FM 5-0 (including Change 1), The Operations Process, constitutes the Army's view on planning, preparing, executing, and assessing operations. It describes how commanders-supported by their staffs, subordinate commanders, and other military and civilian partners-exercise mission command during the conduct of full spectrum operations. It describes how design assists commanders with understanding complex problems and developing an operational approach to solve or manage those problems throughout the conduct of operations. This manual applies to all Army forces. The principal audience for this manual is Army commanders and unit staffs (officers, noncommissioned officers, and Soldiers). Commanders and staffs of Army headquarters serving as a joint task force or a multinational headquarters should also refer to applicable joint or multinational doctrine for the exercise of command and control. Trainers and educators throughout the Army also use this manual. Terms that have joint or Army definitions are identified in both the glossary and the text. Glossary references: The glossary lists most terms used in field manual (FM) 5-0 that have joint or Army definitions. Terms for which FM 5-0 is the proponent field manual (the authority) are indicated with an asterisk in the glossary. Text references: Definitions for which FM 5-0 is the proponent field manual are printed in boldface in the text. These terms and their definitions will be incorporated into the next revision of FM 1-02, Operational Terms and Graphics. For other definitions in the text, the term is italicized and the number of the proponent manual follows the definition. FM 5-0 applies to the Active Army, the Army National Guard (ARNG)/Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. Topics: Ch1 - Fundamentals of the Operations Process Ch2 - Planning Ch3 - Design Ch4 - Preparation Ch5 - Execution Ch6 - Assessment Appendix A - Command Post Organization and Operations Appendix B - The Military Decision Making Process Appendix C - Troop Leading Procedures Appendix D - Guidelines for Commander's Planning Guidance Appendix E - Army Operation Plan and Order Format Appendix F - Task Organization Appendix G - Running Estimates Appendix H - Formal Assessment Plans Appendix I - Rehearsals Appendix J - Military Briefings In addition to reprinting the PDF of the CMS CoPs and Interpretive Guidelines, we include key Survey and Certification memos that CMS has issued to announced changes to the emergency preparedness final rule, fire and smoke door annual testing requirements, survey team composition and investigation of complaints, infection control screenings, and legionella risk reduction. The 1992 edition of the FM 34-52 Intelligence Interrogation Field Manual. PURPOSE This manual provides direction for the corps headquarters: what it looks like, how it is organized, how its staff operates, how it is commanded and controlled, and how it operates in full spectrum operations. This publication replaces the previous edition of the Army's corps operations manual and describes the organization and operations of the corps. It reflects current doctrine on the elements of full spectrum operations: offense, defense, and stability or civil support. This manual addresses these elements without regard to priority. This manual- * Incorporates the Army's operational concept, full spectrum operations. * Describes the stand alone corps headquarters. * Links brigade combat team and division doctrine with theater army doctrine. It describes the principles underlying the Army modular corps. * Shows a corps headquarters designed for four primary employment roles-in priority-an Army intermediate tactical headquarters, an ARFOR, a joint force land component command headquarters, and a joint task force headquarters. * Recognizes that the corps headquarters normally requires augmentation with elements from theater-level organizations for selected missions. * Discusses when serving as a joint task force or joint force land component command, the corps may require a separate subordinate headquarters to serve as the ARFOR or may need augmentation to serve as both the joint headquarters and the ARFOR. * Introduces a staff organization that reflects the warfighting functions discussed in Field Manual (FM) 3-0.* Describes the three designated command and control facilities: main command post, tactical command post, and mobile command group. * Describes the ability of the corps headquarters to readily accept joint augmentation from a standing joint force headquarters core element or other joint manning and equipping source. SCOPE This publication is organized into five chapters and five appendixes: * Chapter 1 introduces the modular corps headquarters concept. * Chapter 2 discusses how the corps headquarters is organized. * Chapter 3 describes corps command and control. * Chapter 4 describes how the corps headquarters conducts full spectrum operations. * Chapter 5 details how a corps headquarters transitions to the headquarters of a joint task force or joint force land component command. * Appendix A explains sustainment in support of the corps headquarters. * Appendix B discusses how the corps plans, prepares, executes, and assesses joint fires. * Appendix C describes how the Army Network Enterprise Technology

Command/9th Signal Command and other organizations support LandWarNet operations for the corps headquarters. * Appendix D describes how the corps headquarters conducts airspace command and control. * Appendix E describes Air Force planning considerations for corps operations. Problems stemming from the misuse and abuse of alcohol and other drugs are by no means a new phenomenon, although the face of the issues has changed in recent years. National trends indicate substantial increases in the abuse of prescription medications. These increases are particularly prominent within the military, a population that also continues to experience long-standing issues with alcohol abuse. The problem of substance abuse within the military has come under new scrutiny in the context of the two concurrent wars in which the United States has been engaged during the past decade-in Afghanistan (Operation Enduring Freedom) and Iraq (Operation Iraqi Freedom and Operation New Dawn). Increasing rates of alcohol and other drug misuse adversely affect military readiness, family readiness, and safety, thereby posing a significant public health problem for the Department of Defense (DoD). To better understand this problem, DoD requested that the Institute of Medicine (IOM) assess the adequacy of current protocols in place across DoD and the different branches of the military pertaining to the prevention, screening, diagnosis, and treatment of substance use disorders (SUDs). Substance Use Disorders in the U.S. Armed Forces reviews the IOM's task of assessing access to SUD care for service members, members of the National Guard and Reserves, and military dependents, as well as the education and credentialing of SUD care providers, and offers specific recommendations to DoD on where and how improvements in these areas could be made.
