Desperate to find her mother and beloved brother, Felix, she uses her greatest gift, her knowledge of English, to navigate the vast web of humanitarian aid groups. Along the way, she meets the charismatic one-legged teenager, Robert, who takes her on an adventure with a film crew which becomes her lifeline back home. Luna, Therese's mother, has been taken as a slave and concubine to the handsome and evil leader of the militia, The General. In a harrowing act of bravery, she uses her own knowledge of languages to make the difficult choice to escape into the mountainous jungle. In her struggle to reunite with Therese and Felix, some of the least likely people become her friends. With its themes of women's empowerment, *Unnatural Resources* is a stunning and unflinchingly brutal redefinition of the meaning of family. After the End of Art Aug 16 2021 The classic and provocative account of how art changed irrevocably with pop art and why traditional aesthetics can't make sense of contemporary art A classic of art criticism and philosophy, *After the End of Art* continues to generate heated debate for its radical and famous assertion that art ended in the 1960s. Arthur Danto, a philosopher who was also one of the leading art critics of his time, argues that traditional notions of aesthetics no longer apply to contemporary art and that we need a philosophy of art criticism that can deal with perhaps the most perplexing feature of current art: that everything is possible. An insightful and entertaining exploration of art's most important aesthetic and philosophical issues conducted by an acute observer of contemporary art, *After the End of Art* argues that, with the eclipse of abstract expressionism, art deviated irrevocably from the narrative course that Vasari helped define for it in the Renaissance. Moreover, Danto makes the case for a new type of criticism that can help us understand art in a posthistorical age where, for example, an artist can produce a work in the style of Rembrandt to create a visual pun, and where traditional theories cannot explain the difference between Andy Warhol's Brillo Box and the product found in the grocery store. *After the End of Art* addresses art history, pop art, "people's art," the future role of museums, and the critical contributions of Clement Greenberg, whose aesthetics-based criticism helped a previous generation make sense of modernism. Tracing art history from a mimetic tradition (the idea that art was a progressively more adequate representation of reality) through the modern era of manifestos (when art was defined by the artist's philosophy), Danto shows that it wasn't until the invention of pop art that the historical understanding of the means and ends of art was nullified. Even modernist art, which tried to break with the past by questioning the ways in which art was produced, hinged on a narrative.

Hoosiers and the American Story May 25 2022 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

How Tobacco Smoke Causes Disease Mar 03 2023 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The Shapes of Knowledge from the Renaissance to the Enlightenment Dec 20 2021 The original idea for a conference on the

"shapes of knowledge" dates back over ten years to conversations with the late Charles Schmitt of the Warburg Institute. What happened to the classifications of the sciences between the time of the medieval Studium and that of the French Encyclopedie is a complex and highly abstract question; but posing it is an effective way of mapping and evaluating long term intellectual changes, especially those arising from the impact of humanist scholarship, the new science of the seventeenth century, and attempts to evaluate, to apply, to reconcile, and to institutionalize these rival and interacting traditions. Yet such patterns and transformations cannot be well understood from the heights of the general history of ideas. Within the general framework of the organization of knowledge the map must be filled in by particular explorations and soundings, and our project called for a conference that would combine some encyclopedic (as well as interdisciplinary and international) breadth with scholarly and technical depth.
