**Autocar** ,2005     Hydrogen Technology Aline Léon,2008-07-18 Aline Leon In the last years public attention was increasingly shifted by the media and world governments to the concept of saving energy reducing pollution protecting the environment and developing long term energy supply solutions In parallel research funding relating to alternative fuels and energy carriers is increasing on both national and international levels Why has future energy supply become such a matter of concern The reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels In fact the energy stored in hydrocarbon based solid liquid and gaseous fuels was and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in residential and industrial sectors and for the production of fertilizers in agriculture as it is convenient abundant and cheap However such a widespread use of fossil fuels by a constantly growing world population from 2.3 billion in 1939 to 6.5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation The problem related to oil supply is caused by the fact that fossil fuels are not renewable primary energy sources This means that since the first barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature

*Plug-in Hybrids* Sherry Boschert,2006 A politically polarized America is coming together over a new kind of car the plug in hybrid that will save drivers money reduce pollution and increase US security by reducing dependence on imported oil Plug in Hybrids points out that where hydrogen fuel cell cars won't be ready for decades the technology for plug in hybrids exists today Unlike conventional hybrid cars that can't run without gasoline plug in hybrids use gasoline or cheaper cleaner domestic electricity or both Although plug in hybrids are not yet for sale demand for them is widespread coming from characters across the political spectrum such as Chelsea Sexton the automotive insider working for General Motors Sexton fought attempts to destroy the all electric EV1 car and describes how car companies are resisting plug in hybrids and why they'll make them anyway Felix Kramer and the tech squad Kramer started a nonprofit organization using the Internet to tap into a small army of engineers who built the first plug in Prius hybrids R James Woolsey former CIA director and national security hawk seeing the end of oil supplies looming Woolsey is demanding plug in hybrids to wean us from petroleum Cautioning that the oil and auto companies know how to undermine the success of plug in car programs to protect their interests the book gives readers tools to ensure that plug in hybrids get to market and stay here

**Making Choices about Hydrogen** Lynn Krieger Mytelka, Grant Boyle,2008 Since the mid 1990s the emergence of a hydrogen economy and the speed with which it will arrive have been vigorously debated As a disruptive

technology dominant designs for the production storage and distribution of hydrogen have not yet been established Neither have performance characteristics been achieved to compete with the existing combustion engine though the efficiency and durability of hydrogen fuel cells are improving This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy environment and transport sector Publisher s description
