Aging and the Macroeconomy National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population, 2013-01-10 The United States is in the midst of a major demographic shift In the coming decades people aged 65 and over will make up an increasingly large percentage of the population The ratio of people aged 65 to people aged 20 64 will rise by 80% This shift is happening for two reasons people are living longer and many couples are choosing to have fewer children and to have those

children somewhat later in life The resulting demographic shift will present the nation with economic challenges both to absorb the costs and to leverage the benefits of an aging population Aging and the Macroeconomy Long Term Implications of an Older Population presents the fundamental factors driving the aging of the U S population as well as its societal implications and likely long term macroeconomic effects in a global context The report finds that while population aging does not pose an insurmountable challenge to the nation it is imperative that sensible policies are implemented soon to allow companies and households to respond It offers four practical approaches for preparing resources to support the future consumption of households and for adapting to the new economic landscape

Ludwig Boltzmann Carlo Cercignani, 2006-01-12 This book presents the life and personality the scientific and philosophical work of Ludwig Boltzmann one of the great scientists who marked the passage from 19th to 20th Century physics His rich and tragic life ending by suicide at the age of 62 is described in detail A substantial part of the book is devoted to discussing his scientific and philosophical ideas and placing them in the context of the second half of the 19th century The fact that Boltzmann was the man who did most to establish that there is a microscopic atomic structure underlying macroscopic bodies is documented as is Boltzmann s influence on modern physics especially through the work of Planck on light quanta and of Einstein on Brownian motion Boltzmann was the centre of a scientific upheaval and he has been proved right on many crucial issues He anticipated Kuhn s theory of scientific revolutions and proposed a theory of knowledge based on Darwin His basic results when properly understood can also be stated as mathematical theorems Some of these have been proved others are still at the level of likely but unproven conjectures The main text of this biography is written almost entirely without equations Mathematical appendices deepen knowledge of some technical aspects of the subject

the three block war Following TF 58 s deployment during the initial take down of the Taliban regime the MAGTF made few appearances in Afghanistan until 2008 Before then subsequent Marine units often deployed as a single battalion under the command of the U S Army Combined Joint Task Force CJTF to provide security for provincial reconstruction teams The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police Aviation assets sporadically deployed to support the U S led coalition mostly to conduct a specific mission or to bridge a gap in capability such as close air support or electronic warfare to counter the improvised explosive device threat From 2003 to late 2007 the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency largely centered in the restive al Anbar Province As a result of the North Atlantic Treaty Organization NATO taking over command of Afghan operations and Marine Corps commitments in Iraq relatively few Marine units operated in Afghanistan from late 2006 to 2007 Although Marines first advocated shifting resources from al Anbar to southern Afghanistan in early 2007 the George W Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H Petraeus surge strategy in Iraq By late 2007 the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story How We Lost the War We Won In recognition of the shifting tides in both Iraq and Afghanistan the Bush administration began to transfer additional resources to Afghanistan in early 2008 The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign even proposing to take over the Afghan mission from the Army
