Student engagement in Europe: society, higher education and student governance (Council of Europe Higher Education Series No. 20) Oct 16 2022 Democratic institutions and laws are essential, but they cannot bring about democracy on their own. They will only function if they build on a culture of democracy, and our societies will not be able to develop and sustain such a culture unless education plays an essential role. Student engagement is crucial: democracy cannot be taught unless it is practised within institutions, among students and in relations between higher education and society in general. This 20th volume of the Council of Europe Higher Education Series demonstrates the importance of student engagement for the development and maintenance of the democratic culture that enables democratic institutions and laws to function in practice. This volume covers three aspects of student engagement that are seldom explored: its role in society through political participation and civic involvement; its place in higher education policy processes and policy-making structures; and how student unions represent the most institutionalised form of student engagement. The authors are accomplished scholars, policy makers, students and student leaders.

Intra-European Student Mobility in International Higher Education Circuits Apr 09 2022 Adopting an interdisciplinary approach, this book empirically investigates the (im)mobility decisions, social network formation, sense of European identity and migratory aspirations of higher education students. It draws on a large-scale survey, in-depth interviews and focus groups, conducted in Austria, Belgium, Italy, Norway, Poland and the UK.

Social and Economic Conditions of Student Life in Europe: Synopsis of Indicators - Final Report - Eurostudent III 2005-2008 Feb 05 2022 Abstract: The EUROSTUDENT report is based on a unique dataset covering more than 120,000 students in 23 European countries. The surveyed students provided information on the social and economic conditions of their life. In essence, the EUROSTUDENT dataset describes a biography from entrance into a higher education system, to study conditions during studies, and finally to exit from the higher education system. Additionally, it covers temporary international mobility. The analysis offers the chance to review common practices and their effectiveness in the light of European trends and with the insight that alternatives are possible and, in some cases, actually being practiced by neighbouring countries

Treasures from Europe Jun 23 2023 This fabulous collection of nine European folktales, presented by well-known storytellers with European roots, makes a perfect teaching tool to help educators, librarians, and storytellers acquaint students with different European countries and cultures. These stories, along with an abundance of related classroom activities, will allow students to gain a greater understanding and appreciation of European values, customs, and cultural elements. Each story is accompanied by background information about the contributor, discussion questions, and numerous related follow-up activities that are easily adaptable to different levels and learning environments. There are also reproducible pages for student use, as well as information about the country and its people, a brief historical background, a glossary where applicable, and resources for further study. A valuable teaching tool and timesaver, this book is an excellent vehicle for cultural exploration in classrooms or with listening audiences.

Student Migration from Eastern to Western Europe Jan 07 2022 This book explores European student migration from the perspectives of Eastern European students moving to Western Europe for study. Whilst most research on student migration in Europe focuses on the experiences of Western European students, this book uniquely casts a light on Eastern European student migrants moving to the 'West'. Mette Ginnerskov-Dahlberg deploys a novel approach to the subject by drawing on insights gleaned from a longitudinal study of master's students pursuing an education abroad and their multifaceted journeys after graduation. Thereby, she brings their narratives to life and highlights the changes and continuities they experienced over a period of seven years, fostering an understanding of student mobility as an activity enmeshed with adult commitments and long-term aspirations. Using Denmark as a case study of a host country, Ginnerskov-Dahlberg analyses the trajectories of these students and situates their experiences within the wider socio-historical context of Eastern European post-socialism and the contemporary dynamics between EU and non-EU citizens in the welfare state of Denmark – reflecting issues playing out on the global stage today. This book will be a valuable resource for students and scholars of migration and mobility studies, as well as human geography, sociology, higher education, area studies and anthropology.

ESU Activity Report 2011 Dec 18 2022 European Students' Union (ESU) has been representing students since 1982. In these, almost 30 years, ESU has been going from strength to strength as a European organisation. Each year has been crucial. This report brings to the fore its notable achievements and work done in 2011. The carousel of higher education reform on the national level was at full speed in 2011. Almost all of ESU's member unions were campaigning throughout

the year on national issues. Yet at the same time, members' contribution to the European student movement has grown. ESU has been tirelessly advocating for education as a solution to societal and economic challenges. And ESU did see a tipping point when major international organisations adapted to its policy line. Students all over Europe should take credit and campaign further to advocate, but also campaign to stop the bill being pushed over to future generations and youth. In the EU budget proposal for 2014-20, higher education and research are the areas with significant increases in budget while almost everything else has been frozen. Even though the higher education budget of some 19 billion Euro is peanuts in the total budget, this should be seen as an important political message that national governments should support and follow. Indeed, ESU has made funding of higher education its priority and it will keep it highest on the agenda until it sees some results.

Quality of School Life and Student Outcomes in Europe Apr 29 2021 This report provides an analytical framework for measuring EU students' perceptions of the quality of their school life. It does so by adapting existing concepts and measurement tools to the school-related well-being data gathered by the OECD Programme for International Student Assessment (PISA) in 2018. Building on the social-structural perspective of the quality of school life and using individual data from 189 468 15-year-old EU students from the PISA 2018 assessment cycle, the study offers a structured model for measuring the quality of school life as a multidimensional construct. This involves students' sense of opportunity and achievement, the quality of their interpersonal relationships with their teachers, their exposure to a safe and cooperative learning environment, and their overall sense of belonging to the school and school community.

Social and Economic Conditions of Student Life in Europe Dec 30 2023 The project EUROSTUDENT has been delivering data on the social and economic conditions of student life in Europe for the past 20 years. The current edition presents the data and results from the period 2018 to 2021, and is based on information provided by students from 25 countries in the European Higher Education Area (EHEA). The project also examines the social dimensions of studying at

a higher education institute, as well as, in part, the impact of COVID-19. The EHEA emphasised this social dimension in its 2020 Rome Communiqué; it was therefore one of the key topics the project group focused on with the aim of inspiring education policy debates and establishing the basis for future research work. The latest report therefore includes data on access to higher education and the respective conditions experienced by the students, their willingness to relocate internationally to pursue their studies, the quality of higher education courses and the planned courses of study. The report is the EUROSTUDENT project's most important publication, and is developed by a network of researchers and national ministry representatives as well as other stakeholders from all over Europe. Seit 20 Jahren liefert das Projekt EUROSTUDENT Daten zu den sozialen und wirtschaftlichen Bedingungen für Studierende in Europa. Der aktuelle Band präsentiert die Daten und Ergebnisse aus dem Zeitraum 2018-2021, die bei Studierenden in 25 Ländern des Europäischen Hochschulraums (EHEA) erhoben wurden. Untersucht wurden dabei auch die gesellschaftlichen Dimensionen des Studiums sowie teilweise soziale Auswirkungen von COVID-19. Die soziale Dimension des Studiums, die im Rom Communiqué der EHEA 2020 betont wurde, ist ein zentrales Thema der Untersuchungen, mit denen die Projektgruppe bildungspolitische Debatten anregen und die Basis für künftige Forschungsarbeit legen will. Daher werden Daten zum Zugang zu höherer Bildung, zu Studienbedingungen, zur internationalen Mobilität der Studierenden, zur Qualität von Studiengängen und zu geplanten Studienprogrammen aufbereitet. Der Bericht ist die wichtigste Publikation des Projektes EUROSTUDENT, das von einem Netzwerk aus Forscher:innen und Vertreter:innen nationaler Ministerien sowie weiterer Stakeholder aus ganz Europa erarbeitet wird.

Internationalisation of European Higher Education: "An EUA/ACA Handbook" Mar 28 2021 "Approaching the issue of internationalisation from an institutional perspective, and specifically designed as a source of information and references, this new handbook will be a valuable tool for any higher education institution. The handbook is published as a loose-leaf edition consisting of a basic edition and regular supplements (hard copy plus CD-ROM), all collected in a ring folder. A "must have" for those involved in developing and implementing internationalisation strategies and measures, including university executives and international office managers. It will also be an invaluable source of references for a larger group of policy makers interested in the internationalisation issue in a wider European context. The handbook focuses on the practical and operational key issues of relevance to European higher education, placing them in the context of global developments and overarching policy processes. In addition, it will facilitate the discussion regarding the goals of internationalisation at the institutional level and their implementation."--Editor.

Europe in the Classroom Aug 02 2021 This book provides an unconventional account of post-1989 education reform in Romania. By drawing on policy documentation, interviews with key players, qualitative data from everyday school contexts, and extensive textbook analysis, this groundbreaking study explores change within the Romanian education system as a process that institutionalises world culture through symbolic mediation of the concept 'Europe'. The book argues that the education system's structural and organisational evolution through time is decoupled from its self-depiction by ultimately serving a nation-building agenda. It does so despite notable changes in the discourse reflecting increasingly transnational definitions of the mission of the school in the post-1989 era. The book also suggests that the notions of 'nation' and 'citizen' institutionalised by the school are gradually being redefined as cosmopolitan, matching post-war patterns of post-national affiliations on a worldwide level.

Brazilian Portuguese student activities manual Aug 26 2023 There is a Brazilian version and European Portuguese version of the Student Activities Manual. The organization of the Student Activities Manual follows that of the main text, providing further practice of each chapter's vocabulary and grammatical structures through sentence-building and completion exercises, fill-ins, and art- and realia-cued activities. Reading and writing activities include strategies for improving reading and writing skills. The audio recorded passages are followed by comprehension-check activities. The video based activities test students' comprehension of the video and invite them to react to the experiences and opinions expressed by the speakers. A substantial appendix to both SAMs provides additional targeted practice for Spanish-

speaking learners of Portuguese.

Using the European Portfolio for Student Teachers of Languages Dec 06 2021 The European Portfolio for Student Teachers of Languages is a tool for reflection and self-assessment of the didactic knowledge and skills necessary to teach languages. It builds on insights from the Common European Framework of Reference and the European Language Portfolio as well as the European Profile for Language Teacher Education. Four years after its initial publication it has been translated into twelve European and Asian languages. To meet widespread demand this ECML publication provides materials which support its implementation in teacher education. The book entitled *Using the European Portfolio for Student Teachers of Languages* presents examples, discussions and research findings of how the EPOSTL is used in initial teacher education courses, in bi-lateral teacher education programs and in teaching practice. The accompanying folder and flyer feature, amongst other things, guidelines for strategic measures for introducing the EPOSTL in a particular institution.

Social and Economic Conditions of Student Life in Europe Aug 14 2022 This publication is a compendium of key indicators on the social dimension of higher education. It presents the findings of the 4th round of the EUROSTUDENT project, to which 25 countries forming part of the European Higher Education Area have contributed. With a view to obtaining internationally comparable data on the social and economic conditions of student life in Europe, more than 200,000 students were surveyed by the 25 national partners between 2008 and 2011. The thematic design of this report reflects a lifelong learning student's course of study, from transition into higher education to a forecast on future studies. It concentrates on 3 main topic areas: access to higher education and the organisation of studies, students' resources and expenses as well as international student mobility. The Synopsis of Indicators intends to contribute to the ongoing process of establishing a European-wide monitoring infrastructure on the social dimension of higher education, thereby inspiring policy debates and further research in the field. "This Synopsis of Indicators, together with the associated national reports and the online data base, provide an important resource for higher education policy makers and researchers." (Extract

from Foreword by Prof. Patrick Clancy)
