Have you ever heard someone say, "There's no instruction manual to life!! You just have to figure it out." Well now, you're holding one. It's a collection of books by Michael Dow. Within this collection are the basics or fundamental building blocks that every society can apply. For instance, the first book is The Pen and Paper Diet which shows you have to manage your weight using basic math no matter what you eat. These books don't tell you how to live, but rather what you are doing as you live. Knowing this information and integrating it will help you understand things about your life like weight control and financial management as well as how to develop stronger family bonds with your loved ones. It will also help you develop more skills to increase the quality of your life for you and your family. This information is just a key to help unlock the Good Life. One of Fuller's most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future. Description by Lars Muller Publishers, courtesy of The Estate of Buckminster Fuller Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database. Physical Management for Neurological Conditions comprehensively covers the essentials of neurorehabilitation starting with thirteen guiding principles, and a new chapter on clinical reasoning and assessment. It discusses the physical management of common neurological conditions such as stroke, traumatic brain injury, spinal cord injury, multiple sclerosis and Parkinson's followed by less common conditions such as inherited neurological conditions, motor neuron disease, polyneuropathies and muscle disorders. Produced by a team of international editors and experts, this fifth edition is the most up-to-date evidence-based textbook available for undergraduate students and qualified health professionals alike, focusing on selecting appropriate evidence-based tools rather than subscribing to any specific treatment approaches. It is a core physiotherapy textbook designed to provide students with everything they need to pass the neurological component of their degree. Fully updated to provide comprehensive information on optimal physical management within movement limitations suitable for any health care context or environment Using international case studies to apply theory to clinical practice Easy to navigate and understand - for students, new graduates and therapists returning to practice or changing scope of practice. New content on assessment, clinical reasoning, technology-based rehabilitation, and complex case management including disorders of consciousness and adults with cerebral palsy Full update of the evidence-base within each chapter, including reference to the increased use of remote delivery of services and challenges accelerated by the Covid-19 pandemic New international authors The Owner's Manual to the Voice demystifies the voice, enabling singers and all voice professionals - whether actors, broadcasters, teachers, preachers, lawyers, public speakers- to communicate intelligently with physicians and understand dangers, treatments, vocal hygiene and medical procedures.
