Honda Motorcycles Workshop Manual C100 Super Cub Aug 31 2022 A faithful reproduction of the 1970

Floyd Clymer publication of the official Honda Factory Workshop Manual specific to the n00 50cc Super

Cub series of motorcycles. This manual includes all of the data that you would expect from a factory

publication for the repair and overhaul of all major and minor mechanical and electrical components. It also

includes a comprehensive trouble shooting section plus tables of technical data, tolerances and fits making

it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 136

illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The

translation from Japanese to English is, at times, a little quirky but the illustrations make up for any

difficulty in understanding what needs to be done! There are separate sections that deal with the repair and

overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor,

plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and

would certainly assist in helping any potential purchaser better understand the inner workings prior to

purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.
