Micro/Nano Devices for Blood Analysis Rui A.

Lima, Graça Minas, Susana Catarino, 2019-12-03 The development of micro and nanodevices for blood analysis is an interdisciplinary subject that demands the integration of several research fields such as biotechnology medicine chemistry informatics optics electronics mechanics and micro nanotechnologies Over the last few decades there has been a notably fast development in the miniaturization of mechanical microdevices later known as microelectromechanical systems MEMS which combine electrical and mechanical components at a microscale level The integration of microflow and optical components in MEMS microdevices as well as the development of micropumps and microvalves have promoted the interest of several research fields dealing with fluid flow and transport phenomena happening in microscale devices Microfluidic systems have many advantages over their macroscale counterparts offering the ability to work with small sample volumes providing good manipulation and control of samples decreasing reaction times and allowing parallel operations in one single step As a consequence microdevices offer great potential for the development of portable and point of care diagnostic devices particularly for blood analysis Moreover the recent progress in nanotechnology has contributed to its increasing popularity and has expanded the areas of application of microfluidic devices including in the manipulation and analysis of flows on the scale of DNA proteins and nanoparticles nanoflows In this Special Issue we invited contributions original research papers review articles and brief communications that focus on the latest advances and challenges in micro and nanodevices for diagnostics and blood analysis micro and nanofluidics technologies for flow visualization MEMS biochips and lab on a chip devices and their application to research and industry We hope to provide an opportunity to the engineering and biomedical community to exchange knowledge and information and to bring together researchers who are interested in the general field of MEMS and micro nanofluidics and especially in its applications to biomedical areas
