

Unit 5 Worksheet 4

Name:

Determining Molecular Polarity: Molecules are either Polar or Non-Polar. Determined by:

If all of the bonds are all ionic → the polarity is just "Ionic"

If all of the bonds are non-polar covalent → then the polarity of the molecule is non-polarIf all one of the bonds are polar → then the polarity of the molecule is polar

If there are more than one bond that is polar, then look at symmetry

- If the shape is linear, tetrahedron, or trigonal planar and all bonds are the same, then it is a non-polar molecule and it has symmetry.
- If the shape is pyramid, linear, or bent, then it is a polar molecule, and the molecule is Not symmetrical.

Fill in the following table:

Compound	Molecule Dot Diagram	Bond Type	Shape	Symmetry	Molecular Polarity
H ₂		H-H NPC	Linear	Yes	Non Polar Molecule
N ₂		N-N NPC	Linear	Yes	Non Polar Molecule
O ₂		O-O NPC	Linear	Yes	Non Polar Molecule
CaCl ₂		I	No Shape	None	Ionic
CO		C-O PC	Linear	No	Polar Molecule
CH ₄		C-H NPC	Tetrahedron	Yes	Non Polar Molecule
CO ₂		C-O PC	Linear	Yes	Non Polar Molecule
NH ₃		N-H PC	Pyramid	No	Polar Molecule
NO ₂		N-O NPC	Pyramid	No	Non Polar Molecule
CF ₄		C-F PC	Tetrahedron	Yes	Non Polar Molecule

Neth, William R. Robinson, 2019-02-14 Chemistry 2e is designed to meet the scope and sequence requirements of the two semester general chemistry course The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them The book also includes a number of innovative features including interactive exercises and real world applications designed to enhance student learning The second edition has been revised to incorporate clearer more current and more dynamic explanations while maintaining the same organization as the first edition Substantial improvements have been made in the figures illustrations and example exercises that support the text narrative Changes made in Chemistry 2e are described in the preface to help instructors transition to the second edition **Chemistry 2e** Paul Flowers, Richard Langley, William R. Robinson, Klaus Hellmut Theopold, 2019-02-14 Chemistry 2e is designed to meet the scope and sequence requirements of the two semester general chemistry course The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world around them The book also includes a number of innovative features including interactive exercises and real world applications designed to enhance student learning The second edition has been revised to incorporate clearer more current and more dynamic explanations while maintaining the same organization as the first edition Substantial improvements have been made in the figures illustrations and example exercises that support the text narrative Changes made in Chemistry 2e are described in the preface to help instructors transition to the second edition **Chemistry** Steven S. Zumdahl, Susan A. Zumdahl, 2012 Steve and Susan Zumdahl's texts focus on helping students build critical thinking skills through the process of becoming independent problem solvers They help students learn to think like a chemist so they can apply the problem solving process to all aspects of their lives In CHEMISTRY AN ATOMS FIRST APPROACH 1e International Edition the Zumdahls use a meaningful approach that begins with the atom and proceeds through the concept of molecules structure and bonding to more complex materials and their properties Because this approach differs from what most students have experienced in high school courses it encourages them to focus on conceptual learning early in the course rather than relying on memorization and a plug and chug method of problem solving that even the best students can fall back on when confronted with familiar material The atoms first organization provides an opportunity for students to use the tools of critical thinkers to ask questions to apply rules and models and to Ionic Compounds Claude H. Yoder, 2007-01-09 A practical introduction to ionic compounds for both mineralogists and chemists this book bridges the two disciplines It explains the fundamental

principles of the structure and bonding in minerals and emphasizes the relationship of structure at the atomic level to the symmetry and properties of crystals This is a great reference for those interested in the chemical and crystallographic properties of minerals

An Introduction to Chemistry Michael Mosher, Paul Kelter, 2023-03-18 This textbook is written to thoroughly cover the topic of introductory chemistry in detail with specific references to examples of topics in common or everyday life It provides a major overview of topics typically found in first year chemistry courses in the USA The textbook is written in a conversational question based format with a well defined problem solving strategy and presented in a way to encourage readers to think like a chemist and to think outside of the box Numerous examples are presented in every chapter to aid students and provide helpful self learning tools The topics are arranged throughout the textbook in a traditional approach to the subject with the primary audience being undergraduate students and advanced high school students of chemistry

Introductory Chemistry Nivaldo J. Tro, 2023 This book is for you and every text feature is meant to help you learn and succeed in your chemistry course I wrote this book with two main goals for you in mind to see chemistry as you never have before and to develop the problem solving skills you need to succeed in chemistry I want you to experience chemistry in a new way I have written each chapter to show you that chemistry is not just something that happens in a laboratory chemistry surrounds you at every moment Several outstanding artists have helped me to develop photographs and art that will help you visualize the molecular world From the opening example to the closing chapter you will see chemistry My hope is that when you finish this course you will think differently about your world because you understand the molecular interactions that underlie everything around you My second goal is for you to develop problem solving skills No one succeeds in chemistry or in life really without the ability to solve problems I can't give you a one size fits all formula for problem solving but I can and do give you strategies that will help you develop the chemical intuition you need to understand chemical reasoning
