The Wrong Carlos James S. Liebman, Shawn Crowley, Andrew Markquart, Lauren Rosenberg, 2014-07-08 In 1989 Texas executed Carlos DeLuna a poor Hispanic man with childlike intelligence for the murder of Wanda Lopez a convenience store clerk His execution passed unnoticed for years until a team of Columbia Law School faculty and students almost accidentally chose to investigate his case and found that DeLuna almost certainly was innocent They discovered that no one had cared enough about either the defendant or the victim to make sure the real perpetrator was found Everything that could go wrong in a criminal case did This book documents DeLuna s conviction which was based on a single nighttime cross ethnic eyewitness identification with no corroborating forensic evidence At his trial DeLuna s defense that another man named Carlos had committed the crime was not taken seriously The lead prosecutor told the jury that the other Carlos Carlos Hernandez was a phantom of DeLuna s imagination In upholding the death penalty on appeal both the state and federal courts concluded the same thing Carlos Hernandez did not exist The evidence the Columbia team uncovered reveals that Hernandez not only existed but was well known to the police and prosecutors He had a long history of violent crimes similar to the one for which DeLuna was executed Families of both Carloses mistook photos of each for the other and Hernandez s violence continued after DeLuna was put to death This book and its website thewrongcarlos.net reproduce law enforcement crime lab lawyer court social service media and witness records as well as court transcripts photographs radio traffic and audio and videotaped interviews documenting one of the most comprehensive investigations into a criminal case in U S history The result is eye opening yet may not be unusual Faulty eyewitness testimony shoddy legal representation and prosecutorial misfeasance continue to put innocent people at risk of execution The principal investigators conclude with novel suggestions for improving accuracy among the police prosecutors forensic scientists and judges

Sketch of a Hieroglyphical Dictionary Samuel Birch, 1838 **Convicting the Innocent** Brandon L.

Garrett, 2011-08-04 On January 20 1984 Earl Washington defended for all of forty minutes by a lawyer who had never tried a death penalty case was found guilty of rape and murder in the state of Virginia and sentenced to death After nine years on death row DNA testing cast doubt on his conviction and saved his life However he spent another eight years in prison before more sophisticated DNA technology proved his innocence and convicted the guilty man DNA exonerations have shattered confidence in the criminal justice system by exposing how often we have convicted the innocent and let the guilty walk free In this unsettling in depth analysis Brandon Garrett examines what went wrong in the cases of the first 250 wrongfully convicted people to be exonerated by DNA testing Based on trial transcripts Garrett s investigation into the causes of wrongful convictions reveals larger patterns of incompetence abuse and error Evidence corrupted by suggestive eyewitness procedures coercive interrogations unsound and unreliable forensics shoddy investigative practices cognitive bias and poor

lawyering illustrates the weaknesses built into our current criminal justice system Garrett proposes practical reforms that rely more on documented recorded and audited evidence and less on fallible human memory Very few crimes committed in the United States involve biological evidence that can be tested using DNA How many unjust convictions are there that we will never discover Convicting the Innocent makes a powerful case for systemic reforms to improve the accuracy of all criminal cases
