An all-time top favorite." —Chloe Gong, #1 New York Times bestselling author of *These Violent Delights* and *Our Violent Ends* "Utterly unique, thought-provoking, and wonderfully written." —Gloria Chao, author of *American Panda* and *Rent a Boyfriend* In this genre-bending , speculative YA debut, a Chinese American girl monetizes her strange new invisibility powers by discovering and selling her wealthy classmates' most scandalous secrets. Alice Sun has always felt invisible at her elite Beijing international boarding school, where she's the only scholarship student among China's most rich and influential teens. But then she starts uncontrollably turning invisible—actually invisible. When her parents drop the news that they can no longer afford her tuition, even with the scholarship, Alice hatches a plan to monetize her strange new power—she'll discover the

scandalous secrets her classmates want to know, for a price. But as the tasks escalate from petty scandals to actual crimes, Alice must decide if it's worth losing her conscience—or even her life. First on the market to cover Sun's new IDE Forte, this special edition of a Liang's widely used Java book is a comprehensive introduction to Java programming with an expanded in-depth treatment of object-oriented programming. The book is easy to read and well paced, and is ideal for self-study. The book covers all subjects required in the Level I Java Certification Exam -- fundamentals of programming (including primitive data types, control statements, methods, and arrays); object-oriented programming; graphics programming; exception handling; internationalization; multithreading; multimedia; I/O; networking; and Java data structures Learning basic logic and fundamental programming techniques are essential for new programmers to succeed. A distinctive fundamentals-first approach and clear, concise writing style characterize this unique new text. Basic programming concepts are introduced on control statements, loops, functions, and arrays before object-oriented programming is discussed. Abstract concepts are carefully and concretely explained using simple, short, and stimulating examples. Explanations are presented in brief segments, with many figures and tables. For courses in Java Introduction to Programming and Object-Oriented Programming. The Fifth Edition of this outstanding text is revised in every detail to enhance clarity, content, presentation, examples, and exercises. For introductory courses in Python Programming and Data Structures. A fundamentals first approach to programming helps students create efficient, elegant code Revel™ Introduction to Python Programming and Data Structures introduces students to basic programming concepts using a fundamentals-first approach that prepares students to learn object-oriented programming and advanced Python programming. This approach presents programming concepts and techniques that include control statements, loops, functions, and arrays before designing custom classes. Students learn basic logic and programming concepts prior to moving into object-oriented and GUI programming. The content incorporates a wide variety of problems with various levels of difficulty and covers many application areas to engage and motivate students. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. In *Mapping the Translator: A Study of Liang Shiqiu*, the writer studies Liang Shiqiu (1903–1987), who was not only a famous writer and important critic but also one of the most prominent translators in China in the 20th century, most notably the first Chinese to finish a translation of *The Complete Works of William Shakespeare*. Based on primary sources, this research covers issues related to the

historical, cultural, cognitive and sociological dimensions of translator studies. It investigates Liang's translation poetics; the influences of possible patrons and professionals on him; the relationship between Liang's ideology, the dominant ideology and his translation; Liang's debates with Lu Xun about and beyond translation criteria, and whether there is inconsistency or possible contradiction in Liang's translation poetics. This book also analyses the similarities and differences between Liang Shiqiu and Wu Mi—two followers of Irving Babbitt—in terms of translation poetics, and further explores the reasons leading to such differences. This book is targeted at scholars and students, both undergraduate and postgraduate, in the fields of translation studies, Asian studies, Chinese studies, and literary studies.
