be. *Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader* is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: Believe in Yourself. Believing in oneself is the essential first step in developing leadership competencies. The best leaders are learners, and they can't achieve mastery until and unless they truly decide that inside them there is a person who can make and difference and learn to be a better leader than they are right now. Aspire to Excel. To become an exemplary leader, people must determine what they care most about and why they want to lead.

Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. Challenge Yourself. Challenging oneself is critical to learning leadership. Leaders must seek new experiences and test themselves. There will be inevitable setbacks and failures along the way that require curiosity, grit, courage, and resilience to persist in learning and becoming the best. Engage Support. One can't lead alone, and one can't learn alone. It is essential to get support and coaching on the path to achieving excellence. Whether it's family, managers at work, or professional coaches, leaders need the advice, feedback, care, and support of others. Practice Deliberately. No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of experience studying the practices of extraordinary leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.

The World's Most Powerful Leadership Principle Nov 29 2023 Author and consultant James Hunter believes that—in the midst of numerous national corporate scandals—leaders must take a fresh look at leadership through the lens of some very ancient principles. Leadership that is authentic and effective is servant leadership—following the principles revealed in the life and ministry of Jesus Christ: “Recently it struck me that if love changes people, which I know it does, it would seem to follow that God is the source of change and growth because He is love. Put another way, when people begin loving others through their efforts and behavior, God has the opportunity to work in the lives of both the giver and the receiver.” In his new book, The World’s Most Powerful Leadership Principle, Hunter demonstrates that leadership and character development are one. But the work, and even the pain, of changing one’s self-breaking old, worn-out habits—is not easy. Hunter provides an uncomplicated, straightforward, three-step change process he has seen successfully employed by literally thousands of leaders to effect change in their lives and organizations and fulfill beneficial goals. This groundbreaking book will open the eyes of frustrated, disheartened leaders at every level and foster change for good at the personal, organizational, and societal level.

Leadership without Ego Jun 12 2022 If you take a chain, pile it up and then push it, what direction will it go? Nowhere you can predict and not very far. If you take it by the end and pull it, which way will it go? It will follow you. Leadership is not about what sets you apart from those you lead—it's about what binds you together. It is not about controlling others—it's about trusting others. It's not about your achievements—it's about unleashing your team's greatness. In short, leadership really isn't about you—it's about your people. Take Bob Davids, co-author of this book and successful leader of six businesses in fields as diverse as engineering and winemaking. His achievements often came thanks to being able to refrain from acting when others might have found intervening irresistible. By trusting his employees to be better than him in their area of responsibility and letting them act, Bob unleashed the human greatness that no one else—including employees themselves—suspected. Yet to lead without acting does not mean doing nothing. It means creating conditions in which things happen by themselves. Leadership Without Ego is about a transformation of the concept of leadership in the past two decades: a change of beliefs about how best to lead, along with radically different leadership practices. The ideas in this book have already changed the fortunes of hundreds of businesses and the lives of tens of thousands of employees. They can do the same for your business, your people—and you.

Level Three Leadership Mar 10 2022 For MBA and upper-level undergraduate courses in Leadership, Organizational Behavior, and Change. This brief paperback outlines a practical,

contemporary model for making a difference as a leader in the Information Age one which goes well beyond the single, behavior-focused leadership style (Level One) typically associated with Industrial-Age organizations to encompass opportunities to influence people and their thinking (Level Two Leadership), and their values and basic assumptions about how the world operates (Level Three Leadership). Drawing on the work of a wide range of scholars and authors in the field of leadership and managing change, it integrates theory and practice to create the model and a set of related perspectives and concepts about how students can become better leaders not only in their own lives, but in their work group, and in their organizations. Questions for Reflection throughout and an innovative Workbook section help students explore their own values, assumptions, beliefs, and expectations about what it means to be an effective leader and suggest ways to grow and develop their leadership skills.

Anti-Racist Leadership Nov 05 2021 Building anti-racist companies by design creates great places to work for all. Business leaders ready to take a bold stance to make the world better for employees, for consumers, and for the greater community: Read this book. As leaders, you have the unique ability to reach thousands of employees and millions of consumers. It's time for you to build a truly diverse, equitable, and inclusive work environment and, by extension, a more just society. This book provides a comprehensive plan for leaders who are ready to get serious about diversity, equity, and inclusion (DEI) and to create an anti-racist company culture. As a Black man at the highest levels of corporate America for over thirty years, James D. White has built a deep understanding of how to operationalize and integrate DEI agendas. As CEO and Chairman of the global smoothie chain Jamba Juice, he led a remarkable turnaround to make the company a model of strong performance built on a foundation of a diverse, anti-racist culture. He also draws on the experiences of other leaders at the vanguard of DEI. White writes with his daughter, Krista White, who brings to this book the heart and sensibilities of a younger generation devoted to equity and inclusion and intent on justice. Practical lessons and real-world examples of techniques used by seasoned experts will empower leaders who, at this urgent moment, are asking themselves what so many have asked James White: What can I do? You can start by reading this book.

The Ambiguities of Experience Apr 10 2022 The first component of intelligence involves effective adaptation to an environment. In order to adapt effectively, organizations require resources, capabilities at using them, knowledge about the worlds in which they exist, good fortune, and good decisions. They typically face competition for resources and uncertainties about the future. Many, but possibly not all, of the factors determining their fates are outside their control. Populations of organizations and individual organizations survive, in part, presumably because they possess adaptive intelligence; but survival is by no means assured. The second component of intelligence involves the elegance of interpretations of the experiences of life. Such interpretations encompass both theories of history and philosophies of meaning, but they go beyond such things to comprehend the grubby details of daily existence. Interpretations decorate human existence. They make a claim to significance that is independent of their contribution to effective action. Such intelligence glories in the contemplation, comprehension, and appreciation of life, not just the control of it.—from *The Ambiguities of Experience* In *The Ambiguities of Experience*, James G. March asks a deceptively simple question: What is, or should be, the role of experience in creating intelligence, particularly in organizations? Folk wisdom both trumpets the significance of experience and warns of its inadequacies. On one hand, experience is described as the best teacher. On the other hand, experience is described as the teacher of fools, of those unable or unwilling to learn from accumulated knowledge or the teaching of experts. The disagreement between those folk aphorisms reflects profound questions about the human pursuit of intelligence through learning from experience that have long confronted philosophers and social scientists. This book considers the unexpected problems organizations (and the individuals in them) face when they rely on experience to adapt, improve, and survive. While acknowledging the power of learning from experience and the extensive use of experience as a basis for adaptation and for constructing stories and models of history, this book examines the problems with such learning. March argues that although individuals

and organizations are eager to derive intelligence from experience, the inferences stemming from that eagerness are often misguided. The problems lie partly in errors in how people think, but even more so in properties of experience that confound learning from it. "Experience," March concludes, "may possibly be the best teacher, but it is not a particularly good teacher."
